IN THE MATTER OF U S WEST
COMMUNICATIONS, INC.'S COMPLIANCE
WITH § 271 OF THE
TELECOMMUNICATIONS ACT OF 1996.

DOCKET NO. T-00000A-97-0238

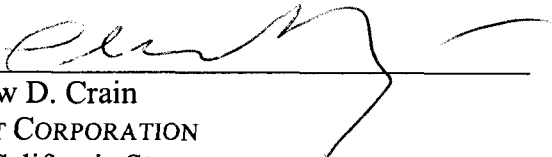

**QWEST'S NOTICE OF FILING CURRENT INFORMATION REGARDING
CHANGE MANAGEMENT PROCESS**

Qwest Corporation ("Qwest") hereby submits the current information regarding its Change Management Process, as follows:

Qwest has attached as Exhibit A the current version of the Master Redlined CLEC-Qwest CMP Redesign Framework Interim Draft Change Management Process, which was revised during the May 1-2, 2002 redesign session. This document can also be found on the "CMP Redesign" page of Qwest's wholesale web site at the following URL: <http://www.qwest.com/wholesale/cmp/redesign.html>.

Qwest has attached as Exhibit B the current version of the Qwest Wholesale Change Management Process Document, which has the same text as Exhibit B, but does not have revisions tracked or comments included in the body of the document. This document can be found on the "What is CMP?" page of Qwest's wholesale web site at the following URL: <http://www.qwest.com/wholesale/cmp/whatiscmp.html>.

Respectfully submitted this 7th day of May, 2002.

CHANGE MANAGEMENT PROCESS (CMP)

~~FOR LOCAL SERVICE ORDERING AND PROVISIONING~~

~~INTRODUCTION [NEED TO RE-ADDRESS AT A LATER DATE]~~

ACTION ITEM #17

~~THE CHANGE MANAGEMENT PROCESS (CMP) IS THE A FORMAL METHOD USED BY CUSTOMERSCOMPETITIVE LOCAL EXCHANGE CARRIERS (CLECS) AND QWEST AND A LOCAL SERVICE PROVIDERS TO INITIATE, COMMUNICATE, PRIORITIZE, SCHEDULE, TESTCOMMUNICATE ABOUT AND IMPLEMENT CHANGES ENHANCEMENTS CHANGES TO QWESTPROVIDER OPERATIONAL SUPPORT SYSTEMS (OSS) INTERFACES WHICH DIRECTLY OR INDIRECTLY IMPACT A CLEC. USED IN CONNECTION WITH RESOLD SERVICES AND UNBUNDLED NETWORK ELEMENTS. CHANGES INCLUDE NEW FUNCTIONALITY, ENHANCEMENTS TO EXISTING FUNCTIONALITY, DEFECT MAINTENANCE AND INTRODUCTION/RETIREMENT OF INTERFACES, BASED ON LOCAL SERVICE ORDERING GUIDELINES (LSOG).~~

~~THE CHANGE MANAGEMENT PROCESS CREATES A FRAMEWORK FOR MEETINGS IN WHICH CHANGES TO THE PROVIDER'S QWEST'S OSSS AND THEIR BUSINESS RULES MAY BE INTRODUCED OR DISCUSSED. THE CLECSCUSTOMER'S POINT OF CONTACT (POC) MAY REQUEST INTERFACE CHANGES FOR FUTURE CONSIDERATION BY SUBMITTING A CHANGE REQUEST FORM TO THE PROVIDER'SQWEST'S POC.~~

~~THE FCC REQUIRES INCUMBENT LOCAL EXCHANGE CARRIERS TO HAVE PROCESSES FOR MANAGEMENT OF MANUAL AND ELECTRONIC INTERFACES RELATIVE TO ORDER, PRE ORDER, ACCOUNT MAINTENANCE, TESTING AND BILLING. THE SCOPE OF THIS DOCUMENT IS TO DEFINE ONLY THE~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

~~PROCESSES FOR CHANGE MANAGEMENT OF MANUAL AND ELECTRONIC INTERFACES RELATIVE TO ORDER AND PRE-ORDER FUNCTIONS.~~

1.0 INTRODUCTION AND SCOPE

This document defines the processes for change management of ~~ess~~OSS interfaces, products and processes (including manual) as described below. ~~CMP~~_{mp} provides a means to address changes that support or affect pre-ordering, ordering/provisioning, maintenance/repair and billing capabilities and associated documentation and production support issues for local services provided by ~~elec~~CLECs to their end users.

The ~~emp~~CMP is managed by ~~elec~~CLEC and ~~qwest~~Qwest representatives each having distinct roles and responsibilities. The ~~elec~~CLECs and ~~qwest~~Qwest will hold regular meetings to exchange information about the status of existing changes, the need for new changes, what changes ~~qwest~~Qwest is proposing, how the process is working, etc. The process also allows for escalation to resolve disputes, if necessary.

Qwest will track changes to ~~ess~~OSS interfaces, products and processes. The ~~emp~~CMP includes the identification of changes and encompasses, as applicable, ~~[requirement definition, design, development, notification, testing, implementation and disposition of changes – revisit list]~~. Qwest will process any such changes in accordance with the ~~emp~~CMP described in this document.

In cases of conflict between the changes implemented through the CMP and any CLEC interconnection agreement (whether based on the Qwest SGAT or not), the rates, terms and conditions of such interconnection agreement shall prevail as between Qwest and the CLEC party to such interconnection agreement. In addition, if changes implemented through the CMP do not necessarily present a direct conflict with a CLEC interconnection agreement, but would abridge or expand the rights of a party to such agreement, the rates, terms and conditions of such interconnection agreement shall prevail as between Qwest and the CLEC party to such agreement. and the abridgement or expansion will not be permitted.

~~manual and electronic interfaces relative to pre-order, and pre-order, provisioning, maintenance/repair, and billing functions. Interface impact is defined as changes to field content or format, or changes in the business rules used to govern field population. This includes national guideline changes, e.g., LSOG, as well as providerQwest specific interface process and system changes. Changes include new functionality, enhancements to existing functionality, introduction/retirement of interfacesprocesses and systems and maintenance activities affecting production defects. Desired changes should be submitted to the appropriate ATIS Forum.~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

~~This scope includes any pre-order, order business rules, interface system testing and maintenance that impact ongoing and future technical and operational processes, and changes that alter the relationship in the manner in which the provider Qwest and customer a CLEC do business.~~

~~The CMP provides a means for changes to the provider's OSSs and their business rules. The customer's Point Of Contact (POC) may request interface changes for future consideration by submitting a Change Request Form to the provider's POC. These requests may include new functionality or changes to existing functionality.~~

~~The types of changes that will be handled by this process are:~~

- ~~☐ Software changes~~
- ~~☐ System Environment Configuration changes~~
- ~~☐ Changes resulting from new or changed Industry Guidelines / Standards~~
- ~~☐ Product and Services (e.g., new services available via the in-scope interfaces)~~
- ~~☐ Processes (e.g., electronic interfaces and manual processes relative to order and pre-order)~~
- ~~☐ Regulatory~~
- ~~☐ Documentation (e.g., business rules for electronic and manual processes relative to order and pre-order.~~
- ~~☐ Defect resolution~~
- ~~☐ Guidelines for provider-specific change management processes~~

~~The provider Qwest will track changes to the OSS interfaces as change requests and assign a tracking number to each change request. The CMP begins with the identification of the change request and encompasses requirement definition, design, development, notification, testing, implementation and decommissioning of the change request. The CMP is managed by customer CLEC and provider representatives each having distinct roles and responsibilities. The customer CLEC and the provider Qwest will hold regular meetings to exchange information about the status of existing change requests, the need for new changes, what changes the provider Qwest is proposing, how the process is working, etc. The process also allows for escalation to resolve disputes, if necessary.~~

~~The CMP is dynamic in nature and, as such, is managed through the regularly scheduled meetings and is based on group consensus. The parties agree to act in Good Faith in exercising their rights and performing their obligations pursuant to this CMP. This document may be revised, through the procedures set forth by the procedures described in Ssection 2.0.~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

2.0 MANAGING THE CHANGE MANAGEMENT PROCESS

7.12.1 Managing the Change Management Process Document

The Change Management Process is dynamic in nature. Proposed modifications to the CMP framework shall be originated by means of discussion at any of the regularly scheduled Monthly Product/Process CMP meetings (standing agenda item at the Monthly Product/Process CMP meetings).

The initiator of the change would send an email with the redlined language and the reasons for the request attached at least 14 days in advance of the Product & Process CMP meeting. The request initiator would present the proposal to the CMP participants. The parties would develop a process for input into the proposed change. To incorporate a change into the CMP requires unanimous agreement [as indicated by how, as defined by the voting process]. Each proposal will be assigned a unique tracking number. Date, version and history log for the CMP. Include the proposal in the distribution package and on the agenda. The requested change will be reviewed at one CMP meeting and voted on no earlier than the following CMP meeting.

2.2 Change Management Point-of-Contact (POC)

Qwest and each CLEC will designate primary and secondary change management POC(s) who will serve as the official designees for matters regarding this CMP. The primary POC is the official voting member, and a secondary (alternate) POC can vote in the absence of the primary POC for each CLEC. CLECs and Qwest will exchange POC information including items such as:

- Name
- Title
- Company
- Telephone number
- E-mail address
- Fax number
- Cell phone/Pager number

2.3 Change Management POC List

Primary and secondary CLEC POCs should be included in the Qwest maintained POC list. It is the CLEC responsibility to notify Qwest of any POC changes. The list will be made available to all participating CLECs with the permission of the POCs.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

2.4 Qwest CMP Responsibilities

2.4.1 CMP Managers

The Qwest CMP Product/Process Manager is the Qwest Product/Process POC and is responsible for properly processing submitted CRs, conducting the Monthly CMP Product/Process Meeting, assembling and distributing the meeting distribution package, and ensuring minutes are written and distributed in accordance with the agreed-upon timeline.

The Qwest CMP Systems Manager is the Qwest Systems POC and is responsible for properly processing submitted CRs, conducting the Monthly CMP Product/Process Systems Meeting, assembling and distributing the meeting distribution package, and ensuring minutes are written and distributed in accordance with the agreed-upon timeline. The CMP Systems Manager also distributes the list of CRs eligible for prioritization to Qwest and the CLECs for ranking, tabulates the rankings, and forwards the resulting prioritization of the CRs to Qwest and the CLECs. In addition, the CMP Systems Manager is responsible for coordinating the publication of any Qwest OSS Interface release notification schedules.

2.4.2 Change Request Project Manager (CRPM)

The Qwest CRPM manages CRs throughout the CMP CR lifecycle. The CRPM is responsible for obtaining a clear understanding of exactly what deliverables the CR originator requires to close the CR, arranging the CR clarification meetings and coordinating necessary Subject Matter Experts (SMEs) from within Qwest to respond to the CR and coordinate the participation of the necessary SMEs in the discussions with the CLECs.

2.4.3 Escalation/Dispute Resolution Manager

The Escalation/Dispute Resolution Manager is responsible for managing escalations and disputes in accordance with the CMP Escalation Process and Dispute Resolution Process.

2.35 Preferred Method of Communication

The preferred method of communication is e-mail with supporting information posted to the web site when applicable (see Section 38.3 Qwest Wholesale CMP Web Site). Communications sent by e-mail resulting from CMP will include in the subject line "CMP". ~~Judy Schultz will investigate the feasibility of this. Action Item #272]~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

~~Qwest will utilize the web site to support large documents, like CMP distribution packages. Email notifications surrounding communications regarding document changes will include direct web site links to the related documentation. Similarly, Qwest will employ the web site as an archive for all historic meeting distribution packets and minutes. [Action Item #156]~~

~~Redlined PCATs and Technical Publications associated with product, process, and systems changes will be posted to the Qwest CMP Document Review Web site, <http://www.qwest.com/wholesale/cmp/review.html>. For the duration of the agreed upon comment period CLECs may submit comments on the proposed documentation change. At the Qwest CMP Document Review Web site CLECs may submit their comments on a specific document by selecting the "Submit CommentsClick here to Submit Your Comments on a Specific Review Document" link associated with the document. The "Submit CommentsClick here to Submit Your Comments on a Specific Review Document." link will take CLECs to an HTML comment template. If for any reason the "Submit" button on the site does not function properly, CLEC may submit comments to cmpcomm@qwest.com. Once CLECs select the "Submit" button at the bottom of the template, the template will be automatically emailed to a continuously monitored email box [Action Item #271] and CLEC comments will be posted to the Web. After the conclusion of [the agreed to the applicable CLEC comment time constraintperiod] CLEC comment period, Qwest will aggregate all CLEC comments with Qwest responses and distribute to all CLECs respond to all submitted CLEC comments. The Qwest response will be posted to the Web or sent to CLECs via Notification email within [the agreed tothe applicable time constraintperiod]. [Action #145][Clean up with "Comments" Ref.]~~

7.4 — Governing Body

~~The change management organizational structure must support the CMP. Each position within the organization has defined roles and responsibilities as outlined below.~~

~~**CMP Team:** Representatives are from the CLECs (or their authorized agents) and Qwest. This team meets monthly to review, prioritize, and make recommendations for change management requests. The change management requests are used as input to internal change management processes.~~

~~**CMP Steering Committee:** The CMP Steering Committee consists of representatives from the CLECs and Qwest who will be responsible for managing compliance to the CMP document. The responsibilities of the CMP Steering Committee are:~~

- ~~☐ On-going commitment~~
- ~~☐ Participation in change management meetings/conference calls~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end usersthat are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- ☐ ~~Reviewing changes/suggestions to the CMP document for submittal to OBF~~
- ☐ ~~Process improvements~~
- ☐ ~~Managing meeting schedule/logistics~~

~~A standing agenda item at the regular change management meetings will provide an opportunity for Qwest and CLECs to assess the effectiveness of the CMP. Both the CLECs and Qwest will use this opportunity to provide feedback of instances of non-compliance and commit to taking appropriate action(s).~~

~~Provider POC: Qwest POC is responsible for managing the CMP. Qwest POC will be responsible for maintaining the integrity of the change requests, preparing for and facilitating review meetings, presenting change requests to Qwest's internal CMP, and ensuring that all notifications are communicated to the appropriate parties.~~

~~CLEC POC: The CLEC POC will serve as the official designee for all matters regarding CMP, including:~~

- ☐ ~~Submission of CLEC change request forms~~
- ☐ ~~Notification of critical matters, such as Type 1 errors~~

~~Release Management Team: A team of CLEC and provider representatives who manage the implementation of scheduled releases.~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

3.0 MEETINGS

~~Change Management meetings will be conducted monthly.~~

~~FROM AUGUST 8, 2001 REDLINED FRAMEWORK~~

Change Management meetings will be conducted on a regularly scheduled basis, at least two consecutive days on a monthly basis. Meeting participants can choose to attend meetings in person or participate by conference call.

Meetings are held to review, prioritize, manage the implementation of process and system changes –and address change management requests. Qwest will review the status of all applicable change requests. The meeting may also include discussions of Qwest's development view.

CLEC's request for additional agenda items and associated materials should be submitted to Qwest at least five (5) business days by noon (MT) in advance of the meeting. Qwest is responsible for distributing the agenda and associated meeting materials at least three (3) business days by noon (MT) in advance of the meeting. Qwest will be responsible for preparing, maintaining, and distributing meeting minutes-. Attendees with any walk-on items should bring materials of the walk-on items to the meeting.

All attendees, whether in person or by phone, must identify themselves and the company they represent.

Additional meetings may be held at the request of Qwest or any ~~qualified CLEC (as defined in this document)~~. Meeting notification must contain an agenda plus any supporting meeting materials. These meetings should be announced at least five (5) business days prior to their occurrence. Exceptions may be made for emergency situations.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

~~The provider is responsible for notifying customers and distributing agendas and other meeting materials to include, but not limited to, actual change requests received from the customers and documentation of industry guidelines and regulatory changes at least seven (7) calendar days in advance of the meeting.~~

~~Customers can choose to attend meetings in person or participate by conference call. The provider must make a conference bridge available for meetings. The agenda will include the dial-in number and the access information.~~

~~The provider will be responsible for preparing, maintaining, and distributing minutes following the meeting. The draft version of the minutes must be distributed no later than seven (7) calendar days after the meeting and must contain the name of each attendee and the company they represent. All attendees, whether in person or by phone, must identify themselves and the company they represent. The provider will also update the status of change requests after the meeting and distribute it following the meeting as part of the meeting minutes.~~

~~Emergency or special meetings may be held at the request of the provider or any qualified customer (as defined in this document). Emergency meeting notification must contain an agenda plus any supporting meeting materials. These meetings should be announced at least two (2) business days prior to their occurrence.~~

3.1 Meeting Materials [Distribution Package] for Change Management Meeting

FROM AUGUST 8, 2001 REDLINED FRAMEWORK

Meeting materials should include the following information:

- Meeting Logistics
- Minutes from previous meeting
- Agenda
- Change Requests and responses
 - New/Active
 - Updated
 - Log
- Issues, Action Items Log and associated statuses
- Release Summary
- 12 Month Development View

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- Monthly System Outage Report
- Any other material to be discussed

Qwest will provide Meeting Materials (Distribution Package) electronically by noon 3 business days prior to the Monthly CMP Meeting. In addition, Qwest will provide hard copies of the Distribution Package at the Monthly CMP Meeting.

3.2 Meeting Minutes for Change Management Meeting

Agenda Items for Change Management Meeting

Agenda items should include but are not limited to, the following:

- ☐ Change Request discussions
- ☐ Issues/Actions
- ☐ Release Notice/12 Month Development View
- ☐ Effectiveness of change management Process
- ☐ Specifications for regulatory or industry originated change requests

II. Change Management Meeting Action Log and Change Request Status

The provider will maintain and distribute at the change management meeting an Action Item Log containing action items from previous meetings and status. Additionally, during the change management meetings, the provider will review status of the customer change requests. The meeting will include discussions of the provider's development view, as well as any customer's suggested development to the provider Operations Support Systems (OSSs).

FROM AUGUST 8, 2001 REDLINED FRAMEWORK

- ☐ Qwest will take minutes.

Qwest will summarize discussions in meeting minutes and include any revised documents such as Issues, Action items and statuses.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

Minutes should be distributed to meeting participants for comments or revisions no later than five (5) business days by noon (MT) after the meeting. CLEC comments should be provided within two (2) business days by noon (MT). Revised minutes, if CLEC comments are received, should be distributed within nine (9) business days by noon (MT) after the meeting.

~~The provider will take minutes during the meeting. Meeting minutes should include, but are not limited to, the following:~~

- ~~☐ Current status of change requests and Release Notices~~
- ~~☐ Issues/Action items and status~~
- ~~☐ Attendees/Company~~

~~A draft version of the minutes should be distributed to meeting participants for comments or revisions no later than seven (7) calendar days after the meeting. Customers need to respond to the provider with any modifications to the draft version within two (2) business days. Revisions and comments will be incorporated into the final minutes. The final minutes will be distributed within eleven (11) calendar days after the meeting.~~

3.3 ~~ProviderQwest Change Management Process Wholesale CMP Web Site~~

~~[Need to re-visit – ACTION ITEM #137G]To facilitate access to CMP documentation, the providerQwest will maintain CMP information on its web site. The web site should be easy to use and updated in a timely manner. The Web site should be a well organized central repository for CLEC notifications and CMP documentation. Active documentation including meeting materials (Distribution Package), should be maintained on the website. Change Requests and release notifications should be identified in accordance with the agreed upon naming convention, to facilitate ease of identification. Qwest will maintain closed and old versions of documents on the web site's Archive page for 18 months before storing off line. Information that has been removed from the web site can be obtained by contacting the appropriate Qwest CMP Manager. -At a minimum, the CMP web site will contain include:~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK

11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- Current version of the ~~provider~~Qwest CMP document describing the CMP's purpose and scope of setting forth the CMP objectives, procedures, and timelines, including release life cycles.
- Calendar of release dates
- OSS hours of availability
- Links to related web sites, such as IMA EDI, IMA GUI, CEMR, and Notices
- Current CMP escalation process
- CMP prioritization process description and guidelines
- Change Request form and instructions to complete form
- Submitted and open Change Requests and the status of each
- Responses to Change Requests and written responses to CLEC inquiries
- Meeting (formal and informal) information for CMP monthly meetings and interim meetings or conference calls, including descriptions of meetings and participants, agendas, minutes, sign-up forms, and schedules
- A log of ~~CLEC and Qwest~~each type of change requests and associated statuses histories
- Issue/Action items and statusesMeeting materials (distribution package)
- Meeting minutes
- Release announcements and other CLEC notifications and associated requirements
- Directory to CLEC notifications for the month
- Business rules, SATE test case scenarios technical specifications, and user guides will be provided via links on the CMP web site, based on the LSOG and provider's specific requirements
- Contact information for the CMP POC list, including CLEC, Qwest and other participants (with participant consent to publish contact information on web page).
- Redlined PCAT and Technical Publications - see Section 2.5
- Instructions for receiving CMP communications – see Section 2.5

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

4.0 TYPES OF CHANGE

~~A~~The ~~C~~hange ~~R~~request should fall into one of the following classifications:

~~1. Type 1 (Production Support) Change~~

~~A Type 1 change corrects problems discovered in production versions of an OSS application interface. Either the provider Qwest or the customer CLEC may initiate the change request. Typically, this type of change reflects instances where a technical implementation is faulty or inaccurate such as to cause correctly or properly formatted data to be rejected. Instances where providers Qwest or customer CLECs misinterpret interface specifications and/or business rules must be addressed on a case-by-case basis. All parties will take all reasonable steps to ensure that any disagreements regarding the interpretation of a new or modified business process are identified and resolved during the change management review of the change request. Type 1 changes will be processed on an expedited basis by means of an emergency release of software/documentation.~~

~~Additionally, once a Type 1 change is identified, the change management team (see the Managing The Change Management Process section) must determine the nature and scope of the maintenance. Type 1 changes are categorized in the following manner:~~

~~**Severity 1:** Production Stopped: Interface Unusable – Interface discrepancy results in totally unusable interface requiring emergency action. Customer CLEC Orders/Pre Orders cannot be submitted or will not be accepted by the provider Qwest and manual work-arounds are not feasible. Correction is considered essential to continued operation. The provider Qwest and customer CLECs should dedicate resources to expedite resolution.~~

~~Acknowledgment Notification = 1 hour~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

~~Status Notification~~ = bi-hourly

~~**Severity 2:** Production Degraded: Interface Affecting – An interface discrepancy that requires a work-around(s) on the part of the customer CLEC or the provider Qwest. The change is considered critical to continued operation. It does not stop production, but affects key applications.~~

~~Acknowledgment Notification~~ = 4 hours

~~Status Notification~~ = weekly

~~Implementation time~~ = 14 – 30 calendar days

~~**Severity 3:** Process Impacted: Pre-order / Order requests can be submitted and will be accepted through normal processes / interfaces. Clarification is considered necessary to ongoing operations.~~

~~Acknowledgment Notification~~ = 7 calendar days

~~Implementation time~~ = 30 – 60 calendar days

~~II. Type 2 (Regulatory) Change~~

4.1 Regulatory Change

A ~~Regulatory~~ Type 2 Change is mandated by regulatory or legal entities, such as the Federal Communications Commission (FCC), a state commission/authority, or state and federal courts, or as agreed to by Qwest and CLECs. Regulatory changes are not voluntary but are requisite to comply with newly passed legislation, regulatory requirements, or court rulings. ~~It~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users ~~that are provided to CLECs.~~

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note–Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

determining whether a Regulatory Change has arisen from a change in circumstance, consideration must be given to the recency of the change in circumstance. Either the customer CLEC or the provider Qwest may initiate the change request.

III.4.2 ~~Type 3 (Industry Guideline) Change~~

~~A Type 3 change implements telecommunications~~ An Industry Guideline Change implements Industry Guidelines using a national implementation timeline, if any. Either the provider Qwest or the customer CLEC may initiate the change request. These guidelines are industry defined by:

- Alliance for Telecommunications Industry Solutions (ATIS) Sponsored
- Ordering and Billing Forum (OBF)
- Local Service Ordering and Provisioning Committee (LSOP)
- Telecommunications Industry Forum (TCIF)
- Electronic Commerce Inter-exchange Committee (ECIC)
- Electronic Data Interface Committee (EDI)
- American National Standards Institute (ANSI)

III.4.3 ~~Type 4 (Provider Originated) Change~~ Qwest Originated Change

~~A Type 4~~ A Qwest Originated change is originated by the provider Qwest does not fall within the changes listed above and is within the scope of CMP and affects interfaces between customers and the provider. These changes may involve system enhancements, manual and/or business processes].

III.4.4 ~~Type 5 (Customer CLEC Originated) Change~~ CLEC Originated Change

~~A Type 5~~ A CLEC Originated change is originated by the customer CLEC does not fall within the changes listed above and is within the scope of CMP and affects interfaces between customers and the provider. These changes may reflect a business process improvement that the customer CLEC is seeking to implement and implies a change in the way in which the customer CLEC wishes to interact with the provider Qwest.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

5.0 CHANGE REQUEST PROCESS

5.1 CLEC-Qwest OSS Interface Change Request Initiation-Process

A CLEC or Qwest seeking to change an existing OSS interface, to establish a new OSS interface, or to retire an existing OSS interface must submit a Change Request (CR). A Change Request initiator-originator will complete and email a completed Change Request (CR) Form to the Qwest Systems CMP Manager in accordance with the instructions set forth in the Qwest Wholesale CMP Web site located at the following URL: <http://www.qwest.com/wholesale/cmp/index.html>. The CR Process supports Regulatory, Industry Guideline, CLEC-initiated and Qwest-initiated changes. The process for Regulatory or Industry Guideline changes will be managed as described in Section 5.1.1. and Section 5.1.2 below.

~~(WCOM COMMENT: WCOM BELIEVES THE TYPES OF CHANGES THAT CAN BE REQUESTED BY EITHER PARTY NEED TO BE SPECIFIED HERE. THE CMP REDESIGN TEAM AGREED THAT THE FOLLOWING CHANGE REQUEST TYPES CAN BE REQUESTED BY EITHER PARTY:~~

~~TYPE 2 (REGULATORY), TYPE 3 (INDUSTRY GUIDELINE), AND DEPENDING ON THE PARTY EITHER TYPE 4 (QWEST INITIATED) OR TYPE 5 (CLEC INITIATED))~~

5.1.1 Regulatory or Industry Guideline Change Request

The party submitting a Regulatory or Industry Guideline CR must also include sufficient information to justify the CR being treated as a Regulatory or Industry Guideline CR in the CR description section of the CR form. Such information must include specific references to regulatory or court orders, legislation, or industry guidelines as well as dates, docket or case number, page or paragraph numbers and the mandatory or recommended implementation date, if any. *If a regulatory CR is implemented by a manual process and later it is determined that a change in circumstance warrants a mechanized solution, the CR originator must provide the evidence of the change in circumstance, such as an estimated volume increase or changes in technical feasibility.*

Qwest or any CLEC may submit Regulatory and Industry Guideline CRs. Qwest will send CLECs a notice when it posts Regulatory or Industry Guideline CRs to the Web web site and identify when comments are due, as described below. Regulatory and Industry Guideline CRs will also be identified in the CMP Systems Monthly Meeting Distribution Package. The upcoming meeting agenda will identify that consensus is required if a CR constitutes a

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

Regulatory or Industry Guideline change. Not later than 8 business days prior to the Systems CMP Systems Monthly meeting, any party objecting to the classification of such CR as Regulatory or Industry Guideline must submit a statement documenting reasons why the objecting party does not agree that the CR should be classified as Regulatory or Industry Guideline change. Regulatory and Industry Guideline CRs may not be presented as walk-on items.

If Qwest or any CLEC has objected to the classification of a CR as Regulatory or Industry Guideline, that CR will be discussed at the next monthly Change Management Systems Meeting. At that meeting, Qwest and the CLECs will attempt to agree that the CR is Regulatory or Industry Guideline. ~~At that meeting, if~~ Qwest or any CLEC does not agree that the CR is Regulatory or Industry Guideline, the CR will be treated as a non-Regulatory, non-Industry Guideline CR and prioritized with the CLEC-originated and Qwest-originated CRs, unless and until the CR is declared to be Regulatory or Industry Guideline through dispute resolution. Final determination of CR type will be made by the CLEC and Qwest designated representative POC at that monthly meeting, and documented in the meeting minutes. [Revisit POC after voting process discussion]

5.1.2 Implementation Plan ~~for~~ Regulatory CRs

As a general rule, a Regulatory Change will be implemented by mechanization unless all parties agree otherwise, as described below. Accordingly, all Regulatory CRs initially must be submitted as Systems CRs, including when the regulatory CR clearly is for a Product or Process change, and will be introduced at the monthly CMP Systems meeting. If the Regulatory CR ~~initiator~~originator seeks to establish that the CR should be implemented by a manual process, the ~~initiator~~originator must so indicate on the CR form and include as much information supporting the application of the exception as practicable.

For each Regulatory CR, Qwest will provide a cost analysis for both a manual and a mechanized solution. The cost analyses will include a description of the work to be performed and any underlying estimates that Qwest has performed associated with those costs. Qwest will also provide an estimated level of effort expressed in terms of person hours required for the mechanized solution. The cost analysis will be based on factors considered by Qwest, which may include volume, number of CLECs, technical feasibility, parity with retail, or effectiveness/feasibility of a manual process.

The Regulatory CR will be implemented by a manual solution if there is a majority vote in favor of one of the following exceptions by Qwest and CLECs present at the monthly CMP Systems meeting. ~~(WCom Comment: would we need to define what constitutes a “majority vote”)~~ [Action Item 173]

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

A. The mechanized solution is not technically feasible.

or

B. There is a significant difference in the costs for the manual and mechanized solutions. Cost estimates will allow for direct comparisons between solutions using comparable methodologies and time periods.

Any party that desires to present information to establish an exception may do so at the monthly Systems CMP meeting when the implementation plan is presented

After the implementation plan has been discussed at the CMP Systems meeting at which the CR is presented, Qwest will request that a representative ~~POC~~ of each CLEC and Qwest indicate the respective preferences regarding the exception, e.g., by a show of raised hands. The majority vote decision will apply unless the outcome of a dispute resolution alters such decision. The results will be reflected in the meeting minutes. ~~(WCom Comment: 1) Language needs to be added to ensure that CLECs are aware that a vote and decision will be required regarding Regulatory CRs prior the CMP meeting when the implementation plan is presented. 2) This process should be more formalized (i.e. vote that is documented)~~

~~(Wcom deletion--)~~

In addition to Exceptions A or B, the parties that are present at the ~~Systems CMP~~ Systems meeting at which the CR is presented can, upon unanimous agreement, decide to vary from the general rule regarding Regulatory CR implementation in any respect. For example, the parties at the ~~Systems CMP~~ Systems meeting at which the CR is presented can agree that a Regulatory CR will be implemented by a manual solution for any reason other than those described in Exceptions A and B. If the Regulatory CR originator seeks to establish that a variance should apply, the originator must so indicate on the CR form and include in the CR as much information supporting the application of the exception as practicable.

~~(Wcom deletion--)~~

If any party present objects to voting on the exception or variance at the monthly ~~Systems CMP~~ Systems meeting at which the CR is presented, then Qwest will request that a representative POC of each CLEC and Qwest indicate whether they prefer to postpone the vote until the next monthly ~~Systems CMP~~ Systems meeting, e.g., by a show of raised hands. The majority vote decision will apply. The results of the vote will be reflected in the meeting minutes. ~~(Wcom~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

~~deletion~~.) If appropriate, additional discussion regarding the CR will be held at the next monthly ~~Systems CMP~~ Systems meeting prior to the vote.

~~(Wcom deletion)~~ ~~(Wcom addition)~~ Once a Regulatory CR has been agreed upon to ~~be~~ implemented by a manual solution, the CR will be, from that point forward, tracked as a Product/Process CR through the monthly CMP Product/Process ~~CMP~~ meetings.

If Qwest is unable to fully implement a mechanized solution in the first release that occurs after the CMP participants agree that a change has been mandated, Qwest's implementation plan for the mechanized solution may include the short-term implementation of a manual work-around until the mechanized solution can be implemented. In that situation, a single systems Regulatory CR will be used for the implementation of both the manual and mechanized changes. Qwest will continue to work that Regulatory CR until the mechanized solution is implemented.

If a regulatory CR is implemented by a manual process and later it is determined that a change in circumstance warrants a mechanized solution, Qwest or any CLEC may submit a new systems CR which must include evidence of the change in circumstance, such as an estimated volume increase or changes in technical feasibility, and the number of the CR that was implemented using a manual process. The CR originator may request that the CR be treated as a Regulatory CR. If Qwest or any CLEC does not agree to treat the CR as a Regulatory Change, it will be treated as a Qwest or CLEC initiated change.

Any party that disagrees with the majority decision regarding Exceptions A and B may initiate dispute resolution pursuant to the CMP Dispute Resolution provisions.

FLOW

~~CR starts with Regulatory designation~~

~~Introduced in Systems CMP~~

~~If determined Manual then moves to P&P CMP~~

~~The originator should include information supporting the exception request if practicable~~

~~(revised CR form to indicate that a manual solution is sought)~~

~~Address timing of Qwest recommended solution and decision and vote~~

~~*If agreement is reached at the monthly CMP meeting that a CR constitutes a Regulatory Change, then at that same meeting, Qwest will propose an implementation plan for compliance*~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

~~with a regulatory mandate. The proposal will include the criteria that Qwest used to determine the proposed method of implementation, including estimated volume, an estimated level of effort for implementing a manual solution, and an estimated level of effort for implementing a mechanized solution. Qwest will express the estimated levels of effort for these purposes in terms of a range of hours required to implement. If relied upon, the criteria may also include cost, estimated volume, number of CLECs, technical feasibility, parity with retail, or effectiveness/feasibility of manual process.~~

~~If the difference between the midpoint of each range of the estimated levels of effort for implementing the manual and mechanized solutions is less than 10% of the larger number, and Qwest did not rely upon other criteria in determining the proposed method of implementation, then the decision regarding whether to implement the manual or mechanized solution will be determined by the desires of the majority of the parties present at the monthly meeting where the implementation plan is presented. For example, if Qwest did not rely on other criteria, this provision applies where the midpoint of the level of effort for the mechanized solution is 2000 hours and the midpoint of the level of effort for the manual solution is 2200 hours, because the difference is 200 hours, which is less than 10% of 2200, or 220. After the implementation plan has been discussed at that meeting, Qwest will request that a representative of each CLEC and Qwest indicate their preference for the manual or the mechanized solution, e.g., by a show of raised hands. The determination will be made by the majority of parties that express a preference. The results will be reflected in the meeting minutes.~~

~~If Qwest is unable to fully implement a mechanized solution in the first release that occurs after the CMP participants agree that a change has been mandated, Qwest's implementation plan for the mechanized solution may include the short term implementation of a manual work-around until the mechanized solution can be implemented. In that situation, the CR to implement the mechanized change will be treated as a Regulatory Change, notwithstanding the fact that a manual work-around is required for some interim period, and Qwest will continue to work that Regulatory CR until the mechanized solution is implemented.~~

~~Qwest's implementation plan for a manual solution may include a plan to implement a mechanized solution when and if estimated volume for the functionality justifies implementation of a mechanized solution. In that situation, a subsequent CR to implement the mechanized change must be submitted when estimated volume justifies implementation of the mechanized solution and will be treated as a Regulatory Change only if the CLECs and Qwest agree to such treatment. If the parties do not agree to treat such a CR as a Regulatory Change, it will be treated as a non-Regulatory Change.~~

~~CLECs and Qwest will attempt to reach agreement on the implementation plan at the monthly CMP meeting at which the proposed implementation is presented.~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

~~If any CLEC objects to the proposed implementation plan because it disagrees with Qwest's assessment of the estimated volume, the CLEC must submit information to Qwest demonstrating that Qwest's volume estimate should be revised. The CLEC shall submit such information to Qwest within 5 business days after the monthly meeting.⁴ Qwest shall consider all such information submitted and determine whether a revision of its volume estimate is appropriate. Within 10 business days after the monthly meeting, Qwest will notify CLECs via the mailout process whether it has determined that a revision of the volume estimate is appropriate. If it has revised the volume estimate, Qwest will include the revised volume estimate and will state whether the revised volume estimate results in a change to Qwest's estimated levels of effort to implement a manual and/or mechanized solution. If the volume estimate is revised and the revision results in a change to Qwest's estimated levels of effort to implement a manual and/or mechanized solution and/or Qwest's proposed implementation plan, Qwest will include the revised estimated levels of effort and the revised implementation plan in the notification. This implementation plan will be presented at the next monthly CMP meeting. CLECs and Qwest will attempt to reach agreement on the implementation plan at the monthly CMP meeting at which the revised implementation is presented.~~

~~The final determination regarding the implementation plan will be made by Qwest with input from CLECs, except where the estimated levels of effort for implementing the manual and mechanized solutions are not significantly different and the decision regarding whether to implement a manual or mechanized solution is determined by the CLECs, as set forth above. If no CLECs object to the proposed plan at the monthly meeting where it is first presented, final determinations will be made at that meeting and documented in the meeting minutes.~~

~~Qwest will present the proposed plan at the next monthly meeting only if all of the following apply:~~

- ~~☐ one or more CLECs object to the proposed plan at the monthly meeting where it is first presented,~~
- ~~☐ one or more CLECs submit additional volume estimate information as set forth above, and~~
- ~~☐ the additional information submitted by CLECs results in a revision to the implementation plan.~~

~~If all of the above apply, resulting in a revised implementation plan, then Qwest will present the revised implementation plan at the next monthly meeting. Final determinations regarding the~~

¹ If necessary, a CLEC may indicate that such information is confidential by marking each page with the word "Confidential." If Qwest receives information pursuant to this provision that is marked "Confidential", Qwest will not disclose such confidential information to any other CLEC, but Qwest may use such confidential information to revise its demand estimate, if appropriate, and may disclose its revised demand estimate.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

~~implementation plan will be made at that monthly meeting and documented in the meeting minutes.~~

~~If any CLEC does not agree with the final implementation plan, the objecting CLEC may initiate dispute resolution under the CMP Dispute Resolution process.~~

-5.1.3 CR Initiation Process

Within two (2) business days after receipt of a valid CR Qwest's Systems CMP Systems Manager will assign a CR Number for tracking purposes, assign a Change Request Project Manager (CRPM), acknowledge receipt of the CR by e-mail to the CR Originator and issue the CR internally for management through the process. –The CR will be assigned the status of Submitted² and become an active CR reported in Qwest's CLEC Change Request Systems Interactive Report located on the Qwest Wholesale CMP web site. ~~(WCOM COMMENT: THE WAY THIS READS, QWEST INITIATED CRS FOLLOW THIS SAME PROCESS, IS THAT THE INTENT? WCOM BELIEVES IT SHOULD BE.)~~

☐ Within four (4) business days after receipt of a valid CR, Qwest will post the valid CR to the CMP web site via Qwest's Interactive Report. The report will contain the CR details, originator identity, assigned CRPM, assigned CR Number and, when practicable, the designated Qwest SME and associated Director.

Within eight (8) business days of receipt of a complete CR, the CRPM coordinates and holds a Clarification Meeting with the CR Originator and Qwest's SME(s). If the originator is not available within the above specified time frame, then the clarification meeting will be held at a mutually agreed upon time. Qwest may not provide a response to a CR until a clarification meeting has been held.

At the clarification meeting, Qwest and the Originator will review the submitted CR, validate the intent of the Originator's CR, clarify all aspects, identify all questions to be answered, and determine deliverables to be produced. After the clarification meeting has been held, the CRPM will document and issue meeting minutes within five (5) business days.

CRs submitted 21 calendar days (3 weeks) prior to the next scheduled CMP Meeting will be presented at that CMP meeting for clarification from all CLECs participating in the CMP Meeting. Prior to the Systems CMP Systems Meeting the CRPM will post responses to Systems CRs to the CMP database. The response will be made available via the Interactive

~~² CR Status Code Definitions are presented at the end of Section 35.3.~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

Reports and via the Distribution Package for the ~~Systems~~ CMP Systems Meeting. The Originator will present its CR and provide any business reasons for the CR. Items or issues identified during the previously held clarification meeting will be relayed. CLECs participating in the CMP Meeting will be given the opportunity to comment on the CR and provide additional clarifications. If appropriate, Qwest's SME(s) will identify options and potential solutions to the CR. Clarifications and/or modifications related to the CR will be incorporated into the evaluation of the CR. Consensus will be obtained from the participating CLECs as to the appropriate direction/solution for Qwest's SME to take in responding to the CR if applicable.

CRs that are not submitted 21 calendar days prior to the CMP Meeting may be introduced at that CMP Meeting as a walk-on item. The Originating CLEC will present its CR and participating CLECs will be allowed to provide comments to the CR. Qwest will provide a status of the CR.

All Qwest Draft Responses issued will be presented at the next scheduled CMP Meeting. Qwest will conduct a walk through of the response and participating CLECs will be provided the opportunity to discuss, clarify and comment on Qwest's Response. Qwest's Responses will be either:

- "Accepted" (Qwest will implement the CLEC request) with position stated, or
- "Denied" (Qwest will not implement the CLEC request) with basis for the denial, including reference to substantiating material. CLEC-initiated OSS Interfaces change request may be denied for one or more of the following reasons.
 - Technologically not feasible—a technical solution is not available
 - Regulatory ruling/Legal implications—regulatory or legal reasons prohibit the change as requested, or if the request benefits some CLECs and negatively impact others (parity among CLECs) (Contrary to ICA provisions)
 - ~~Qwest policy (rename) —the procedure is working, the requested change is not beneficial (more objective, less subjective)~~
 - Outside the Scope of the Change Management Process—the request is not within the scope of the Change Management Process (as defined in this CMP), seeks adherence to existing procedures, or requests for information (as defined in the Master Red-line document this CMP)
 - Economically not feasible—low demand, cost prohibitive to implement the request, or both.
 - The requested change does not result in a reasonably demonstrable business benefit (to Qwest or the requesting CLEC) or customer service improvement –.

Qwest will not deny a CR solely on the basis that the CR involves a change to back-end systems. Qwest will apply these same concepts to CRs that they Qwest initiates. The SCRP

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note—Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

may be invoked if a CR was denied due to economically not feasible—refer to Section 10.3 SCRP.

Based on the comments received from the CMP Meeting, Qwest may revise its response and issue a revised draft response at the next CMP Meeting.

If CLECs do not accept Qwest's response, they may elect to escalate or dispute the CR in accordance with the agreed upon CMP escalation or Dispute Resolution procedures. If the originating CLEC does not agree with the determination to escalate or pursue the dispute resolution, it may withdraw its participation from the CR and any other CLEC may become responsible for pursuing the CR Escalation upon providing written notice to the Qwest CMP Manager. The CR will be assigned the status of Escalated and remain an active CR. Qwest will note in the status history of the interactive reports that the CR has been escalated. However, the CR status will reflect the stage of the CR as it progresses through the CR lifecycle.

If the CLECs do not accept Qwest's response and do not intend to escalate or dispute at the present time, they may request Qwest to status the CR as 'Deferred.' The CR will be ~~statused~~remain as Deferred ~~deferred~~ and CLECs may activate or close the CR at a later date.

At the last Systems CMP meeting before Prioritization, Qwest will facilitate the presentation of all CRs eligible for Prioritization. At this meeting Qwest will provide a high level estimate of the Level of Effort of each CR and the estimated total capacity of the release. This estimate will be an estimate of the number of person hours required to incorporate the CR into the release. Ranking will proceed, as described in Section x: Prioritization. The results of the ranking will produce a release candidate list.

~~(1st sentence moved into the previous paragraph and modified to mirror language in "CR Prioritization". 2nd sentence moved to "CR Prioritization" section)~~

35.2 CLEC-Qwest OSS Interface Change Request Lifecycle

Based on the release candidate list, Qwest will begin its development cycle ~~which~~that includes the following milestones:

35.2.1 Business and Systems Requirements

Qwest engineers define the business and functional specifications during this phase. The specifications are completed on a per candidate basis in priority order. During business and system requirements, any candidates which have affinities and may be more efficiently implemented together will be discussed. Candidates with affinities are defined as candidates with similarities in functions or software components. Qwest will also present any complexities,

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

changes in candidate size, or other concerns that may arise during business or system requirements, which would impact the implementation of the candidate. During the business and systems requirement efforts, CRs may be modified or new CRs may be generated (by CLECs or Qwest), with a request that the new or modified CRs be considered for addition to the release candidate list (late added CRs). ~~(WCOM COMMENTS: CHANGE “INITIAL RELEASE CANDIDATE LIST TO “RELEASE CANDIDATE LIST.”)~~ If the CMP body grants the request to consider the late added CRs for addition to the release candidate list, Qwest will size the CR's requirements work effort. If the requirements work effort for the late added CRs can be completed by the end of system requirements, the release candidate list and the new CRs will be prioritized by CLECs in accordance with the agreed upon Prioritization Process (see Section xx). If the requirements work effort for the late added CRs cannot be completed by the end of system requirements, the CR will not be eligible for the release and will be returned to the pool of CRs that are available for prioritization in the next OSS interface release.

5.2.2 ~~(AT&T Comment)~~ Packaging

At the conclusion of system requirements, Qwest will present packaging option(s) for implementing the release candidates. Packaging options are defined as different combinations of candidates proposed for continuing through the next stage of development. Packaging options may not exist for the release. ~~i.e.,~~ there may only be one straightforward set of candidates to continue working through the next stage of development. Options may be identified due to:

- affinities in candidates
- resource constraints which prevent some candidates from being implemented but allow others to be completed.

Qwest will provide an updated level estimate of the Level of Effort of each CR and the estimated total capacity of the release. If more than one option is presented, a vote will be held within 2 days after the meeting on the options. The option with the largest number of votes will continue through the design phase of the development cycle.

5.2.3 Design

Qwest engineers define the architectural and code changes required to complete the work associated with each candidate. The design work is completed on the candidates, which have been packaged.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

5.2.4 Commitment

After design, Qwest will present a final list of candidates which can be implemented. Qwest will provide an updated level estimate of the Level of Effort of each CR and the estimated total capacity of the release. These candidates become the committed candidates for the release.

5.2.5 Code & Test

Qwest engineers will perform the coding and testing by Qwest required to complete the work associated with the committed candidates. The code is developed and baselined before being delivered to system test. A system test plan (system test cases, costs, schedule, test environment, test data, etc.) is completed. The system is tested for meeting business and system requirements, certification is completed on the system readiness for production, and pre-final documentation is reviewed and baselined. If in the course of the code and test effort, Qwest determines that it cannot complete the work required to include a candidate in the planned release, Qwest will ~~(AT&T Comment)~~ discuss options with the CLECs in the next CMP meeting. ~~(AT&T Comment)~~ Options can include either the removal of that candidate from the list ~~(AT&T Comment)~~ or a delay postponement in the release date to incorporate that candidate. If the candidate is removed from the list, Qwest will also advise the CLECs whether or not the candidate could become a candidate for the next point release, with appropriate disclosure as part of the current major release of the OSS interface. Alternatively, the candidate will be returned to the pool of CRs that are available for prioritization in the next OSS interface release.

5.2.6 Deployment

During this phase Qwest representatives from the business and operations review and agree the system is ready for full deployment. The release is deployed and production support initiated and conducted.

~~(this is redundant) (move to section on business and system requirements) (this is all addressed in the above development milestones) (moved to the Business and System Requirements section above)~~

~~(this was moved into the code and test description)~~ During any phase of the lifecycle, a candidate may be requested to be removed by the requesting CLEC. If that occurs, the candidate will be discussed at the next CMP meeting or in a special emergency meeting, if required. The candidate will only be removed from further phases of development if there is unanimous agreement by the CLECs and Qwest at that meeting.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

When Qwest has completed development of the OSS interface change, Qwest will release the OSS interface functionality into production for use by the CLECs.

Upon implementation of the OSS interface release, the CRs will be presented for closure at the next CMP monthly meeting.

3.253.3 CLEC Product/Process Change Request Initiation Process

If a CLEC wants Qwest to change a Product/Process the CLEC e-mails a completed Change Request (CR) Form to the Qwest Product/Process CMP Manager. Within 2 business days Qwest's Product/Process CMP Manager reviews CR for completeness, and requests additional information from the CR originator, if necessary, within two (2) business days after Qwest receives a complete CR:

- The Qwest CMP manager assigns a CR Number and logs the CR into the CMP Database.
- The Qwest CMP Manager forwards the CR to the CMP Group Manager,
- The Qwest CMP manager sends acknowledgment of receipt to the CR submitter and updates the CMP Database.

Within two (2) business days after acknowledgement:

- The Qwest CMP Manager posts the complete CR to the CMP Web site
- The CMP Group Manager assigns a Change Request Project Manager (CRPM) and identifies the appropriate Director responsible for the CR.
- The CRPM obtains from the Director the names of the assigned Subject Matter Expert(s) (SME).
- the CRPM will provide a copy of the detailed CR report to the CR originator which includes the following information:
 - Description of CR
 - originating CLEC
 - assigned CRPM contact information
 - assigned CR number
 - designated Qwest SMEs and associated director(s)
- Within eight (8) business days after receipt of a complete CR, the CRPM Coordinates and holds a Clarification Meeting with the Originating CLEC and Qwest's SMEs. If the originating CLEC is not available within the above specified time frame, then the clarification meeting will be held at a mutually agreed upon time. Qwest will not provide a response to a CR until a clarification meeting has been held.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- At the Clarification Meeting, Qwest and the Originating CLEC review the submitted CR, validate the intent of the Originating CLEC's CR, clarify all aspects, identify all questions to be answered, and determine deliverables to be produced. After the clarification meeting has been held, The CRPM will document and issue meeting minutes within five (5) business days. Qwest's SME will internally identify options and potential solutions to the CR.
- CRs received twenty one calendar days prior to the next scheduled CMP meeting will be presented at that CMP Meeting. CRs that are not submitted by the above specified cut-off date may be presented at that CMP meeting as a walk-on item with current status. The Originating CLEC will present its CR and provide any business reasons for the CR. Items or issues identified during the previously held Clarification Meeting will be relayed. Then, participating CLECs will be given the opportunity to comment on the CR and subsequent clarifications. Clarifications and/or modifications related to the CR will be incorporated. Qwest's SME will present options and potential solutions to the CR. consensus will be obtained from the participating CLECs as to the appropriate direction/solution for Qwest's SME to take in responding to the CR.
- Subsequently, Qwest will develop a draft response based on the discussion from the Monthly CMP Meeting. Qwest's Responses will be:
- "Accepted" (Qwest will implement the CLEC request) with position stated, or
- "Denied" (Qwest will not implement the CLEC request) with basis for the denial, including reference to substantiating material. CLEC-initiated OSS Interfaces change request may be denied for one or more of the following reasons.
 - Technologically not feasible—a technical solution is not available
 - Regulatory ruling/Legal implications—regulatory or legal reasons prohibit the change as requested, or if the request benefits some CLECs and negatively impact others (parity among CLECs) (Contrary to ICA provisions)
 - Outside the Scope of the Change Management Process—the request is not within the scope of the Change Management Process (as defined in this CMP), seeks adherence to existing procedures, or requests for information
 - Economically not feasible—low demand, cost prohibitive to implement the request, or both.
- ~~□ The requested change does not result in a reasonably demonstrable business benefit (to Qwest or the requesting CLEC) or customer service improvement. "Denied" (Qwest will not implement the CLEC request) with basis for the denial, in writing, including reference to substantiating material. CLEC-initiated OSS Interfaces and Product/Process change request may be denied for one or more of the following reasons. This list is not intended to be all inclusive.~~
- ~~□ Technologically not feasible—a technical solution is not available, or a solution is available but there would be major technological or process impacts to the CLECs and/or Qwest (+)~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- ☐ ~~Regulatory ruling/Legal implications—regulatory or legal reasons prohibit the change as requested, implementing the request may negatively impact a performance measurement (PID) (readdress after the impasse issue is resolved) incorporated into a performance assurance plan, or if the request benefits some CLECs and negatively impact others (parity among CLECs) (Contrary to ICA provisions) (+)~~
- ☐ ~~Qwest policy (**rename**)—the procedure is working, the requested change is not beneficial (more objective, less subjective) (-)~~
- ☐ ~~Outside the Scope of the Change Management Process—the request is not within the scope of the Change Management Process, requests for information (as defined in the Master Red-line document) (+)~~
- Economically not feasible—low demand, cost prohibitive to implement the request, or both. (+)
- ☐ ~~Duplicative Change Request—the request is covered by another Change Request~~
- Qwest will not deny a CR solely on the basis that the CR involves a change to the back-end systems.
- Qwest will apply these same concepts to CRs that they initiate.
- SCRIP may be invoked if a CR was denied due to Economically not feasible.
- At least one (1) week prior to the next scheduled CMP meeting, The CRPM will have the response posted to the Web, added to CMP Database, and will notify all CLECs via email

All Qwest Responses will be presented at the next scheduled CMP meeting by Qwest, who will conduct a walk through of the response. Participating CLECs will be provided the opportunity to discuss, clarify and comment on Qwest's Response

Based on the comments received from the Monthly Meeting, Qwest' may revise its response and issue a modified response at the next monthly CMP meeting. Within ten (10) business days after the CMP meeting, Qwest will notify the CLECs of Qwest's intent to modify its response.

If the CLECs do not accept Qwest's response, any CLEC can elect to escalate the CR in accordance with the agreed upon CMP Escalation or dispute resolution Procedures. If the originating CLEC does not agree with the determination to escalate or pursue the dispute resolution, it may withdraw its participation from the CR and any other CLEC may become responsible for pursuing the CR upon providing written notice to the Qwest CMP manager. Qwest will note in the status history of the interactive reports that the CR has been escalated. However, the CR status will reflect the stage of the CR as it progresses through the CR lifecycle.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note—Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

If the CLECs do not accept Qwest's response and do not intend to escalate or dispute at the present time, they may request Qwest to status the CR as deferred. The CR will be statused Deferred and CLECs may activate or close the CR at a later date.

The CLECs' acceptance of Qwest's response may result in:

- The response answered the CR and no further action is required;
- The response provided an implementation plan for a product or process to be developed;
- Qwest Denied the CLEC CR and no further action is required by CLEC.

If the CLECs have accepted Qwest's response, Qwest will provide notice of planned implementation in accordance with time frames defined in the CMP. If necessary, Qwest may request that CLECs provide input during the development stage. Qwest will then deploy the Qwest recommended implementation plan.

After Qwest's revised/new product or process is placed into production, CLECs will have no longer than 60 calendar days to evaluate the effectiveness of Qwest's revised/new product, or process, provide feedback, and indicate whether further action is required. Continual process improvement will be maintained.

Finally, the CR will be closed when CLECs determine that no further action is required for that CR.

5.4 Qwest Initiated Product/Process Changes

The following defines ~~four~~ five levels of Qwest-initiated product/process changes and the process by which Qwest will initiate and implement these changes. None of the following shall be construed to supersede timelines or provisions mandated by federal or state regulatory authorities, certain CLEC facing websites (e.g., ICONN and Network Disclosures) or individual interconnection agreements. Each notice will state that it does not supercede individual interconnection agreements. The lists provided below are representations of changes and exhaustive/ finite, finite but may be modified by agreement of the parties will be modified as necessary. Qwest will utilize these lists when determining the disposition (e.g., Level 01-4) to which new changes should be categorized. The changes that go through these processes are not changes to system OSS Interfaces. Level 1-4 changes under this process will be tracked and differentiated by level in the History Log.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

3.1.15.4.1 Level 0 changes

Level 0 changes are defined as changes that do not change the meaning of documentation and do not alter CLEC operating procedures. Level 0 changes are effective immediately without notice.

Level 0 Change Categories are:

- Font and typeface changes (e.g., bold to un-bold or bold to italics)
- Capitalization
- Spelling corrections and typographical errors other than numbers that appear as part of an interval or timeframe.
- Hyphenation
- Acronym vs. non-acronym (e.g., inserting words to spell out an acronym)
- Symbols (e.g., changing bullets from circles to squares for consistency in document)
- Word changes from singular to plural (or vice versa) to correct grammar
- Punctuation
- Changing of a number to words (or vice versa)
- Changing a word to a synonym
- Contact personnel title changes where contact information does not change
- Alphabetize information
- Indenting (left/right/center justifying for consistency)
- Grammatical corrections (making a complete sentence out of a phrase)
- Corrections to apply consistency to product names (i.e., "PBX - Resale" changed to "Resale - PBX")
- Moving paragraphs/sentences within the same section of a document to improve readability
- Hyperlink corrections within documentation
- Remove unnecessary repetitive words in the same paragraph or short section.

For any change that Qwest considers a Level 0 change that does not specifically fit into one of the categories listed above, Qwest shall issue a Level 3 notification.

~~For any change that Qwest considers a Level 0 change that does not specifically fit into one of the categories listed above, Qwest will bring the type of change to the CMP Monthly Meeting for discussion.~~

5.4.1.1 Level 0 Process/Deliverables

For Level 0 changes, Qwest will not provide a notification, web change form, or history log to CLECs. Changes to the documentation will be updated and posted immediately.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

5.4.2 Level 1 changes

Level 1 changes are defined as changes that do not alter CLEC operating procedures or changes that are time critical corrections to a Qwest product or process. Time critical changes corrections may alter CLEC operating procedures, but only if such changes Qwest product or process have has first been implemented through the appropriate procedure level under CMP. for such changes. Level 1 changes are effective immediately upon notice. In the event the CLEC believes that its operating procedures are altered by the change, the CLEC will immediately notify the Qwest CMP manager by e-mail. Qwest will promptly respond to the CLEC and work to resolve the issue.

Level 1 Cchanges Ccategoriesinclude are:

- Time Critical Corrections to information that adversely impacts CLECs ability to conduct business with Qwest
- Corrections/clarifications/additional information that does not change the product or process
- Correction to synch up related PCAT documentation with the primary PCAT documentation that was modified through a higher level change (notice needs to include reference to primary PCAT documentation)
- Document corrections to synch up with existing OSS Interfaces documentation (notice needs to include reference to OSS Interfaces documentation)
- Process options with no mandatory deadline, that do not supercede the existing processes and that do not impose charges, regardless of whether the CLEC exercises the option
- Modifications to Frequently Asked Questions that do not change the existing product or process
- Re-notifications issued within 6 months after initial notification (notice will include reference to date of initial notification or, if not available, reference to existing PCAT)
- Regulatory Orders that mandate a Product/Process change to be effective in less than 21 days
- Training information (note: if a class is cancelled, notification is provided 2 weeks in advance)
- URL changes with redirect link

For any change that Qwest considers a Level 1 change that does not specifically fit into one of the categories listed above, Qwest shall issue a Level 3 notification.

3.1.4.15.4.21.1 Level 1 Process/Deliverables

For Level 1 changes, Qwest will provide a notification to CLECs. Level 1 notifications will state the disposition (e.g. Level 1), description of change, changes are effective immediately, that there is no comment cycle and will advise CLECs to contact the CMP Manager, by email at

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

cmpcr@qwest.com, –immediately if the change alters the CLECs’ operating procedures and requires Qwest’s assistance to resolve. –Qwest will promptly respond to the CLEC and work to resolve the issue. In addition, Qwest will provide the following for PCAT and NonFCC Technical Publication (“Tech Pub”) changes:

- A web notification form that includes an exact cut and paste of the changes highlighted in green (PCAT) or redlined (Technical Publications). If necessary, additional text above and below the changes will be provided for context.
- A history log that tracks the changes

~~Note: For typo corrections, grammar corrections, and product branding changes to PCATs and NonFCC Tech Pubs notifications, web change forms will not be provided. The changes will be documented in the history log for the document to which the changes were made.~~

5.4.23 Level 2 changes

Level 2 changes are defined as changes that have minimal effect on CLEC operating procedures. Qwest will provide notice of Level 2 changes at least 21 calendar days prior to implementation.

Level 2 Cehanges Ceategoriesinclude are:

- Contact Information updates excluding time critical corrections (includes email, fax, TN, personnel changes)
- Changes to a form that do not introduce changes to the underlying process
- Changes to eliminate/replace existing Web functionality will be available for 21 days until comments are addressed. (either a demo or screen shot presentation will be available at the time of the notification for evaluation during the 21 day cycle.)~~New URL is implemented in parallel with existing; includes reference to existing and vice versa.)~~
- Removal of data stored under an archive URL
- Elimination of a URL re-direct
- Addition of new Web functionality (e.g., CNLA) ~~either a demo or screen shot presentation will be available at the time of the notification for evaluation during the 21 day cycle.)~~
- Re-notifications issued 6 months or more after the initial notification (notice will include reference to date of initial notification or, if not available, reference to existing PCAT)
- Documentation concerning existing processes/products not previously documented
- Changes to manually generated notifications normally transmitted to CLECs through their OSS interfaces that are made to standardize or clarify, but do not change the reasons for, such notifications.
- LSOG/PCAT documentation changes associated with new OSS Interface release documentation resulting from an OSS interface CR

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note–Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- Reduction to an interval in Qwest's SIG

For any change that Qwest considers a Level 2 change that does not specifically fit into one of the categories listed above, Qwest shall issue a Level 3 notification.

3.1.1.25.4.23.1 Level 2 Process/Deliverables

For Level 2 changes, Qwest will provide a notice to CLECs. Level 2 notifications will state the disposition (e.g. level 2), description of change, proposed implementation date, and CLEC/Qwest comment cycle timeframes. In addition to the notice, any documentation changes required to PCATs and Non-FCC Tech Pubs (red-line for Tech Pubs and green highlights for PCATs) will be available for review in the Document Review section of the CMP Website (<http://www.qwest.com/wholesale/cmp/review.html>), commonly known as the document review site. In the document review site, a comment button will be available next to the document to allow CLECs to provide comments. For Level 2 changes that do not impact PCATs or NonFCC Tech Pubs, a comments link will be provided within the notification for comments.

Qwest must provide initial notice of Level 2 changes at least 21 calendar days prior to implementation and adhere to the following comment cycle:

- CLECs have 7 calendar days following initial notification of the change to provide written comments on the notice
- Qwest will reply to CLEC comments no later than 7 calendar days following the CLEC cut-off for comments. The Qwest reply will also include confirmation of the implementation date.
- Qwest will implement no sooner than 21 calendar days from the initial notification.

CLECs may provide General comments regarding the change (e.g., clarification, request for modification, request to change the disposition level). Comments must be provided during the comments cycle as outlined for level 2 changes.

If a CLEC requests to change the disposition level, CLECs and Qwest will discuss such requests at the next monthly Product/Process CMP meeting. In the event that timing doesn't allow for discussion at the upcoming CMP meeting Qwest will call a special ad hoc meeting to address the request. If the parties are not able to reach consensus on any such request, CLECs and Qwest will take a vote of the parties in attendance at the meeting. The result will be determined by the majority. If the disposition Level of a change is modified, from the date of the modification forward such change will proceed under the modified Level with notifications and timelines agreed to by the participants.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

For general comments, Qwest will respond to comments and provide a final notice of the change. Additionally, Qwest will provide documentation of proposed changes to Qwest PCATs and NonFCC Tech Pubs available to CLECs and implement the change(s) according to the timeframes put forth above. If there are no CLEC comments, a final notice will not be provided and the changes will be effective according to the date provided in the original notification.

If the CLECs do not accept Qwest's response, any CLEC may elect to escalate or pursue dispute resolution in accordance with the agreed upon CMP Escalation or Dispute Resolution procedures.

5.4.34 Level 3 changes

Level 3 changes are defined as changes that have moderate effect on CLEC operating procedures and require more lead-time before implementation than Level 2 changes. Qwest will provide initial notice of Level 3 changes at least 31 calendar days prior to implementation.

Level 3 changes-Change Categoriesinclude are:

- NC/NCI code changes
- Adding of new features to existing products (excluding resale)
- Customer-facing Center hours and holiday schedule changes
- Modify/change existing manual process
- Expanding the availability and applicability or functionality of an existing product or existing feature (excluding resale)
- Regulatory Orders that mandate a Product/Process change to be effective in 21 days or more

3.1.1.3For any change that Qwest considers a Level 3 change that does not specifically fit into one of the categories listed above, Qwest shall issue a Level 3 notification.

3.1.1.35.4.34.1 Level 3 Process/Deliverables

For Level 3 changes, Qwest will provide a notice to CLECs. Level 3 notifications will state the disposition (e.g. level 3), description of change, proposed implementation date, and CLEC/Qwest comment cycle timeframes. Level 3 notifications will only include Level 3 Changes, excluding notification of changes to Tech Pubs. For Level 3 notifications that Qwest believes represent a new change category under Level 0, Level 1, Level 2, Level 3, or Level 4, Qwest should propose such new change category in the notice and CLECs and Qwest will discuss the proposal in the next monthly Product & Process CMP meeting. In addition to the

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

notice, any documentation changes required to PCATs and Non-FCC Tech Pubs (red-line for Tech Pubs and green highlights for PCATs) will be available for review in the Document Review section of the CMP Website (<http://www.qwest.com/wholesale/cmp/review.html>), commonly known as the document review site. –In the document review site, a comment button will be available next to the document to allow CLECs to provide written comments. For Level 3 changes that do not impact PCATs or Non-FCC Tech pubs, a link will be provided within the notification for comments.

Qwest will provide initial notice of Level 3 changes at least 31 calendar days prior to implementation and adhere to the following comment cycle:

- CLECs have 15 calendar days following initial notification of the change to provide written comments on the notice
- Qwest will reply to CLEC comments no later than 15 calendar days following the CLEC cut-off for comments. The Qwest reply will also include confirmation of the implementation date. In the event there are extenuating circumstances, (e.g. requested change requires significant research, information is required from national standards body or industry (e.g. Telcordia)), Qwest's response will indicate the course of action Qwest is taking and Qwest will provide additional information when available. Once the information is available Qwest will provide a notification and any available updated documentation (e.g. Tech Pubs, PCATs) at least 15 calendar days prior to implementation.
- Qwest will implement no sooner than 15 calendar days after providing the response to CLEC comments. For example, if there are no CLEC comments, Qwest may send out a final notification on the first day following the CLEC cut-off for comments (day 16 after the initial notification). Thus, implementation would be 31 days from the initial notification. However, if Qwest does not respond to the CLEC comments until the 15th day after the CLEC cut-off for comments, the earliest possible implementation date would be 45 calendar days from the initial notification.

CLEC comments must be provided during the comment cycle as outlined for Level 3 changes. Comments may be one of the following:

- General comments regarding the change (e.g., clarification, request for modification)
- Request to change disposition of Level. If the request is for a change to Level 4, the request must include substantive information to warrant a change in disposition to level 4 (e.g. business need, financial impact).
- Request to change disposition to a Level 0, Level 1 or Level 2 doesn't have to include substantive information to warrant a change.
- Request for stay or delay postponement of implementation date, or effective date

For general comments, Qwest will respond to comments and provide a final notice of the change. Additionally, Qwest will provide documentation of proposed changes to Qwest PCATs

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

and Non_FCC Tech Pubs available to CLECs and implement the change(s) according to the timeframes put forth above.

~~CLECs and Qwest will discuss For a requests to change the disposition Level of noticed changes, or to establish new change categories under Levels 0 – 4, at the next monthly Product & Process CMP meeting. In the event that the parties are not able to reach consensus on any such request, CLECs and Qwest will take a vote of the parties in attendance at the meeting. The result will be determined by the majority. If the disposition Level of a change is modified, from the date of the modification forward such change will proceed under the modified Level with notifications and timelines agreed to by the participants. Except that, within five (5) business days after the disposition level is changed to a Level 1, Qwest will provide a Level 1 notification. When a change to the disposition Level of a particular notice also suggests that a new category of change be established under one of the Levels, a separate vote shall be taken for each. consider the request and supporting information, and respond within the timeframes put forth above. If Qwest accepts the request to change the disposition (e.g., upgrade to level 4), Qwest's response to comments will indicate change in the disposition and be moved into the Level 4 procedures. In some circumstances it may be beneficial for Qwest and the parties to complete the Level 3 deliverable, with a written comments committing to a follow-up Level 4 effort to enhance or revise the Level 3 implementation.~~

~~For a request to stay or delay for postponement, Qwest will follow the procedures as outlined in Section 4-XX of this document.~~

If the CLECs do not accept Qwest's response, any CLEC may elect to escalate or pursue dispute resolution in accordance with the agreed upon CMP Escalation or Dispute Resolution procedures.

5.4.45 Level 4 Changes

Level 4 changes are defined as changes that have a major effect on existing CLEC operating procedures or that require the development of new procedures. Level 4 changes will be initiated using the CMP CR process and provide CLEC an opportunity to have input into the development of the change prior to implementation.

~~Level 4 changes~~ Change include Categories are:

- New products, features, services (excluding resale)
- Increase to an interval in Qwest's SIG
- Changes to CMP
- New PCAT/Tech Pub for new processes

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users ~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- New manual process
- Limiting the availability and applicability or functionality of an existing product or existing feature
- Addition of a required field on a form excluding mechanized forms that are changed through an OSS interface CR

For any change that Qwest considers a Level 4 change that does not specifically fit into one of the categories listed above, Qwest shall issue a Level 3 notification.

3.1.1.45.4.45.1 Level 4 Process/Deliverables

Qwest will submit a completed Change Request no later than 14 calendar days prior to the CMP Product and Process Monthly Meeting. -At a minimum, each Change Request will include the following information:

- A description of the proposed change
- A proposed implementation date (if known)
- Indication of the reason for change (e.g., regulatory mandate)
- Basis for disposition of level 4

Within two (2) business days from receipt of the CR:

- The Qwest CMP manager assigns a CR Number and logs the CR into the CMP Database.
- The Qwest CMP Manager forwards the CR to the CMP Group Manager,
- The Qwest CMP manager sends acknowledgment of receipt to the CR submitter and updates the CMP Database.

Within two (2) business days after acknowledgement,

- The Qwest CMP Manager posts the complete CR to the CMP Web site
- The CMP Group Manager assigns a Change Request Project Manager (CRPM) and identifies the appropriate Director responsible for the CR
- The CRPM identifies the CR subject matter expert (SME) and the SME's Director.
- The CRPM will provide a copy of the detailed CR report to the CR originator which includes the following information:
 - Description of CR
 - Assigned CRPM
 - Assigned CR number
 - Designated Qwest SME(s) and associated director(s)

Qwest will present the Change Request at the monthly Product and Process CMP meeting. The purpose of the presentation will be to:

- Clarify the proposal with the CLECs

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- Confirm the disposition (e.g., level 4) of the Change (see below). If during the CMP meeting CLECs agree to change the disposition, ~~than~~ then the type of change being made will be added to the list for the disposition to which it is changed.
- Propose suggested input approach (e.g., a 2 hour meeting, 4 meetings over a two week period, etc.), and obtain consensus for input approach.
- Confirm deadline, if change is mandated
- Provide proposed implementation date, if applicable

At the monthly CMP meeting, the parties will discuss whether to treat the Change Request as a Level 4 change. If the parties agree, the Change Request will be reclassified as a Level 0, 1, 2 or 3 change, and the change will follow the process set forth above for Level 0, 1, 2, or 3 changes, as applicable. If the parties do not agree to reclassify the Change Request as a Level 0, 1, 2 or 3 change, the following process will apply:

- The parties will develop a process for Qwest to obtain CLEC input into the proposed change. Examples of processes for input include, but are not limited to, one-day conferences, multi-day conferences, or written comment cycles.
- After completion of the input cycle, as defined during the CMP meeting, Qwest will modify the CR, if necessary, and design the solution considering all CLEC input.
- For Level 4 changes, when the solution is designed and all documentation is available for review, a notice of the planned change is provided to the CLECs. Level 4 notifications will only include Level 4 Changes, excluding notification of changes to Tech Pubs. This notice will be provided at least 31 calendar days prior to implementation. The notice will contain reference to the original CR, proposed implementation date, and the CLEC/Qwest comment cycle. In addition, any documentation changes required to PCATs and Non-FCC Tech Pubs will be available for review in the document review site (red-line for Tech Pubs and ~~Red-line for Tech Pubs~~ green highlighting for PCAT) with a Comment button available to provide written comments. For Level 4 changes that do not impact PCATs or NonFCC Tech Pubs, a comments link will be provided within the notification.
- CLECs have 15 calendar days following notification of the planned change to provide written comments on the notice
- Qwest will reply to CLEC comments no later than 15 calendar days following the CLEC cut-off for comments. The Qwest reply will also include confirmation of the implementation date. In the event there are extenuating circumstances, (e.g. requested change requires significant research, information is required from national standards body or industry (e.g. Telcordia)), Qwest's response will indicate the course of action Qwest is taking and Qwest will provide additional information when available. Once the information is available Qwest will provide a notification and any available updated documentation (e.g. Tech Pubs, PCATs) at least 15 calendar days prior to implementation.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users ~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

- Qwest will implement no sooner than 15 calendar days after providing the response to CLEC comments. For example, if there are no CLEC comments, Qwest may send out a final notification on the first day following the CLEC cut-off for comments (day 16 after the initial notification). Thus, implementation would be 31 days from the initial notification. However, if Qwest does not respond to the CLEC comments until the 15th day after the CLEC cut-off for comments, the earliest possible implementation date would be 45 calendar days from the initial notification.

CLEC comments must be provided during the comment cycle as outlined for Level 4. CLEC comments may be one of the following:

- General comments regarding the change (e.g., clarification, request for modification)
- Request for stay or delay/postponement of implementation, or effective date for which comments are being provided.

For general comments, Qwest will respond to comments and provide a final notice of the change. Additionally, Qwest will provide documentation of proposed changes to Qwest PCATs and NonFCC Tech Pubs available to CLECs and implement the change(s) according to the timeframes put forth above.

For a request to stay or delay/postponement, Qwest will follow the procedures as outlined in Section 4-XX of this document.

If the CLECs do not accept Qwest's response, any CLEC may elect to escalate the CR or pursue dispute resolution in accordance with the agreed upon CMP Escalation or Dispute Resolution procedures.

5.5 Crossover Change Requests

During the operation of the CMP, there may be situations when Systems CRs have requirements for Product/Process discussion or solution, or when Product/Process CRs require System solutions. These crossover CR situations exist in three basic categories.

Category A. If a CR submitted to the Product/Process CMP is discovered to require a mechanized solution the following will occur:

- A Qwest will open a Systems CR ~~will be opened with a reference to the Product/Process CR number;~~
- Qwest will close t~~The Product/Process CR will be closed with a reference to the new Systems CR number.~~
- This CR will comply with the CMP Systems CR process.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

Category B. If a CR submitted to the Systems CMP is discovered to require a manual solution the following will occur:

- Qwest will open a Product/Process CR will be opened with a reference to the Systems CR number;
- Qwest will close ~~the~~ Systems CR will be closed with a reference to the new Product/Process CR number.
- This CR will comply with the CMP Product/Process CR process.

Category C. If a CR submitted to the Systems CMP is discovered to require an interim manual solution, the CR will be tracked as a Systems CR for the length of the CR lifecycle including the development and implementation of both the interim manual and final mechanized solutions.

The determination to close and open CRs as described above will be made by the CMP body at a monthly CMP meeting.

If a CR becomes a crossover CR, Qwest may request an ad hoc Clarification Meeting with the CR submitter or request that a portion of the appropriate CMP Monthly Meeting be devoted to discussing the CR. If a CR is closed in one CMP arena and opened in the other, the new CR will retain the status, where feasible, and the date submitted of the old, "closed" CR. Under no circumstances will the CR be restarted.

All crossover CRs will be distinctly labeled in the CMP Monthly Meeting distribution packages and addressed as a separate item on the CMP Monthly Meeting agenda.

All Regulatory and Industry Guideline CRs will be submitted as Systems CRs and maintained in the Systems database until closure, or until they are deemed to require a manual process solution, at which point they will become Product/Process CRs.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

64.0 OSS INTERFACE RELEASE CALENDAR

Qwest will provide a rolling 12 month OSS Interface release calendar in the distribution package of the first scheduled CMP Systems Meeting of each quarter. The calendar will show release schedules for all OSS Interfaces within the scope of CMP starting in that quarter and for a total of 12 months in the future. The schedule entries will be made when applicable for application to application interfaces: include:

- Name of OSS Interface
- Date for CMP CR Submission Cutoff
- Date for issuing Draft Release Notes
- Date when Initial Notice for New Interfaces and Interface Retirements is will be issued: date when comparable functionality will be available.
- Date for issuing Initial or Draft Technical Specifications
- Comment cycle timeline
- Prioritization, packaging and commitment timeline, ~~if applicable~~
- Date for issuing Final Technical Specifications
- ~~Testing period, if applicable~~
- Date for issuing Final Release Notes
- Planned Implementation Date
- Release sunset dates

The release calendar will be posted on the CMP web site as a stand-alone document.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

74.0 INTRODUCTION OF A NEW OSS INTERFACE

The process for introducing a new interface will be part of the CMP. Introduction of a new OSS interface may include an application-to-application or a Graphical User Interface (GUI).

It is recognized that the planning cycle for a new interface, of any type, may be greater than the time originally allotted and that discussions between CLECs and Qwest may be held prior to the announcement of the new interface.

With a new interface, CLECs and Qwest may define the scope of functionality introduced as part of the OSS Interface.

74.1 Introduction of a New Application-to-Application Interface~~Release Planning~~

At least nine (9) months in advance of the target implementation date of a new application-to-application interface, Qwest will issue a Release Announcement, post the Preliminary Interface Implementation Plan on Qwest's web site, and may host a design and development meeting.
~~share the new interface plans via web site posting and CLEC notification.~~

74.1.1 Release Announcement

Where practicable, the Release Announcement and Preliminary Interface Implementation Plan will include: Qwest will share preliminary plans for the new interface, including:

- Proposed functionality of the interface including whether the interface will replace an existing interface
- Proposed ~~detailed~~ implementation time line (e.g., milestone dates, CLEC/provider Qwest comment cycle/response turnaround dates)
- Proposed meeting date to review the Preliminary Interface Implementation Plan
~~Provider constraints~~
- Exceptions to industry guidelines/standards, etc. if applicable
~~Proposed CLEC/provider meeting plans~~
~~Requirements~~
~~Design & Development~~
~~Connectivity and Firewall Rules~~
~~Test Planning~~
- Planned Implementation Date

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

~~Change Control~~**74.1.2** **4.2 CLEC Comments/Qwest Response Cycle and Preliminary Implementation Plan Review Meeting**

CLECs have fourteen (14) calendar days from the initial release announcement to provide written comments/questions on the documentation. Qwest will respond with written answers to all CLEC issues within twenty-one (21) calendar days of the Initial Release Announcement. Qwest will review these issues and its implementation schedule at the Preliminary Implementation Plan Review Meeting approximately twenty-eight (28) calendar days after the Initial Release Announcement.

74.1.3 ~~1.32~~ — **Initial Interface Technical Specifications**

Qwest will provide draft technical specifications at least one hundred twenty (120) calendar days prior to implementing the release unless the CMP Exception Process (see Section xx) has been invoked. In addition, Qwest will confirm the schedule for the walk-through of technical specifications, and CLEC comments, and Qwest response cycle.

74.1.4 ~~1.32.1~~ — **Initial Notification Content**

This notification will contain:

- Purpose
- Logistical information (including a conference line) for walk-through
- Reference to draft technical specifications, or web site
- Additional pertinent material
- CLEC Comment/Qwest Response cycle
- Draft Connectivity and Firewall Rules
- Draft Test Plan

74.1.5 ~~1.43~~ — **Walk Through of Draft Interface Technical Specifications**

Qwest will sponsor a walk through, including the appropriate internal subject matter experts (SMEs), beginning one-hundred and ten (110) calendar days prior to implementation and ending one-hundred and six (106) calendar days prior to implementation. A walk through will afford CLEC SMEs the opportunity to ask questions and discuss specific requirements with Qwest's technical team. CLECs are encouraged to invite their technical experts, systems architects, and designers, to attend the walk through.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note—Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

74.1.6 1.43.1 Conduct Walk-through

Qwest will lead the review of technical specifications. Qwest technical experts will answer the CLEC SMEs' questions. Qwest will capture action items such as requests for further clarification. Qwest will follow-up on all action items. and notify CLECs of responses 100 calendar days prior to implementation.

74.1.7 1.54 CLEC's Comments on Draft Interface Technical Specifications

If the CLEC identifies issues or requires clarification, the CLEC must send a written response comments/concerns to the Systems CMP Manager no later than one-hundred and four (104) calendar days prior to implementation.

74.1.8 1.65 QwestWEST Response to Comments

Qwest will review and respond with written answers to all CLEC issues, comments/concerns and action items captured at the walk through, no later than one hundred (100) calendar days prior to implementation. The answers will be shared with all CLECs, unless the CLECs question(s) are marked proprietary. Any changes that may occur as a result of the responses will be distributed to all CLECs in the final notification letter. The notification will include the description of any change(s) made as a result of CLEC comments. The change(s) will be reflected in the final technical specifications.

74.1.9 1.76 Final Interface Technical Specifications

Generally, no less than one hundred (100) calendar days prior to the implementation of the new interface, Qwest will issue the Final Release Requirements to CLECs via web site posting and a CLEC notification.

Final Release Requirements will include:

Detailed requirements

Connectivity and Firewall Rules

Test Plan

- Final Notification Letter, including:
 - Summary of changes from Qwest response to CLEC comments on Draft Technical Specifications
 - If applicable, Indication of type of change (e.g., documentation change, business rule change, clarification change)
 - Purpose
 - Reference to final technical specifications, or web site

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- Additional pertinent material
- Final Connectivity and Firewall Rules
- Final Test Plan (including Joint Testing Period)
- Release date

1.7 Content of Final Notification Letter

The Final Release will include the following:

Summary of changes from Qwest response to comments

Indication of type of change (e.g., documentation change, business rule change, clarification change)

Changed requirements pages from initial notice, or reference to web site for final technical specifications

Testing period

Release date

Qwest's planned implementation date will not be sooner than one hundred (100) calendar days from the date of the final release requirements, unless the exception process has been invoked. The implementation time line for the release will not begin until final specifications are provided. Production Support type Emergency changes within the thirty (30) calendar day test window can occur without advance notification but will be posted within 24 hours of the change.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

II.1.2 CLEC and Qwest Comments/Responses/Comments

~~Upon review of the preliminary plans for the interface if the CLEC wishes to provide feedback the CLEC must send a written response to Qwest. These responses must be provided no later than seven (7) calendar days prior to the first scheduled meeting. The CLEC's response will specify the CLEC's questions, issues and any alternative recommendations.~~

~~CLECs may provide feedback to Qwest during CLEC/provider meetings. Additional CLEC feedback may be provided in accordance with the dates outlined in the detailed implementation time line.~~

III. Provider Responses/Comments

~~Qwest will maintain both a proprietary and non-proprietary issue log containing CLEC comments and Qwest responses. This non-proprietary issue log will be posted to Qwest's web site upon receipt of CLEC feedback. Qwest will respond to the CLEC feedback in accordance with the dates outlined in the detailed implementation time line. Qwest will also communicate its base line interface development plans via web site posting and CLEC notification in accordance with the dates outlined in the detailed implementation time line.~~

IV.1.4 Final Release Requirements Announcement

~~CLECs via web site posting and a carrier CLEC notification.~~

74.2 Introduction of a New GUI

~~Qwest will issue a Release Notification forty-five (45) calendar days in advance of the Release Production Date. This will include:~~

- ~~• Proposed functionality of the interface including whether the new interface will replace an existing interface.~~
- ~~• Implementation time line (e.g., milestone dates, CLEC/Qwest comment cycle, Interface overview date)~~
- ~~• Implementation date~~
- ~~• Logistics for GUI Interface Overview~~

~~At least twenty-eight (six (28) 26) calendar days in advance of the target implementation date of a new GUI interface, Qwest will issue a Release Announcement, post the Interface Overview~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

on Qwest's web site and may host a design and development meeting. At a minimum, the Release Announcement will include:

- Draft User Guide
- Proposed functionality of the interface
- Implementation time line (e.g., milestone dates, CLEC/Qwest comment cycle)

Proposed CLEC/Qwest meeting to review the Interface Overview.

Initial CLEC implementation requirements (e.g., hardware, software, connectivity, firewall rules, etc.)

- How and When Training will be administered

Implementation date

74.2.1 II.1 Interface Overview

The Interface Overview meeting should be held no later than twenty-seven (27) calendar days prior to the Release Production Date. At the meeting, Qwest will present an overview of the new interface.

74.2.2 II.21 CLEC Comments and Qwest Response

At least twenty-five (25) No more than four (4) calendar days prior to the Release Production Date following the Release Announcement CLECs must forward their written comments and concerns questions to Qwest. Qwest will consider ~~clec~~CLEC comments and may address them Qwest will respond to CLEC comments with the release of the Final Notification. at the Interface Overview Meeting.

II.2 Interface Overview

The first scheduled meeting should be held no less than seven (7) calendar days following Qwest's notice issuance. At the meeting, Qwest will share an overview of the new interface, including:

Response to CLEC Comments

Proposed implementation timeline

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

74.2.3 ~~11.3~~ Final Notification

Qwest will issue a final notice no less than twenty-one (21) calendar 14 days prior to the Release Production implementation date. The final notice will include:

- A summary of changes from the initial notice, including type of changes (e.g., documentation change, clarification, business rule change).
- Final User Guide
- Final Training information
- Final Implementation date.

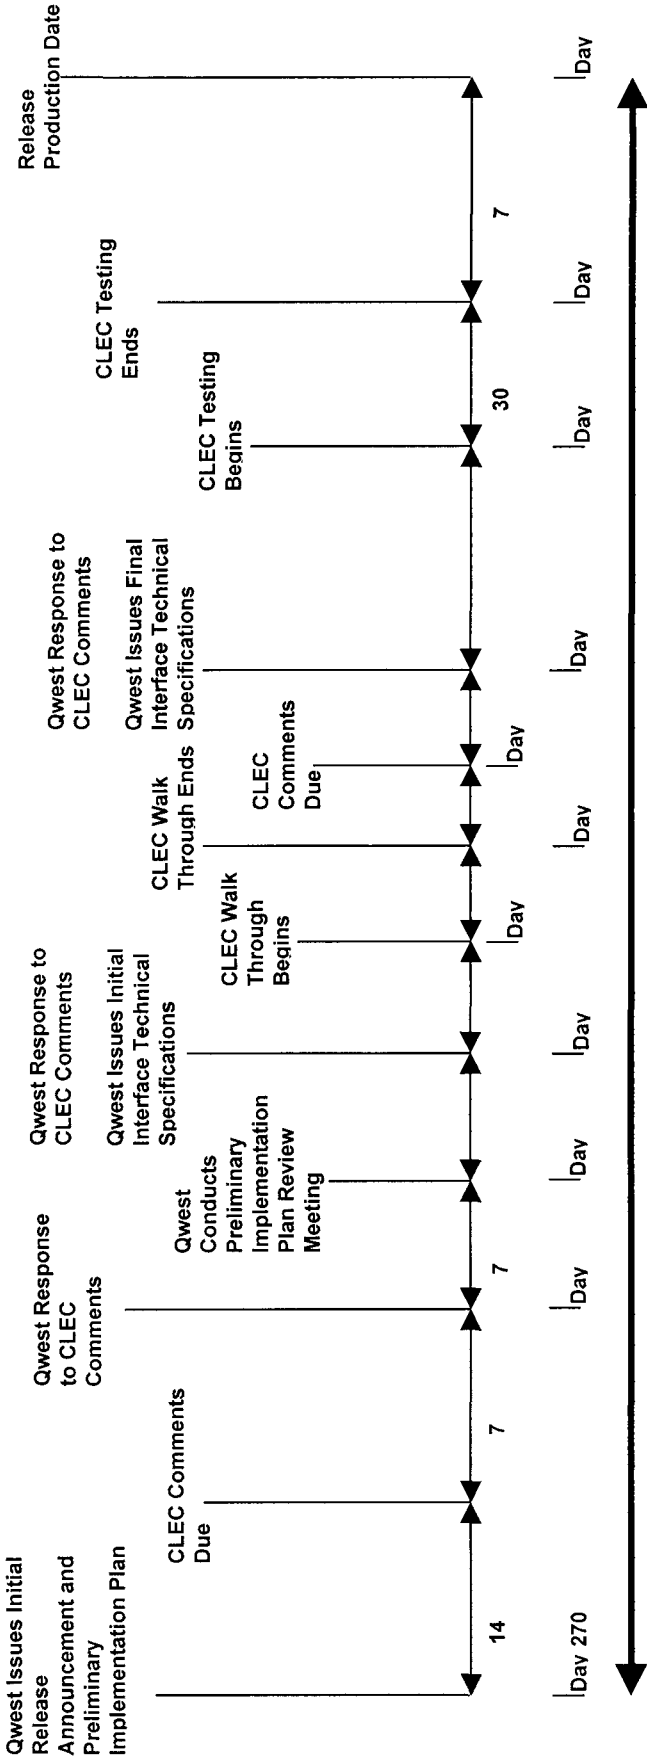

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

Qwest-CLEC Change Management Process

Introduction of A New Application-to-Application OSS Interface

9 Month Timeline (Approximately)

The events listed above are intended to occur on business days. If the date on which any event is scheduled to occur falls on a weekend or holiday, then Qwest and the CLECs may negotiate a revised timeline.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users ~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

Qwest-CLEC Change Management Process Introduction of A New Graphical User Interface (GUI) Timeline

45 Day Timeline

The events listed above are intended to occur on business days. If the date on which any event is scheduled to occur falls on a weekend or holiday, then Qwest and the CLECs may negotiate a revised timeline.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

~~QWEST'S PROPOSED CHANGES TO EXISTING OSS INTERFACES~~
~~LANGUAGE 10-09-01~~ REVISED 10-16-01 10-30-01

85.0 CHANGE TO EXISTING OSS INTERFACES

~~Pre-order, Order application to application Change Process (Action item#)~~

~~As part of its development view, Qwest will prepare a preliminary package of the required changes and will share these plans at scheduled change management meetings. At the first cmpCMP systems monthly meeting of each quarter, Qwest will also provide a rolling twelve (12) month view of its ossOSS interface development schedule.~~

~~Qwest standard operating practice is to implement 3 major releases and 3 point releases (for IMA only) within a calendar year. Unless mandated as a Regulatory Change, Qwest will implement no more than four (4) releases per IMA OSS Interface {AT&T to check – action item} requiring coding changes to the CLEC interfaces within a calendar year. The Major release changes should occur no less than three (3) months apart.~~

Application-to-Application OSS Interface

~~Qwest should make available two (2) versions of an interface between the sunrise and sunset dates. Qwest will support the previous major linterconnect Mmediated Aaccess (imaIMA) ima EDI release for six (6) months after the subsequent major ima-edilMA EDI release has been implemented. Past versionReleases of ima-edilMA EDI will only be modified as a result of production support changes. When such production support changes are made, Qwest will also modify the related documentation. Will be implemented in past versions of ima edi. All other changes become candidates for future ima-edilMA EDI releases.~~

~~Qwest makes one versionRelease of the Eelectronic Bbonding-Ttrouble Aadministration (ebtaEBTA) and billing interfaces available at any given time, and will not support any previous versionReleases.~~

~~Unless mandated, Qwest will implement no more than four (4) releases requiring coding changes to the CLEC interfaces within a calendar year. These changes should occur no less than three (3) months apart.~~

1.1. Versioning of TYPE 1 Changes

~~For TYPE 1 changes, the version number will not be incremented and will not cause the oldest dot version of the current version to be retired as a result of the implemented fix.~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

II.II. ~~Versioning of TYPE 2 Changes~~

~~For TYPE 2 changes that must occur between regularly scheduled releases, Qwest will not retire the oldest version in order to implement the TYPE 2 change. The TYPE 2 change will be implemented as either a dot release or a sub-dot release of all versions (except a retired version), unless the structure of the old version could not accommodate the TYPE 2 change or the old version is scheduled to be retired within the next six months.~~

~~If the TYPE 2 change results in an interface implementation, before applicable industry guidelines are finalized at the appropriate industry forums, dot release versioning is issued. An example of dot versioning of A PROVIDER'S QWEST'S LSOG Issue 5 implementation is V5.1.~~

~~If the TYPE 2 change results in an interface implementation that is in line with industry guidelines, sub-dot release versioning is issued. An example of sub-dot release of A PROVIDER'S QWEST'S LSOG Issue 5 implementation is V5.0.1.~~

~~TYPE 2 changes that occur at the time of a regularly scheduled release will be made in all versions (except a retired version). If the structure or intent of the old version cannot accommodate the change then, via the Prioritization process a joint PROVIDER QWEST/CLEC decision is made that the mandate should not be implemented in an old version.~~

III. ~~Versioning of TYPE 3 Changes~~

~~For TYPE 3 changes, the base version identity should follow the LSOG issue identity. For example, the first release of A PROVIDER'S QWEST'S LSOG Issue 5 implementation should be V5.0.~~

IV. ~~Versioning of TYPE 4 AND TYPE 5 Changes~~

~~TYPE 4 AND TYPE 5 changes will be implemented as a sub-dot release of all versions, unless the structure of the old version could not accommodate THE TYPE 4 OR TYPE 5 change.~~

~~If the TYPE 4 OR TYPE 5 change results in an interface implementation, before applicable industry guidelines are finalized at the appropriate industry forums, dot release versioning is issued. An example of dot versioning of A PROVIDER'S QWEST'S LSOG Issue 5 implementation is V5.1.~~

~~If the TYPE 4 OR TYPE 5 change results in an interface implementation that is in line with industry guidelines, sub-dot release versioning is issued. An example of sub-dot release of A PROVIDER'S QWEST'S LSOG Issue 5 implementation is V5.0.1.~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

Graphical User Interface (GUI)

Qwest makes one versionRelease of a guiGUI available at any given time and will not support any previous versionReleases.

VERSIONRELEASEVERSIONRELEASEVERSIONRELEASE

Interconnect mediated access (ima) ima-guiIMA GUI changes for a pre-order or ordering gui will be implemented at the same time as in conjunction with an IMA EDI release.

85.1 Requirements Review—Application-to-Application Interface

This section describes the timelines that Qwest, and any CLEC choosing to implement on the Qwest Release Production Date (date the Qwest release is available for use), will adhere to in changing existing interfaces. ³For any CLEC not choosing to implement on the Qwest Release Production Date, Qwest and the CLEC will negotiate a mutually agreed to CLEC implementation time line, including testing.

V.85.1.1 Draft Interface Release RequirementsTechnical Specifications

[make sure CR process and this process are linked properly in final document]

Prior to Qwest implementing a new interface or a change to an existing interface, Qwest will notify CLECs of the draft release requirementsTtechnical specificationsSpecifications.

Notification and confirmation time lines for TYPE 1 are determined on an individual case basis based on the severity of the problem.

Notifications for TYPE 2 changes are based on applicable law and / or regulatory rules.

TYPE 3time lines are based on CLEC / PROVIDER QWEST agreement in conjunction with the rollout of national guidelines, subject to any overriding regulatory obligations.

³ For a CLEC converting from a prior release, the CLEC implementation date can be no earlier than the weekend after the Qwest Release Production Date, if production LSR conversion is required.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end usersthat are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

~~Generally, a Type 4 and Type 5 change notification will occur at least 73 calendar days prior to implementing the change. Draft business rules / technical specifications will be produced and distributed to CLECs 66 calendar days prior to implementation. CLECs have fifteen (15) calendar days from the initial publication of draft documentation to provide comments / questions on the documentation. Change confirmation will occur 45 calendar days prior to implementation through publication of final business rules / technical specifications.~~

Qwest will provide draft technical specifications at least seventy-three (73) calendar days prior to implementing the release unless an exception has been granted process (see Section xx8.0) has been invoked. Technical specifications are documents that provide information the CLECs need to code the interface. CLECs have eighteen (185) calendar days from the initial publication of draft technical specifications to provide written comments/questions on the documentation.

~~For TYPE 4 OR TYPE 5 change requests more or less notification may be provided based on severity and the impact of the change. For example, Qwest can implement the change in less than 45 calendar days.~~

~~Documentation of new or revised error messages associated with Type 4 or Type 5 change requests will be provided no later than 30 calendar days prior to implementation date.~~

VI.85.1.2 Content of Draft Interface Release Requirements Technical Specifications

The Notification letter will contain:

- Written summary of change(s)
- Target time frame for implementation

Draft Technical Specifications documentation, or instructions on how to access the draft Technical Specifications documentation on the Web site. Any cross-reference to updated documentation such as the Users Guide. This type of documentation should also include a summary of changes made to the document.
DRAFT DOCUMENTATION, OR INSTRUCTIONS ON HOW TO ACCESS DOCUMENTATION ON THE WEB SITE.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users ~~that are provided to CLECs.~~

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

VII.85.1.3 Walk Through of Draft Interface Release Requirements Technical Specifications

~~If requested by one or more CLECs within fourteen (14) calendar days of receiving the initial Release Requirements, Qwest will sponsor a walk through with the appropriate internal subject matter experts. Qwest will hold this walk through no later than thirty (30) calendar days prior to the scheduled implementation. Qwest will sponsor a walk through, including the appropriate internal subject matter experts (SMEs), beginning sixty-eight (68) calendar days prior to implementation and ending no laterless than fifty-eight (58) calendar days prior to implementation. A walk through will afford CLEC SMEs the opportunity to ask questions and discuss specific requirements with Qwest's technical team. CLECs are encouraged to invite their technical experts, systems architects, and designers, to attend the walk through.~~

85.1.3.1 III.1 Walk through Notification Content

This notification will contain:

- Purpose
- Logistical information (including a conference line)
- Reference to draft technical specifications, or reference to a web site with draft specifications
- Additional pertinent material

85.1.3.2 III.2 Conduct the Walk-through

~~Qwest will lead the review of technical specifications and technical specifications. Qwest technical experts will answer the CLEC SMEs' questions. Qwest will capture action items such as requests for further clarification. Qwest will follow-up on all action items and notify CLECs of responses 45 calendar days prior to implementation.~~

VIII.85.1.4 CLEC's Comments on Draft Interface Release Requirements Technical Specifications

~~If the CLEC identifies issues or requires clarification, the CLEC must send written comments a written response to Qwest and the CLEC's Account Manager QWEST AND THE CLEC'S ACCOUNT the Ssystems CMP Manager no soonerlaterless -thant fifty-five (55)8 calendar days prior to implementation. Qwest must receive the CLEC's response seven (7) calendar days prior to the date of the Initial Release Requirements. The response will specify the CLEC's questions, issues and any other alternative recommendations for implementation.~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end usersthat are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

~~IX.85.1.5~~ ~~Qwest~~WEST Response to Comments

Qwest will review and respond with written answers to all CLEC issues, comments/concerns WITHIN SEVEN (7) no later less than forty-five (45) calendar days prior to implementation. The answers will be shared with all CLECs, unless the CLECs question(s) are marked proprietary. Any changes that may occur as a result of the responses will be distributed to all CLECs in the same notification letter. The notification will include the description of any change(s) made as a result of CLEC comments. The change(s) will be reflected in the final technical specifications.

~~X.85.1.6~~ ~~Final Interface Release Requirements~~Technical Specifications

The notification letter resulting from the CLEC's response comments from the Initial Release Notification will constitute the Final Release Requirements Technical Specifications. After the Final Technical Specifications are published, there may be other changes made to documentation or the coding that is documented in the form of addenda. The following is a high level overview of the current disclosure, release and addendum process:

- Draft Developer Worksheets -- 45 days prior to a release the draft Developer Worksheets are made available to the CLEC's.
- Final Disclosure – 5 weeks prior to a release the Final Disclosure documents, including I charts and developer worksheets are made available to the CLECs.
- Release Day – On release day only those CLECs using the IMA GUI are required to cut over to the new release.
- 1st Addendum – 2 weeks after the release the 1st addendum is sent to the CLECs.
- Subsequent Addendum's – Subsequent addendum's are sent to the CLECs after the release as needed. There is no current process and timeline.
- EDI CLECs – 6 months after the release those CLECs using EDI are required to cut over to the new release. CLECs are not required to support all new releases.

~~XI.85.1.7~~ ~~Content of Final Interface Release Requirements~~Notification Letter

In addition to the content of interface initial release requirements, the Final Release will include the following:

- Reference to Final Technical Specifications, or web site
- Summary of changes from Qwest response to commentsQwest response to CLEC comments
- Summary of changes from the prior release, including any changes made as a result of CLEC comments on Draft Technical Specifications
- Indication of type of change (e.g., documentation change, business rule change, clarification change)

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

☐ ~~Changed requirements pages~~

- Final Joint Test Plan including transactions which have changed
- Joint Testing Period ~~JOINT TESTING PERIOD~~
- Release date

☐ ~~Interval before implementation of release~~

Qwest's planned implementation date will ~~not be at least sooner than~~ at least ~~forty-five (45) calendar days from the date of the final release requirements, unless the exception process has been invoked. Qwest will post notification to provider's web site to inform the CLECs of possible impact to CLEC ordering ability. Qwest will post this information forty-five (45) calendar days prior to the scheduled implementation of such changes, if possible, but not less than thirty (30) calendar days prior to implementation. The implementation time line for the release will not begin until all related documentation is final specifications are provided. Production Support type of Emergency changes that occur within the thirty (30) calendar day test window can that occur without advance notification but will be posted within 24 hours of the change.~~

85.1.8 Joint Testing Period

Qwest will provide a thirty (30)- day test window for any CLEC who desires to jointly test with Qwest prior to the Release Production Date.

85.2 Requirements Review—Graphical User Interface (GUI)

85.2.1 Draft GUI Release Notice

Prior to implementation of ~~of a new interface or a change to an existing interface~~, Qwest will notify CLECs of the draft release notes and the planned implementation date.

Notification will occur at least ~~twenty-one~~eight (218) calendar days prior to implementing the release unless an exception process ~~has been invoked~~granted. This notification ~~may~~will include draft user guide information if necessary.

CLECs must ~~may~~ provide comments/questions on the documentation no ~~later~~less than ~~47~~twenty-five (25) calendar days prior to implementation.

Final notice for the release will be published at least ~~twenty-one~~fifteen (2115) calendar days prior to production release date ~~implementation~~.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note—Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

85.2.2 Content of Draft Interface Release Notice

The notification will contain:

- Written summary of change(s)
- Target time frame for implementation
- Any cross-reference to draft documentation such as the user guide or revised user guide pages.

~~In addition to the content of Interface Initial Release Requirements, the Final Release will include the following:~~

- ~~☐ Summary of changes from Qwest response to comments~~
- ~~☐ Indication of type of change (e.g., documentation change, business rule change, clarification change)~~
- ~~☐ Changed requirements pages~~
- ~~☐ Release date~~

~~Interval before implementation of release~~

85.2.3 CLEC Comments on Draft Interface Release Notice

Any CLEC comments must be submitted in writing to the Ssystems CMP Manager.

85.2.4 Qwest Response to Comments

Qwest will consider elecCLEC comments and may address them review and respond with written answers to all clec issues, comments and concerns regarding in the initial-final GUI release notice within fourtwo (42) calendar days after receipt of CLEC comments. The answers will be shared with all clocs, unless the clec question (s) are marked proprietary. Any changes that may occur as a result of the responses will be distributed to all clocs in the same final notification letter.

FINAL INTERFACE RELEASE NOTICE

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

THE FINAL NOTIFICATION LETTER WILL CONSTITUTE THE FINAL RELEASE NOTICE.

85.2.5 Content of Final Interface release Notice

CLEC comments to the draft notice may be incorporated into the final notice, which shall include:

- Final notification letter
- Summary of changes from draft interface release notice
- Final user guide (or revised pages)
- Release date

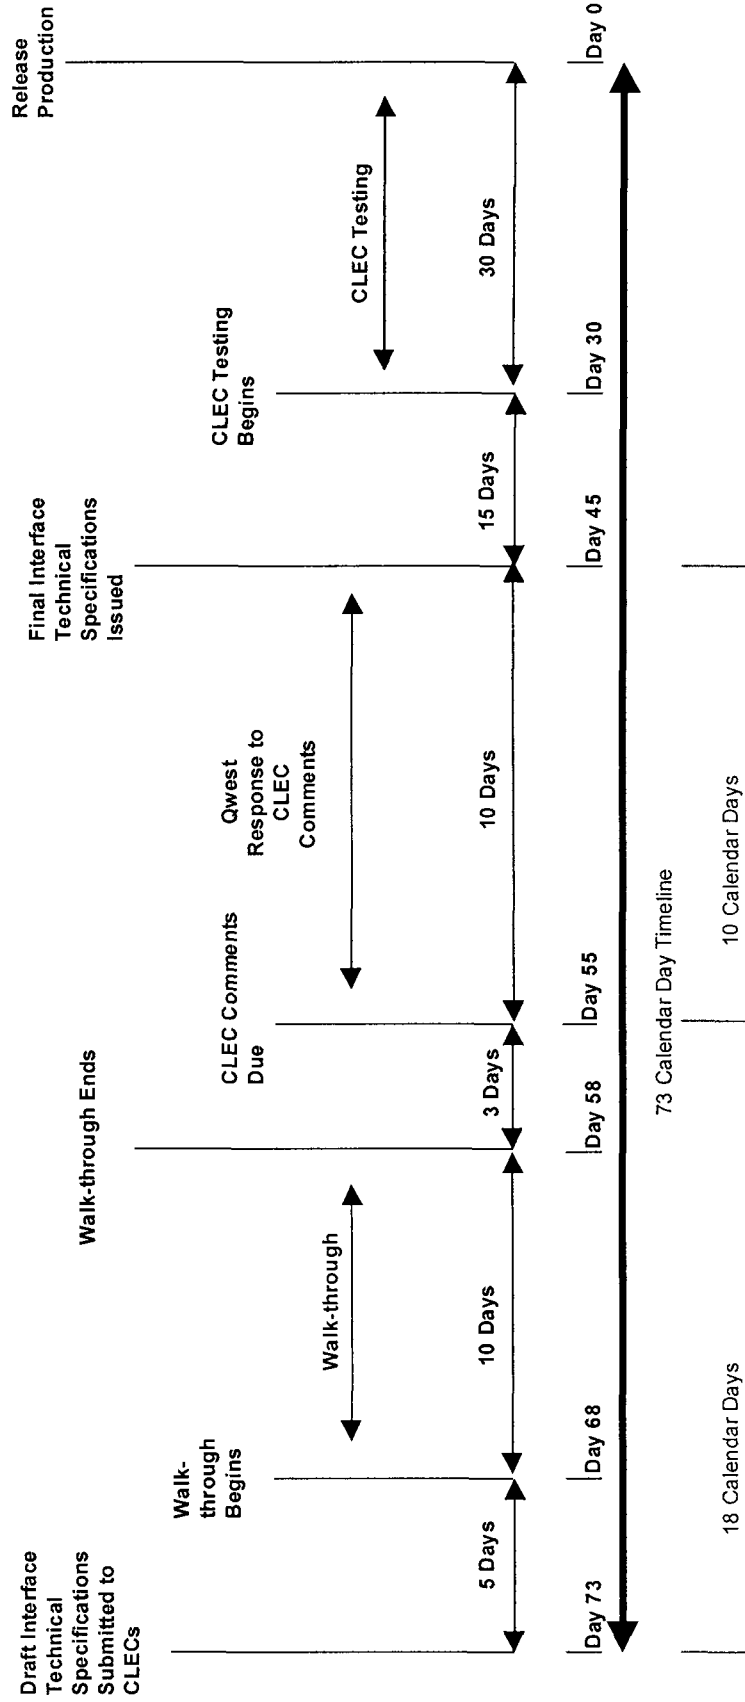

Qwest's planned implementation date will not be no later sooner than twenty-one fifteen (2115) calendar days from the date of the final release notice. Qwest will post this information on the CMP web site. Production support type emergency changes that occur without advance notification will be posted within 24 hours of the change. The implementation time line for the release will not begin until all related documentation is provided.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

Qwest-CLEC Change Management Process Changes to An Existing Application-to-Application OSS Interface Timeline

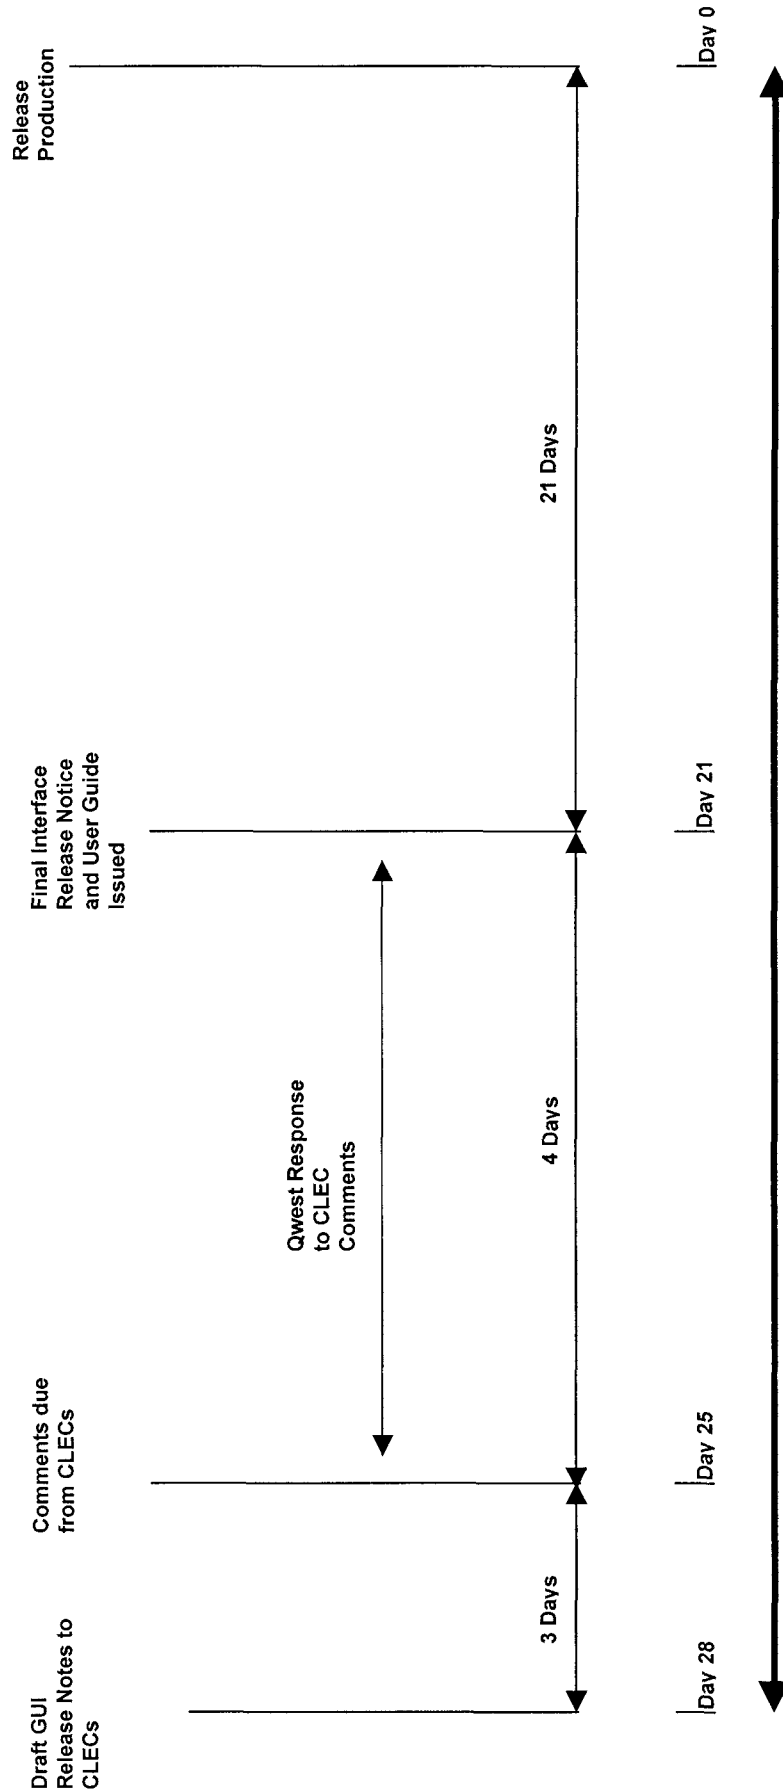

The events listed above are intended to occur on business days. If the date on which any event is scheduled to occur falls on a weekend or holiday, then Qwest and the CLECs may negotiate a revised timeline.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

Qwest-CLEC Change Management Process Changes to An Existing Graphic User Interface (GUI)

28 Calendar Day Timeline

The events listed above are intended to occur on business days. If the date on which any event is scheduled to occur falls on a weekend or holiday, then the event will be scheduled for the next business day.

¹ Throughout this document, **weeks** and **weeks** are used to indicate a period of time. The CLECs may negotiate a revision timeline to application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

96.0 QWEST PROPOSED CHANGES TO RETIREMENT OF EXISTING OSS INTERFACES

The retirement of an existing OSS Interface occurs when Qwest ceases to accept transactions using a specific OSS Interface. This may include the removal of a Graphical User Interface (GUI) or a protocol transmission of information (Application-to-Application) interface.

96.1 Application-to-Application OSS Interface

XVIII.96.1.1 Initial Retirement Plans

Application to Application Interface

At least nine (9) months before the retirement date of Application-to-Application interfaces, Qwest will share the retirement plans via web site posting and CLEC notification. The scheduled new interface is to be in a CLEC certified production release prior to the retirement of the older interface.

Alternatively, Qwest may choose to retire an interface if there is no CLEC usage of that interface for the most recent three (3) consecutive months. Qwest will provide thirty (30) calendar day notification of the retirement via web posting and CLEC notification.

XIX.96.1.2 Initial Retirement Notice to CLECs:

Initial Retirement Notices will include:

- The rationale for retiring the OSS Interface
- Available alternative interface options for existing functionality
- The proposed detailed retirement time line (e.g., milestone dates, CLEC-Qwest comment and response cycle)
- Targeted retirement date

96.1.3 CLEC Comments to Initial Retirement Notice

CLEC comments to the Initial Retirement Notice are due to Qwest no later than fifteen (15) calendar days following the Initial Retirement Notice.

96.1.4 Comparable Functionality

Unless otherwise agreed to by Qwest and a CLEC user, when Qwest announces the retirement of an interface for which a comparable interface does or will exist, a CLEC user will not be

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

permitted to commence building to the retiring interface. CLEC users of the retiring interface will be grandfathered until the retirement of the interface. Qwest will ensure that an interface with comparable functionality is available no less than six months prior to retirement of an Application-to-Application interface.

96.1.5 Final Retirement Notice

The Final Retirement Notice will be provided to CLECs no later than two-hundred and twenty-eight (228) calendar days prior to the retirement of the application-to-application interface. The Final Retirement Notice will contain:

- The rationale for retiring the OSS Interface (e.g., no usage or replacement)
- If applicable, where the replacement functionality will reside in a new interface and when the new interface has been certified by a CLEC
- Qwest's responses to CLECs' comments/concerns
- Actual retirement date

96.2 Graphical User Interface (GUI)

96.2.1 Initial Retirement Plans

At least two (2) months in advance of the target retirement date of a GUI,¹ Qwest will share the retirement plans via web site posting and CLEC notification. The scheduled new interface is to be in a CLEC certified production release prior to the retirement of the older interface.

Alternatively, Qwest may choose to retire an interface if there is no CLEC usage of that interface for the most recent three (3) consecutive months. Qwest will provide thirty (30) calendar day notification of the retirement via web posting and CLEC notification.

~~XXI~~ 96.2.2 Initial Retirement Notice to CLECs:

Initial Retirement Notices will include:

- The rationale for retiring the OSS Interface
- Available alternative interface options for existing functionality
- The proposed detailed retirement time line (e.g., milestone dates, CLEC-Qwest comment and response cycle)
- Targeted retirement date

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

96.2.3 CLEC Comments to Initial Retirement Notice

CLEC comments to the Initial Retirement Notice are due to Qwest no later than fifteen (15) calendar days following the Initial Retirement Notice.

69.2.4 Comparable Functionality

Qwest will ensure comparable functionality no less than thirty-one (31) days before retirement of a GUI.

96.2.5 Final Retirement Notice

The Final Retirement Notice, for GUI retirements, will be provided to CLECs no later than twenty-one (21) calendar days before the retirement date. The Final Retirement Notice will contain:

- The rationale for retiring the OSS Interface (e.g., no usage or replacement)
- If applicable, where the replacement functionality will reside in a new interface and when the new interface has been certified by a CLEC
- Qwest's responses to CLECs' comments/concerns
- Actual retirement date

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

Qwest-CLEC Change Management Process Retirement of An Existing Application-to-Application OSS Interface Timeline

9 Months

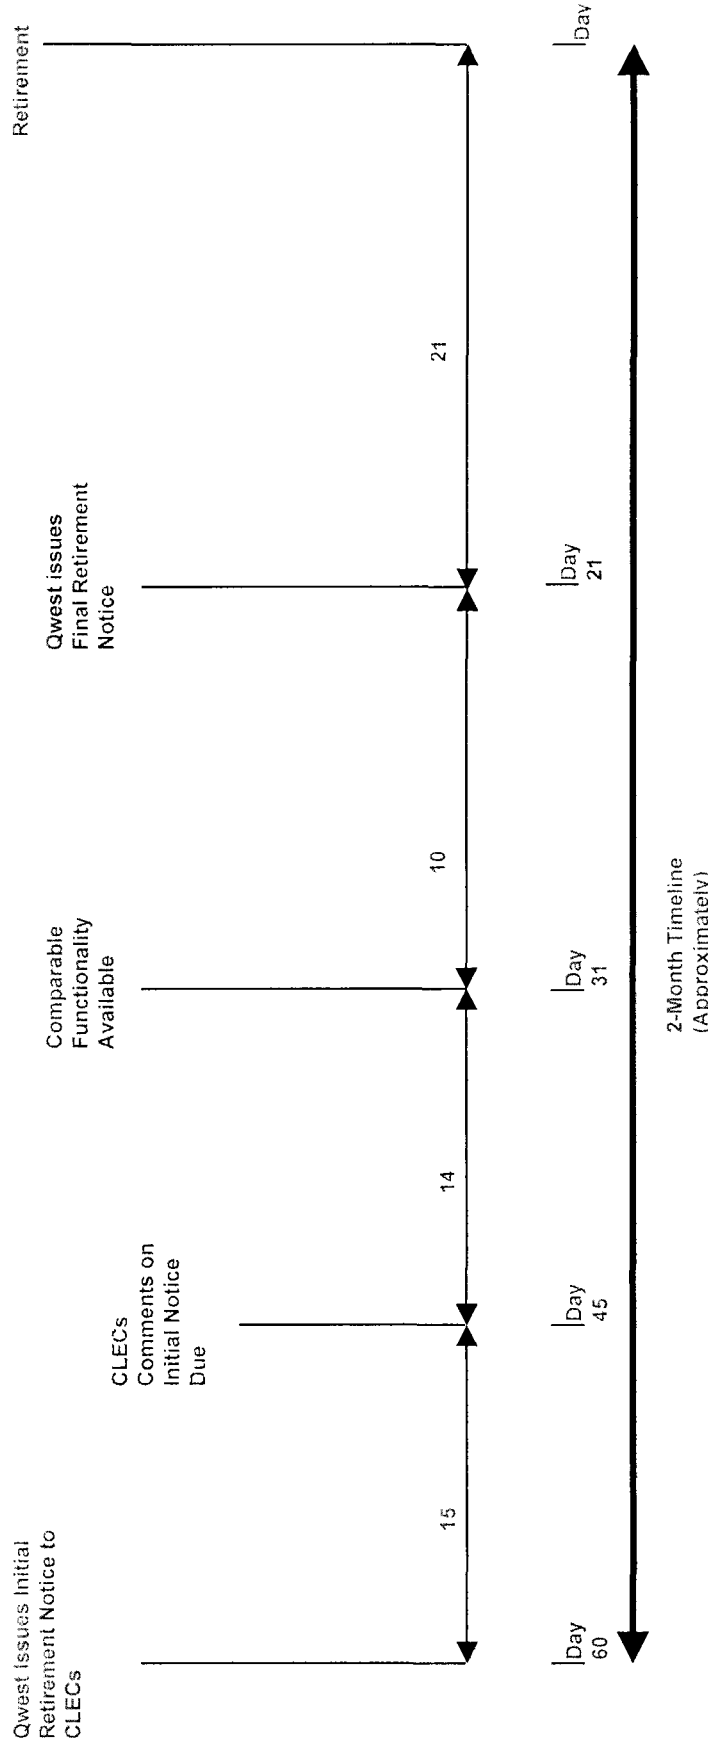

The events listed above are intended to occur on business days. If the date on which any event is scheduled to occur falls on a weekend or holiday, then Qwest and the CLECs may negotiate a revised timeline.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

Qwest-CLEC Change Management Process Retirement of An Existing Graphic User Interface Timeline

The events listed above are intended to occur on business days. If the date on which any event is scheduled to occur falls on a weekend or holiday, then Qwest and the CLECs may negotiate a revised timeline.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

109.0 PRIORITIZATION

9.0 Prioritization Review

Each OSS Interface and Test Environment release is prioritized separately. If the Systems CMP Change Requests for any interface or test environment do not exceed release capacity, no prioritization for that release is required. The prioritization review process provides an opportunity for CLECs to prioritize CLEC and Qwest originated OSS Interface change requests (CRs). CLEC or Qwest originated CRs for introduction of a new interface or retirement of an existing interface are not subject to prioritization and will follow the introduction or retirement processes outlined in Sections 7.0x and 9.0x, respectively. ~~[See Action Items 212, 170, 169, 168, and 167]~~

~~(WCOM COMMENTS: PAP CHANGES SHOULD NOT BE CONSIDERED REGULATORY BECAUSE QWEST TRULY ISN'T OBLIGATED TO FIX THE PROBLEMS, THEY COULD SIMPLY CHOOSE TO PAY THE PENALTIES AND CONSIDER COST OF DOING BUSINESS. WCOM COMMENT: WE SHOULD DEFINE HOW OFTEN PRIORITIZATION TAKES PLACE. THIS DOCUMENT INDICATES IT IS DONE PRIOR TO EACH MAJOR RELEASE, BUT HOW OFTEN? IS THERE A SCHEDULE OF WHEN THESE WILL TAKE PLACE, IE. DURING WHICH MONTHLY MEETINGS WILL CLECS BE ASKED TO PRIORITIZE CR'S SO THEY CAN BE CONSIDERED FOR THE NEXT RELEASE.)~~

9.1109.1 Regulatory and Industry Guideline Change Requests

~~[See Action Items 212 and 170, 169, 168, and 167]~~

~~Note: Qwest considers changes related to PID/PAP items to be separate from all discussions in this Section. (IMPASSE ISSUE) [Qwest's understanding of the CLEC proposal of 01-24-02 assumes that Qwest and CLECs will agree to a Special Change Request Process.]~~

~~Regulatory and Industry Guideline changes, as are defined in Section 4x2.0 above, are not voluntary, but are required to comply with newly passed legislation, regulatory requirements, court rulings, PAPs, or industry guidelines. Qwest is required to implement these changes within a designated timeframe. Therefore, sSeparate procedures are required for prioritization of CRs requesting Regulatory and Industry Guideline changes to ensure that Qwest can comply with the recommended or required implementation date, if any. The process for determining whether a CR is Regulatory Change or Industry guideline is set forth in Section 53.1.~~

Qwest will send CLECs a notice when it posts Regulatory or Industry Guideline CRs to the Web and identify when comments are due, as described in Section 53.1. Regulatory and Industry

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

Guideline CRs will also be identified in the CMP Systems Monthly Meeting Distribution Package.

9.1.1109.1.1 Regulatory Changes

~~For Regulatory cChanges, arising from newly passed legislation, regulatory requirements, court rulings, or PAP, Qwest will implement changes no later than the time specified in the legislation, regulatory requirement, court ruling, or PAP; if no time is specified, Qwest will implement the change as soon as practicable. For Regulatory changes arising from a PAP, Qwest will implement changes no later than the date on which the applicable standard becomes effective (Highlighted text indicates impasse issue). [Bold tText in Section 10.1.1 indicates ilmpasse ilssue.] After the legislation, regulatory requirement, court ruling, or applicable standard in a PAP becomes effective, Qwest will implement Regulatory changes as soon as practicable.~~

Regulatory CRs will be ranked with all other CRs. If the implementation date for a Regulatory CR requires all or a part of the change to be included in the upcoming Major Release, the CR will not be subject to ranking and will be automatically included in that Major Release.

109.1.2 Industry Guideline Changes

~~For Industry Guideline changes, Qwest will use the national implementation timeline, if any. If no national implementation timeline is specified, Qwest will implement any related changes as soon as practicable, taking into account the benefit of the guideline change and CLEC input regarding the implementation timeline.~~

Industry Guideline CRs will be ranked with all other CRs. If the recommended implementation date for a Industry Guideline CR requires all or a part of the change to be included in the upcoming Major Release, the CR will not be subject to ranking and will be automatically included in that Major Release, unless Qwest and CLECs unanimously agree otherwise.

109.1.3 Regulatory and Industry Guideline Change Implementation

~~When more than one Major Release is scheduled before the mandated or recommended implementation date for a Regulatory or Industry Guideline CR, Qwest will present information to CLECs regarding any technical, practical, or development cycle considerations, as part of the CR review and up to the packaging options, that may affect Qwest's ability to implement the CR in any particular Major Release. At the monthly CMP meeting where the Regulatory or Industry Guideline CR is presented, Qwest will advise CLECs of the possible scheduled releases in which Qwest could implement the CR and the Where Regulatory and/or Industry Guideline CRs could be prioritized into more than one Major Release prior to the mandated or~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

~~recommended implementation date, CLECs and Qwest will determine how to allocate those CRs among the available Major Releases, taking into account the information provided by Qwest regarding technical, practical, and/or development considerations. If the Regulatory or Industry Guideline CR is not included in a prior release, it will be implemented in the latest release specified by Qwest. Where an implementation date is specified for a Regulatory or Industry Guideline change, there may be one or more releases prior to the last release before the required implementation date in which Qwest could implement a Regulatory or Industry Guideline change. For each of these CRs, Qwest will determine the scheduled releases in which the Regulatory or Industry Guideline CR could be implemented, based on the required implementation date, the development cycle, resource allocation, and other scheduled Regulatory or Industry Guideline CRs. At the monthly CMP meeting where the Regulatory or Industry Guideline CR is presented, Qwest will advise CLECs of the possible scheduled releases in which Qwest could implement the CR. If Qwest determines that there is more than one release in which Qwest could implement a Regulatory or Industry Guideline CR, the prioritization process outlined above applies to any possible releases before the latest release in which Qwest could implement the CR.~~

9.2109.2 Prioritization Process

9.1.2109.2.1 Prioritization Review

At the last Monthly Systems CMP Meeting before Prioritization, Qwest will facilitate a Prioritization Review including ~~the~~ a discussion ~~for of~~ all CRs eligible⁴ [define in terms #248] for prioritization in a major release~~each CR~~. Qwest will distribute all materials five (5) calendar days prior to the prioritization review. The materials will include:

- Agenda
- Summary document of all CRs ~~candidates eligible to for~~ prioritization. (see Appendix A - Sample – IMA 110.0 Rank Eligible CRs~~Candidates for Prioritization List~~)

Both CLECs and Qwest should have appropriate subject matter experts in attendance at the Prioritization Review. The review and discussion meetings are open to all CLECs.

The Prioritization Review objectives are to:

- Introduce newly initiated CLEC and Qwest OSS Interface and test environment change requests.

⁴ ~~Eligible CR's are Qwest and CLEC initiated CR's as defined in Section X. . [AT&T Comment: This will definition may change depending on how we the CMP Redesign Team resolves regulatory and industry guideline changes]~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs~~.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

- Allow CLECs and Qwest to prioritize eligible OSS Interface or test environment change requests by providing specific input as to the relative importance that CLECs, as a group, and Qwest assign to each such change request.

9.2 Prioritization Process **10.2.2 Ranking**

Within three (3) business days following the CMP Meeting that includes the Prioritization Review, Qwest will distribute the Prioritization Form for ranking. ~~Ranking should be conducted according to the following guidelines:~~

- Each CLEC and Qwest may submit one numbered ranking of the Release Candidate List. The ranking must be submitted by the primary Point of Contact (POC, the secondary POC, or CMP Team Representative). The ranking will be submitted to the Qwest Systems CMP Manager in accordance with the guidelines described in Section 10.2.3X ~~above/below.~~ Refer to Appendix B: Sample – IMA 11.0 Initial Prioritization Form ~~(AT&T Comment)~~ Ranking
- Qwest and each CLEC ranks each change request on the Release Candidate List by providing a point value from 1 through n, where n is the total quantity of CRs. The highest point value should be assigned to the CR that Qwest and CLECs wish to be implemented first. The total points will be calculated by the Qwest Systems CMP Manager and the results will be distributed to the CLECs in accordance with the Prioritization Process described in Section 10.2.3 X ~~above/below.~~ ~~(AT&T Comment)~~ Refer to Appendix CX – Sample ~~— IMA 11.0 Prioritization List~~ Qwest CMP Prioritization Process Example.

10.2.3 Ranking Tabulation

CLECs and Qwest who choose to vote must submit their completed Prioritization Form via e-mail within three (3) business days following Qwest's distribution of the Prioritization Form. Within two (2) business days following the submission of ranking, Qwest will tabulate all rankings and e-mail the resulting Initial Prioritization List to the CLECs. The results will be announced at the next scheduled CMP Monthly Meeting.

Prioritization is based on the results of the votes received by the deadline. Based on the outcome of the final ranking of the CR candidates, an ~~Initial Prioritization List~~ ~~release candidate list~~ is produced. Qwest will place in order the candidates based on the ranking responses received by the deadline.

10.2.4 Ranking of Late Added CRs

For those late added CRs that are eligible for inclusion, as a candidate, in the most recently prioritized release (Section 10.2.4 ~~53.2.1~~), the prioritization process will be as follows.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users ~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note—Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

- Within three (3) business days following the CMP Meeting that resulted in the decision to include the late added CR as a candidate in the recently prioritized release, Qwest will distribute the late added CR for ranking, along with the initial prioritization.¹
- Each CLEC and Qwest may submit a suggested rank for the late added CR. The suggested rank will be the number, from 1-n, corresponding to the position on the Initial Prioritization List that the CLEC or Qwest believes the late added CR should be inserted.
- CLECs and Qwest who choose to vote must return their suggested rank for the late added CR via e-mail within three (3) business days following Qwest's distribution of the late added CR for ranking.²

Within two business days following the return of the suggested rank, Qwest will tabulate the results by averaging the returned suggested ranks for the late added CR. Qwest will insert the late added CR into the Initial Prioritization List at the resulting point on the list and will renumber the remaining candidates on the list based on this insertion. Qwest will e-mail the newly resulting Initial Prioritization List to the CLECs. The results will be announced at the next scheduled CMP Monthly Meeting.

10.2.5 Withdrawal of Prioritized CRs

A CLEC or Qwest may elect to withdraw a CR that has been prioritized for an OSS release. This process may be invoked at any time between the prioritization process and the commitment packaging for the release. Qwest will determine its ability to work additional candidates for the release based upon the timing of the withdrawal request. After commitment, a CLEC or Qwest could request the CR be withdrawn, however, the withdrawal of the candidate may not be feasible based upon the development status at the time of the withdrawal request. The process will be as follows:

☐ The originating CLEC or Qwest will submit a written request to the Qwest Systems CMP Manager indicating that they wish to withdraw the CR. This notification must be sent no later than 21 calendar days prior to the monthly Systems CMP meeting at which the packaging request will be discussed. The written request must contain:

- the CR number
- the CR title
- an explanation of why the originator wishes to withdraw the CR

☐ Within 2 business days of receipt of the request to withdraw the CR the Systems CMP Manager will notify, in writing, all of the CLECs that submitted a prioritization vote ranking. The subject line will note "INTENT TO WITHDRAW PRIORITIZED CR [number]." The notice will include

- the CR number

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users ~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

- the CR title,
- the ranking that it received from the prioritization,
- the explanation of why the originator wishes to withdraw the CR

If a CLEC or Qwest disagrees with the withdrawal of the CR from the release, they have the option to assume sponsorship of that CR. They may do so by notifying the Systems CMP Manager in writing of their intent to assume sponsorship of the CR within 5 business days after the Systems CMP Manager has sent the intent to withdraw e-mail. If the Systems CMP Manager receives no response within 5 business days, then the CR will be withdrawn. The new status will be reviewed in the next monthly Systems CMP meeting.

B. CLECs and Qwest will rank all systems CRs, including Regulatory and Industry Guideline CRs.

(QWEST COMMENT: The CR Initiation process also includes a description of the release life cycle. Recommend removing it from the Prioritization Process so that it only resides in one process.)

9.3 Qwest OSS Interface Release Life Cycle

Following CR Prioritization and ranking, the Qwest OSS release life cycle is comprised by the succession of three major phases of work. These phases are performed to prepare, implement, deploy, support, and retire an OSS interface.

9.3.1 Initiation Phase

During the Initiation Phase definition and design activities occur.

Definition Activities – The high-level business requirements, systems requirements, and Level of Effort for a release are further refined. For example, system functions are derived from user scenarios, system performance and security constraints are identified for mitigation, and data requirements are identified.

Design Activities – The architecture (system context diagram, data design, analysis of requirements satisfaction, software services/technologies accepted, mapping of components to hardware, etc.) is analyzed to meet the baseline requirements.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note—Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

At the conclusion of the initiation phase a detailed Level of Effort is determined by Qwest and CR packaging is presented to the CLECs. CR packaging is a process during which Qwest IT groups CRs into packages based on ranking, coding affinities and system synergy. These packages are presented to the CLECs at the Monthly Systems CMP Meeting. The CLECs select the package which they wish to be implemented with the release.

9.3.2 Development Phase

During the Development Phase the following activities occur to prepare a release for deployment:

Build Activities – The code is baselined and delivered to system test and a system test plan (system test cases, costs, and schedule, test environment, test data, etc.) is completed.

Test Activities – The system is tested as meeting system test requirements, certification is completed on the system readiness for production, and pre-final documentation is reviewed and baselined.

9.3.3 Deployment Phase

During this phase Qwest representatives from the business and operations review and agree the system is ready for full deployment. The release is deployed and production support initiated and conducted.

10.3 Special Change Request Process (SCRP)

In the event that a Systems CR is not ranked high enough in prioritization for inclusion in the next Release, or as otherwise provided in the CMP, the CR originator may elect to invoke the CMP Special Change Request Process (SCRP) as described in this section.

The SCRCP may be requested up to five (5) calendar days after prioritization results are posted. However, the SCRCP does not supercede the process defined in Section 35.0 (Change Request Initiation Process).

The foregoing process applies to Qwest and CLEC originated CRs. In the event a Qwest CR is submitted through this process, Qwest agrees that it will not divert IT resources available to work on the CMP systems CRs, for the next Release to support Qwest's the SCRCP request. Qwest will have to apply additional resources to, and track, the additional work required for the CR it seeks to implement through the SCRCP.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

All time intervals within which a response is required from one Party to another under this Section are maximum time intervals. Each Party agrees that it will provide all responses in writing to the other Party as soon as the Party has the information and analysis required to respond, even if the time interval stated herein for a response is not over.

10.3.1 SCRP Request From

To invoke the SCRP, the CR originator must send an e-mail to the Qwest CMP SCRP mailbox (URL TBD). The subject line of the e-mail message must include:

- “SCRP FORM”
- CR originator’s company name
- CR number and title

The text of the e-mail message must include:

- Description of the CR
- A completed SCRP Form (See Appendix XX)
- A single point of contact for the SCRP request including:
 - Primary requestor’s name and company
 - Phone number
 - E-mail address
- Circumstances which have necessitated the invocation of the SCRP
- Desired implementation date
- If more than one company is making the SCRP request, the names and point of contact information for the other requesting companies.

10.3.2 Qwest Acknowledges Receipt with a Confirmation E-mail

Within two (2) business days following receipt of the SCRP e-mail, Qwest will acknowledge receipt of the complete SCRP e-mail with a confirmation e-mail and advise the SCRP Requestor of any missing information needed for Qwest to process and analyze the request. When the SCRP e-mail is complete, the confirmation e-mail will include:

- Date and time of receipt of complete SCRP e-mail
- Date and time of confirmation e-mail
- SCRP title and number
- The name, telephone number and e-mail address of the Qwest contact assigned to process the SCRP
- Amount of the non-refundable Processing Fee as specified in Section 9.3.8 below.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

10.3.3 Process Fee Invoice

Within one (1) business day of sending the confirmation email Qwest will bill the SCRP Requestor a non-refundable Processing Fee as specified in Section 9.3.8 below.

10.3.4 SCRP Review Meeting

Within ten (10) business days after the confirmation e-mail, Qwest will schedule and hold a review meeting with the SCRP Requestor to review Qwest's analysis of the request.

~~[AT&T Comment: Timing will be important because, assuming the desire is to get this in the next release, doesn't the business and systems development work have to be done in tandem with the business and systems development work on the prioritized CRs for the release?]
[AT&T Comment: How much?]
[AT&T Comment: what additional information does Qwest think it needs? With a CR, Qwest proceeds with the information contained in the CR and through clarification. Wouldn't it be the same for SCRP CRs? Also, how does Qwest intend to do the work? Through contractors?]~~

10.3.5 Preliminary SCRP Quote and Review

During business and systems requirements analysis, Qwest will review the SCRP request to determine if it has any affinities with CRs packaged for the targeted OSS Interface release. As soon as feasible, but in any case within thirty (30) business days, after receipt of a completed SCRP form, Qwest will schedule and hold a meeting with the SCRP Requestor to provide and review:

- An estimated Preliminary SCRP quote. The SCRP quote will, at a minimum, include the following information:
 - A description of the work to be performed
 - Estimated Development costs with a cap on cost
- ~~[AT&T Comment: Schedule for all the steps that apply to any other systems CR – business and systems requirements, packaging, etc. – wouldn't this schedule match the schedule for the CRs that were prioritized high enough to make the next release?]~~
- Targeted release ~~[AT&T Comment: isn't it the next release?]~~
 - An estimate of the terms and conditions surrounding the firm SCRP quote. (If the estimate increases before Qwest issues the Firm SCRP Quote, Qwest will communicate the cost increases to the SCRP Requestor. The SCRP Requestor must comply with payment terms as outlined in Section 9.3.7 before Qwest proceeds with the request.)
 - An invoice covering the business and systems requirements analysis

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

- Payment for this invoice is due no later than ~~45-30~~ calendar days following Qwest written issuance of the Preliminary Quote. Qwest will not proceed with further development in support of the SCRP Request until the business and systems analysis and processing invoices are paid.

The SCRP Requestor has ten (10) business days, upon receipt of the SCRP quote, to either agree to purchase under the quoted price or cancel the SCRP request.

10.3.5.1 SCRP Requestor Accepts the Preliminary Quote and Decision for Qwest to Proceed

If the SCRP Requestor accepts the SCRP Preliminary Quote, the SCRP Requestor must send an e-mail to Qwest with the following information:

The subject line of the e-mail message must include:

- "SCRP PRELIMINARY QUOTE ACCEPTED"
- CR originator's company name
- CR number and title

The text of the e-mail message must include:

- Statement of accepting SCRP Preliminary Quote, targeted OSS Interface Release date, and terms and conditions
- CR originator's name, phone number, and e-mail address

~~Qwest will begin developing business and systems requirements once the SCRP Requestor accepts the SCRP Preliminary Quote.~~

10.3.5.2 SCRP Requestor Asks to Change the SCRP Request

If the SCRP Requestor decides to modify the SCRP request after Qwest provides the preliminary SCRP Quote, the requestor must submit a written request for change to the ~~may contact the assigned Qwest manager to discuss changes.~~ If changes are acceptable to Qwest, Qwest will notify the SCRP Requestor by e-mail within five (5) business days after receipt of such request for a change with a revised high-level preliminary SCRP Quote, if applicable. The SCRP Requestor must inform Qwest, in writing, within five (5) business days, if the modified SCRP quote is acceptable, further changes are required, or the SCRP request is cancelled.

10.3.5.3 SCRP Requestor Cancels the SCRP Request

The last point at which a SCRP Request may be cancelled is at the CMP Meeting at which Qwest presents the CRs that Qwest has committed in the release. Otherwise, the request will

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users ~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

be implemented with the release and the SCRP Requestor is obligated to pay the full amount of the firm quote consistent with the payment schedule described below in Section 10.3.7.

10.3.6 Firm SCRP Quote and Review

Qwest will provide the SCRP Requestor a final and Firm SCRP Quote after the completion of business requirements, systems requirements and packaging of the OSS Interface Release, and when Qwest commits CRs to the specific OSS Interface Release.

Qwest will send an e-mail to the SCRP Requestor with the following information:

The subject line of the e-mail message must include:

- "FIRM SCRP QUOTE"
- CR originator's company name
- CR number and title

The text of the e-mail message must include:

- Final SCRP quote and terms and conditions
- Committed implementation date, or OSS Interface Release
- Qwest contact name, phone number, and e-mail address

No less than ten (10) days following issuance of the Firm SCRP Quote Qwest will schedule and hold a meeting to review the quote. At this meeting Qwest will review the elements of the Firm Quote and the firm Release Date of the Targeted Release.

10.3.7 Payment Schedule

The SCRP Requestor must pay 50% of the Firm SCRP Quote no more than ten (10) calendar days following the scheduled release date and the remaining 50% of the Firm SCRP Quote within 30 calendar days of the scheduled release date.

10.3.8 Applicable SCRP Charges

This section describes the different costs for a SCRP request.

- Processing Fee – a one-time flat fee that must be paid within 340 calendar days after the Qwest-SCRP Requestor meeting to prepare the SCRP form. This fee is non-refundable and is treated separately from those charges for development and implementation as described under "Charges for the SCRP Request" below.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- Charges for Business and Systems Requirements - These charges include the costs of developing business and systems requirements.
- Charges for the Development of the SCRP Request – These charges, included in the Preliminary and Firm SCRP Quotes, ~~include charges including~~ labor charges, time and capital costs incurred as a result of developing ~~business and systems requirements, code,~~ and performing testing.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

110.0 APPLICATION-TO-TO-APPLICATION INTERFACE TESTING

ACTION ITEM 208 – ADD LANGUAGE TO ADDRESS ISSUE OF FINDING A BUG IN THE PRODUCTION CODE IN THE TEST ENVIRONMENT.]

[Redesign 02-06-02]

If CLEC is using an application-to-application interface, CLEC must work with Qwest to certify the business scenarios that CLEC will be using in order to ensure successful transaction processing in production. If multiple CLECs are using a service bureau provider, the service bureau provider need only be certified for the first participating CLEC; subsequent CLECs using the service bureau provider need not be certified. Qwest and CLEC shall mutually agree to the business scenarios for which CLEC requires certification. Certification will be granted for the specified release of the application-to-application interface. If CLEC is certifying multiple products or services, CLEC has the option of certifying those products or services serially or in parallel if technically feasible.

New releases of the application-to-application interface may require re-certification of some or all business scenarios. A determination as to the need for re-certification will be made by the Qwest coordinator in conjunction with the release manager of each release. Notice of the need for re-certification will be provided to CLEC as the new release is implemented. The suite of re-certification test scenarios will be provided to CLEC with the initial and final Technical Specifications. If CLEC is certifying multiple products or services, CLEC has the option of certifying those products or services serially or in parallel, if technically feasible. If multiple CLECs are using a service bureau provider, the service bureau provider need only be re-certified for the first participating CLEC; subsequent CLECs using the service bureau provider need not be re-certified.

Qwest will provides a separate Customer Test Environment (CTE) for the testing of transaction based application-to-application interfaces for pre-order, and order, and maintenance/repair. The CTE will be developed for each major release and updated for each point release that has changes that were disclosed but not implemented as part of the major release. Qwest will provide test files for batch/file interfaces (e.g. billing). The CTE for Pre-order and Order currently includes:

- Stand Alone Test Environment (SATE)**
- Interoperability Testing**
- Controlled Production Testing**

The CTE for Maintenance and Repair currently includes:

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

- CMIP Interface Test Environment (MEDIACC)

Qwest will provide test files for Billing. There are two types of testing: Qwest provides initial implementation new release testing [intended for those CLECs that are not currently in production or that want to test new ordering or pre-ordering transactions for which they have not been through testing – move to Terms], and migration testing (from one version release to the next) for all types of OSS Interface change requests. Controlled Production Testing is also provided for Pre-Order and Order. -[see action item #182 TERMS] production support for all types of change requests. New release Such testing provides the opportunity to test the code associated with releases for Type those OSS Interface ex2 through 5 change requests. The CTE will also provide the opportunity for regression testing of OSS Interface functionality. Production support testing allows CLECs and Qwest to test changes made as a result of Type 1 change request implementation.

1. New Release & Production Support

110.1 Testing Process

in the CLEC Test Environment (CTE)

Qwest will send an industry notification, including testing schedules (see Ssection 8.0X – Changes to Existing OSS Interfaces), to CLECs so they may determine their intent to participate in the test. CLECs wishing to test with Qwest migrate to the new release must participate in at least one joint planning session and determine:

- Connectivity (required)
- Firewall and Protocol Testing (required)
- Controlled Production (required)
- Production Turn-up (required)
- Test Schedule (required) should make arrangements with Qwest. When applicable, CLECs and Qwest will perform interface testing, as mutually agreed upon and documented in a migration project plan

A joint CLEC-Qwest test plan may also include some or all of the following based on type of testing requested:

- Requirements Review
- Test Data Development
- Progression Testing Phase

Each testing CLEC will meet with Qwest and agree on its own set of test scenarios that will be included in the test and the test schedule. Qwest will communicate/publish any agreed upon

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

changes to the test schedule. CLECs are responsible for establishing and maintaining connectivity to the CTE. Provided a CLEC uses the same connectivity option as it uses in production, the CLEC should, in general, experience response times similar to production. However, the CTE environment is not intended for volume testing.

This section provides information regarding the CTE and the procedures for new release and Production Support testing.

The CTE is a separate environment that contains the application-to-application interface and gateway applications for preordering and ordering. This environment is used for CLEC testing – both new release testing and new entrant testing. CLECs are responsible for establishing and maintaining connectivity into the CTE. Provided a CLEC uses the same software components and similar connectivity configuration connectivity option as it uses in production, the CLEC should, in general, experience response times similar to production. However, this environment is not intended for volume testing. The CTE contains the appropriate applications for pre-ordering and Local Service Request (LSR) ordering up to but not including the service order processor. Qwest intends to include the service order processor as part of the SATE component of the CTE by the end of 2002. (Action #185) Production code problems identified in the test environment will be resolved by using the Production Support process as outlined in Section 124.0.

Any special procedures required due to geographical or system differences will be reviewed with the participating CLEC prior to the implementation of their testing phase

II. New Release Testing

New release testing is the process CLECs use to test an upcoming Qwest systems release that impacts the interface and business rules between CLECs and Qwest.

III. Getting Ready for the New Release Testing

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

~~CLECs should be notified of the content of the release through the change management process. CLECs should review the content of the release and determine if they want to participate in the test and what transactions they would like to submit as part of the test.~~

~~Qwest will send an industry notification, including testing schedules, to CLECs so they may determine their intent to participate in the test. CLECs wishing to participate in the test should make arrangements with Qwest testing coordinator. Qwest will publish any changes to the schedule.~~

~~IV. Production Support Testing~~

~~Production Support testing occurs in a production like environment used in support of new entrant testing. New entrant testing is intended for those CLECs that are not currently in production or that want to test new ordering or pre-ordering transactions for which they have not been through testing.~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

121.0 PRODUCTION SUPPORT

~~[Action Item 209 – Qwest to propose language and the time frame for scheduled maintenance, notification and inclusion of known patches or any other CLEC impacting changes, and whether schedule maintenance should be included under production support or in another section in the Redline Document.]~~

121.1 Notification of Planned Outages

Planned Outages are reserved times for scheduled maintenance to Operations Support Systems (OSS). Qwest sends associated Notifications to all CLECs. Planned Outage Notifications must include:

- Identification of the subject OSS.
- Description of the scheduled OSS maintenance activity.
- Impact to the CLECs (e.g. geographic area, products affected, system implications, and business implications).
- Scheduled date and scheduled start and stop times.
- Work around, if applicable.
- Qwest contact for more information on the scheduled OSS maintenance activity.

Planned Outage Notifications will be sent to CLECs and appropriate Qwest personnel within 2 days of the scheduling of the OSS maintenance activity.

121.2 ~~1.1~~ Newly Deployed OSS Interface Release

Following the release production date of an OSS Interface change, Qwest will use production procedures for maintenance of software as outlined below. Problems encountered by the CLEC should be reported to the IT Wholesale Systems Help Desk (IT Help Desk). Qwest will monitor, track, and address troubles reported by CLECs or identified by Qwest, as set forth in Section 121.X02. Problems reported will be known as IT Trouble Tickets. A week after the deployment of an IMA Release into production, Qwest will host a conference call with the CLECs to review any identified problems and answer any questions pertaining to the newly deployed software. Qwest will follow CMP process for documenting the meeting (includes issues/action items and status/solution). Issues will be addressed with specific CLECs and results/status will be reviewed at the next Monthly OSS CMP Meeting.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

124.3 1.2 Request for a Production Support Change

The IT Help Desk supports Competitive Local Exchange Carriers who have questions regarding connectivity, outputs, and system outages. The IT Help Desk serves as the first point of contact for reporting trouble. If the IT Help Desk is unable to assist the CLEC, it will refer information to the proper subject matter expert, also known as Tier 2 or Tier 3 support, who may call the CLEC directly. Often, however, an IT Help Desk representative will contact the CLEC to provide information or to confirm resolution of the trouble ticket. (see Action Item # 189)

Qwest will assign each CLEC-generated and Qwest-generated IT Trouble ticket a Severity Level 1 to 4, as defined in Section 121.X4. Severity 1 and Severity 2 IT trouble tickets will be implemented immediately by means of an emergency release of process, software or documentation (known as a patch). If Qwest and CLEC deem implementation is not timely, and a work around exists or can be developed, Qwest will implement the work around in the interim. Severity 3 and Severity 4 IT trouble tickets may be implemented when appropriate taking into consideration upcoming patches, major releases and point releases and any synergies that exist with work being done in the upcoming patches, major releases and point releases.

The first time a trouble is reported by Qwest or CLEC, the Qwest IT Help Desk will assign a IT Trouble Ticket tracking number, which will be communicated to the CLEC at the time the CLEC reports the trouble. The affected CLEC(s) and Qwest will attempt to reach consensus on resolution of the problem and closing the IT Trouble Ticket. If no consensus is reached, any party may use the Technical Escalation Process described in section X. When the IT Trouble Ticket has been closed, Qwest will notify CLECs with one of the following disposition codes:

- No Trouble Found – to be used when Qwest investigation indicates that no trouble exists in Qwest systems.
- Trouble to be Resolved in Patch – to be used when the IT Trouble Ticket will be resolved in a patch. Qwest will provide a date for implementation of the patch. This is typically applied to Severity 1 and Severity 2 troubles, although Severity 3 and Severity 4 troubles may be resolved in a patch where synergies exist.
- CLEC Should Submit CMP CR – to be used when Qwest's investigation indicates that the System is working pursuant to the Technical Specifications (unless the Technical Specifications are incorrect), and that the IT Trouble Ticket is requesting a systems change that should be submitted as a CMP CR.
- Date TBD – to be used when the IT Trouble Ticket is not scheduled to be resolved in a patch or change, but Qwest may resolve in a patch, release, or otherwise, if possible where synergies exist. This disposition is applied to Severity 3 and Severity 4 troubles.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

Qwest will track "Date TBD" trouble tickets and report status and resolution of these trouble tickets and associated systems work on its CMP website. The status of these trouble tickets will be regularly discussed in CMP meetings.

For "Date TBD" trouble tickets, either Qwest or a CLEC may initiate the Change Request to correct the problem. (See Section 5.0X for CR Initiation.) If the initiating party knows that the CR relates to a trouble ticket, it will identify the trouble ticket number on the CR.
1.1 Newly Deployed Changes

Following the implementation of an OSS Interface change, Qwest will use existing production procedures for maintenance of a newly released software. Qwest will monitor troubles reported by CLECs to the IT Wholesale Systems Help Desk. A week after the deployment of a software into production, Qwest will host a conference call with the CLECs to review any identified problems and answer any questions pertaining to the newly deployed software. A Type 1 change corrects problems discovered in production versions of an OSS interface.

1.2 Request for a Production Support Change

Severity 1 (critical—production stopped) and Severity 2 (production or functionality degraded) corrections will be implemented immediately by means of an emergency release of process, software or documentation and CLECs notified according to the IT Wholesale Systems Help Desk procedures (refer to CMP web site). Severity 3 (limited use, but workaround in place) and Severity 4 (low or no impacts to CLECs) types, will not be fixed immediately but will follow the CR process under this CMP. For Severity 3 and Severity 4 production support issues, either Qwest or a the CLEC may initiate the Change Request to correct the Severity 3 or Severity 4 problem. (See Section X for CR Initiation.) Typically, this type of change reflects instances where an technical implementation is faulty or inaccurate such as to cause correctly or properly formatted data to be rejected.

Instances where Qwest or CLECs misinterpret interface Technical sSpecifications and/or business rules must be addressed on a case-by-case basis. All parties will take all reasonable steps to ensure that any disagreements regarding the interpretation of a new or modified business process OSS Interface are identified and resolved during the change management review of the change request.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note—Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

124.4 1.3 Reporting Trouble to IT

Qwest will open a trouble ticket at the time the trouble is first reported by CLEC or detected by Qwest. The IT Help Desk representative will communicate the ticket number to the CLEC at the time the CLEC reports the trouble.

If a ticket has been opened, and subsequent to the ticket creation, CLECs call in on the same problem, and the IT Help Desk recognizes that it is the same problem, a new ticket is not created. The IT Help Desk documents each subsequent call in the primary ticket.

If one or more CLECs call in on the same problem, but it is not recognized as the same problem, one or more tickets may be created. When the problem is recognized as the same, one of the tickets becomes the primary ticket, and the other tickets are linked to the primary ticket. When the problem is closed, the primary and all related tickets will be closed.

124.5 1.4 Severity Levels

Severity level is a means of assessing and documenting the impact of the loss of functionality to CLEC(s) and impact to the CLEC's business. The severity level gives restoration or repair priority to problems causing the greatest impact to CLEC(s) or its business.

Guidelines for determining severity levels are listed below. Severity level may be determined by one or more of the listed bullet items under each Severity Level (the list is not exhaustive). Examples of some trouble ticket situations follow. Please keep in mind these are guidelines, and each situation is unique. The IT Help Desk representative, based on discussion with the CLEC, will make the determination of the severity level and will communicate the severity level to the CLEC at the time the CLEC reports the trouble. If the CLEC disagrees with the severity level assigned by the IT Help Desk personnel, the CLEC may escalate using the Technical Escalation Process. (See section X)

Severity 1: -Critical Impact

- Critical.
- High visibility.
- A large number of orders or and CLECs are affected.
- A single CLEC cannot submit ~~their~~its business transactions.
- Affects online commitment.
- Production or cycle stopped – priority batch commitment missed.
- Major impact on revenue.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- Major component not available for use.
- Many and/or major files lost.
- Major loss of functionality.
- Problem can not be bypassed.
- No viable or productive work around available.

Examples:

- Major network backbone outage without redundancy.
- Environmental problems causing multiple system failures.
- Large number of service or other work order commitments missed.
- A sSoftware dDefect in an edit which prevents any orders from being submitted.

Severity 2: ~~Serious~~ Impact

- Serious.
- Moderate visibility.
- Moderate to large number of CLECs, or orders affected.
- Potentially affects online commitment.
- Serious slow response times.
- Serious loss of functionality.
- Potentially affects production – potential miss of priority batch commitment.
- Moderate impact on revenue.
- Limited use of product or component.
- Component continues to fail. Intermittently down for short periods, but repetitive.
- Few or small files lost.
- Problems may have a possible bypass; the bypass must be acceptable to CLECs.
- Major access down, but a partial backup exists.

Examples:

- A single company, large number of orders impacted
- Frequent intermittent logoffs.
- Service and/or other work order commitments delayed or missed.

Severity 3: Moderate Impact

- Low to medium visibility.
- Low CLEC, or low order impact.
- Low impact on revenue.
- Limited use of product or component.
- Single CLEC device affected.
- Minimal loss of functionality.
- Problem may be bypassed; redundancy in place. Bypass must be acceptable to CLECs.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

- Automated workaround in place and known. Workaround must be acceptable to CLECs.

Example:

- Equipment taking hardHardware errors, no impact yet.

Severity 4: Minimal Impact

- Low or no visibility.
- No direct impact on CLEC.
- Few functions impaired.
- Problem can be bypassed. Bypass must be acceptable to CLECs.
- System resource low; no impact yet.
- Preventative maintenance request.

Examples:

- Misleading, unclear system messages causing confusion for users.
- Device or software regularly has to be reset, but continues to work.

124.6 1.5 Status Notification for IT Trouble Tickets

There are two types of status notifications for IT Trouble Tickets:

- Ticket Notifications: for tickets that relate to only one reporting CLEC
- Event Notifications: for tickets that relate to more than one CLEC
- Event Notifications are sent by Qwest to all CLECs who subscribe to the IT Help Desk as described in Process X. Event Notifications mustwill include ticket status (e.g. open, no change, resolved) and as much of the following information as is known to Qwest at the time the notice is sent: [Redesign 02-07-02]

- Description of the problem
- Impact to the CLECs (e.g. geographic area, products affected, business implications)

Ticket status (e.g. open, no change, resolved)

- Estimated resolution date and time if known
- Resolution if known
- Severity level
- Trouble ticket number(s), date and time
- Work around if defined
- Qwest contact for more information on the problem
- System affected
- Escalation information as available

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

Both types of notifications will be sent to the CLECs and appropriate Qwest personnel within the time frame set forth in the table below and will include all related system trouble ticket number(s).

124.7 1.6 Ticket Notification Response Intervals

~~Ticket Response Notification Intervals are based on the severity level of the ticket. "Response Notification Interval for any Change in Status" means that a status-notification will be sent out within the time specified from the time a change in status occurs. "NotificationResponse Interval for No Change in Status" means that a status-notification will be sent out on a recurring basis within the time specified from the last status-notification when no change in status has occurred, until resolution. "NotificationResponse Interval upon Resolution" means that a status-notification will be sent out within the time specified from the resolution of the problem. Status notifications sent by Qwest to all CLECs who subscribe to the IT Wholesale Systems Help Desk are known as Event Notifications. Event Notifications will be sent to all CLECs within the time frame set forth in the table below and will include all related system trouble ticket number(s). The affected CLEC(s) and Qwest will attempt to reach consensus on resolution of the problem. When no consensus is reached, any party may use the Technical Escalation Process described in section X.~~

~~Status Notification will be provided during the IT Wholesale Systems Help Desk normal hours of operation. Qwest will continue to work severity 1 problems outside of Help Desk hours of operation which are Monday-Friday 6:00 a.m. - 8:00 p.m. (MT) and Saturday 7:00 a.m. - 3:00 p.m. (MT), and will communicate with the affected CLEC(s) as needed. A severity 2 problem may be worked outside the IT Wholesale Systems Help Desk normal hours of operation on a case-by-case basis. Severity three and four tickets can result in a CLEC or Qwest initiated Change Request. The tickets will be resolved as Closed, to be taken to the CMP Process.~~

The chart below indicates the response intervals a CLEC can expect to receive after reporting a trouble ticket to the IT Wholesale Systems Help Desk.

Severity Level of Ticket	Notification interval for initial ticket	Notification Interval for any Change in Status	Notification Interval for No Change in Status	Notification Interval upon Resolution
Severity Level 1	Immediate acceptance	Within 1 hour	1 hour	Within 1 hour
Severity Level 2	Immediate acceptance	Within 1 hour	1 hour	Within 1 hour
Severity Level 3	Immediate	Within 4 hours	48 hours	Within 4 hours

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users~~that are provided to CLECs.~~

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

13.0 TRAINING

Qwest will incorporate all substantive changes to existing Graphical User Interfaces (GUI), including as well as the introduction of new GUI interfaces, will be incorporated into CLEC training programs. Qwest will execute CLEC training for pre-order, ordering, billing, and maintenance and repair GUI.

13.1 Introduction of a New GUI

Qwest will include a CLEC training schedule with the Introduction of a New GUI Release Notification issued no less than forty-five (45) calendar days prior to the Release Production date. Qwest will make available CLEC training beginning no less than twenty-one (21) calendar days prior to the Release Production Date. Web based training will remain available for the life of the release.

CEMR training will not be available before the release and will be conducted for XX days after the Release Production date.

13.2 Changes to an Existing GUI

Qwest will include a CLEC training schedule with the Draft Release Notes issued no less than twenty-eight (28) calendar days prior to the Release Production date. Qwest will make available CLEC training beginning no less than twenty-one (21) calendar days prior to the Release Production date. Web based training will remain available for the life of the release.

CEMR training will not be available before the release but will be conducted for 90 days in the live environment after the Release Production date.

13.3 Product and Process Introductions and Changes

Qwest may offer CLEC training for product and process introductions and changes based on the complexity of the introduction or change. This training is offered in many forms, but is most commonly offered in the following delivery methods: web-based, instructor-led, job aids, or conference calls.

~~Qwest may conduct CLEC workshops. CLEC workshops are organized and facilitated by Qwest and can serve any one of the following purposes:~~

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

143.0 ESCALATION PROCESS

FROM SEPTEMBER 20, 2001 REDESIGN SESSION

I.143.1 Guidelines

- The escalation process will include items that are defined as within the CMP scope.
- The decision to escalate is left to the discretion of the customer CLEC, based on the severity of the missed or unaccepted response/resolution.
- Escalations may also involve issues related to CMP itself, including the administration of the CMP, can involve issues related to the CMP, itself
- Escalations involving change requests, ~~The expectation is that escalation should occur only after normal change management procedures have occurred per the CMP.~~

~~□ Three (3) levels of escalation shall be available. They are:~~

~~1. The customer's change management director (or designated agent) to provider's change management director~~

~~2. The customer's change management director to provider's account director~~

~~3. The customer's vice-president to provider's vice-president~~

~~□ Each level of escalation will go through the same cycle, as follows:~~

II.143.2 Cycle

Item must be formally escalated as an e-mail sent to the Qwest CMP escalation e-mail address, ~~http://www.qwest.com/wholesale/cmp/escalations_dispute.html~~ URL to be established } the appropriate provider escalation level.

- Subject line of the escalation e-mail must include:
 - ⊗ CLEC Company name
 - ⊗ "ESCALATION"
 - ⊗ Change Request (CR) number and status, if applicable
- Content of e-mail must enclose appropriate supporting documentation, if applicable, and to the extent that the supporting documentation does not include the following information, the following must be provided:
 - ⊗ Description of item being escalated
 - ⊗ History of item
 - ⊗ Reason for Escalation
 - ⊗ Business need and impact

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- ⊗• Desired CLEC resolution
 - ⊗• CLEC contact information including Name, Title, Phone Number, and e-mail address
 - CLEC may request that impacted activities be stopped, continued or an interim solution be established.
 - Qwest will acknowledge receipt of the complete escalation e-mail with an acknowledgement of the e-mail no later than the close of business of the following business day. If the escalation email does not contain the following specified information Qwest will notify the CLEC by the close of business on the following business day, identifying and requesting information that was not originally included. When the escalation email is complete, the acknowledgement email will include:
 - ⊗• Date and time of escalation receipt
 - ⊗• Date and time of acknowledgement email
 - ⊗• Name, phone number and email address of the Qwest Director, or above, assigned to the escalation.
- ☐ Subject of e-mail must be customer (Customer Name) ESCALATION-(CR# if applicable)-Level of Escalation
- ☐ Content of e-mail must include
- ☐ Definition and escalation of item
- ☐ History of item
- ☐ Reason for escalation
- Desired outcome of customer
- Qwest will post escalated issue and any associated responses on the CMP web site within 1 business day of receipt of the complete escalation or response. [see action item]
 - Qwest will give notification that an escalation has been requested via the Industry Mail Out process [in a time frame to be determined – Jarby]
 - Any other CLEC wishing to participate in the escalation must submit an e-mail notification to the escalation URL within one (1) business day of the mail out. The subject line of the e-mail must include the title of the escalated issue followed by “ESCALATION PARTICIPATION”
- ☐ Impact to customer of not meeting the desired outcome or item remaining on current course of action as previously discussed at the prioritization review (if escalation is associated with a change request)
- ☐ Impact to customer of a rejected change request
- ☐ Contact information for appropriate level including Name, Title, Phone Number, and e-mail ID
- ☐ It is not necessary to repeat information for level 2 and 3 escalations. However, the e-mail submission should include any additional information since the last distribution, including the reason that the matter could not be resolved at previous level
- ☐ The provider will reply to the escalation request with an acknowledgment of receipt within 1 business day

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Note-Throughout this document italicized text represents OBF language not yet discussed by the CLEC-Qwest Re-Design Team.

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 5-02-02

- ☐ Within seven (7) calendar days of receipt, the appropriate provider change management executive (Level 1-2: Director or Level 3: Vice President) will reply through provider change management with provider position and explanation for that position
 - Qwest will respond with a binding position e-mail including supporting rationale as soon as practicable, but no later than:
 - For escalated CRs, seven (7) fourteen (14) calendar days of sending the acknowledgement e-mail, Qwest will respond with a binding position e-mail including supporting rationale.
 - For all other escalations, fourteen (14) calendar days of sending the acknowledgment e-mail.
 - The escalating customer should CLEC will respond to the provider Qwest within seven (7) calendar days with a binding position e-mail. as to whether escalation will continue or the provider response has been accepted as closure to the item
 - ☐ If the provider's position suggests a change in the current disposition of the item, a conference call will be held within 1 business day of the provider's decision in order to arrive at consensus with the appropriate executives
 - ☐ The provider will publish the outcome of the conference call via e-mail
 - ☐ For escalations associated with Type 1 changes, the provider has a one day turnaround rather than 5 for each cycle of escalation
 - When the escalation is closed, the resolution will be subject to the CMP.
- 3.4.2.1 Flow of Escalation Table

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users that are provided to CLECs.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

154.0 DISPUTE RESOLUTION PROCESS

FROM SEPTEMBER 20, 2001 REDESIGN SESSION

CLECs and Qwest will work together in good faith to resolve any issue brought before the CMP ~~[define Good Faith]~~. In the event that an impasse issue develops, ~~is not resolved through the Escalation Process described in Section xx has been followed without resulting in a resolution,~~ a party may pursue the dispute resolution processes set forth below: ~~the dispute shall be resolved by either method set forth below.~~ Item must be formally noticed as an e-mail sent to the Qwest CMP Dispute Resolution e-mail address, http://www.qwest.com/wholesale/cmp/escalations_dispute.html. ~~{URL to be established}~~ Subject line of the e-mail must include:

- ⊕• CLEC Company name
- ⊕• "Dispute Resolution"
- ⊕• Change Request (CR) number and status, if applicable
- Content of e-mail must enclose appropriate supporting documentation, if applicable, and to the extent that the supporting documentation does not include the following information, the following must be provided:
 - ⊕• Description of item
 - ⊕• History of item
 - ⊕• Reason for Escalation
 - ⊕• Business need and impact
 - ⊕• Desired CLEC resolution
 - ⊕• CLEC contact information including Name, Title, Phone Number, and e-mail address
 - ⊕• Qwest will acknowledge receipt of the complete Dispute Resolution e-mail within one (1) business day
- Qwest or any CLEC may suggest that the issue be resolved through an Alternative Dispute Resolution (ADR) process, such as arbitration or mediation using the American Arbitration Association (AAA) or other rules. If the parties agree to use an ADR process and agree upon the process and rules to be used, including whether the results of the ADR process are binding, the dispute will be resolved through the agreed-upon ADR process.
- ~~Qwest or any CLEC affected by the dispute, may request mediation by a third party. If mediation is requested, parties shall participate in good faith. Qwest and the CLECs affected by the dispute must agree to the terms of the mediation, including the payment of costs and fees. If the mediation results in the resolution of the dispute, that resolution shall apply to all CLECs affected by the dispute. If mediation is not successful in resolving the issue, Qwest or any CLEC may use the process set forth below. [action item for proposed language]~~
- Without the necessity for a prior ADR Process ~~[contingent on first bullet]~~, Qwest or any CLEC may submit the issue, following the commission's established procedures, with the appropriate

APPENDIX D

Change Request Form Instructions

The Change Request (CR) Form is the written documentation for submitting a CR for a Product, Process or OSS interface (Systems) change. The CR should be reviewed and submitted by the individual, which was selected to act as a single point of contact for the management of CRs to Qwest. Electronic version of the CR Form can be downloaded from the Qwest Wholesale WEB Page at <http://www.qwest.com/wholesale/cmp/changerequest.html>.

Product/Process and System CRs may be submitted to Qwest via e-mail at: cmpcr@qwest.com

To input data to the form, use the Tab Key to navigate between each field. The following fields on the CR Form must be completed as a minimum, unless noted otherwise:

Submitted By

- Enter the date the CR is being submitted to the Qwest CMP Manager.
- Enter Company's name and Submitter's name, title, and email/Phone#.
- Optional – identify potential available dates Submitter is available for a Clarification Meeting.
- Optional – enter a Company Internal Reference No. to be identified.

Proprietary Submission

- If the CR is proprietary (i.e., confidential) and is meant to be directed only to your account manager and not flow through the CMP, then select "Yes". If the CR is not proprietary and is meant to flow through the CMP, then select "No". If this field is left blank, the default will be "No".

Area of Change Request

- Select the type of CR that is being submitted (Product, Process, or Systems).

Title of Change

- Enter a title for this CR. This should concisely describe the CR in a single sentence.

Description of Change

- Describe the Functional needs of the change being requested. To the extent practical, please provide examples to support the functional need. Also include the business benefit of this request.

Expected Deliverables

- Enter the desired outcome required of Qwest (e.g. revised process, clarification, improved communication, etc.).

Products Impacted – Optional

- To the extent known, check the applicable products that are impacted by the CR.

APPENDIX D

Area Impacted – Optional

- To the extent known, check the applicable process areas that are impacted by the CR.

OSS Interfaces Impacted – Optional

- To the extent known, check the applicable systems that are impacted by the CR.

Qwest's CMP Manager will complete the remainder of the Form.

DEFINITION OF TERMS

Term	Definition
CLEC #162	Competitive Local Exchange Carrier (CLEC) is is an entity authorized to provide Local Exchange Service that does not otherwise qualify as an Incumbent Local Exchange Carrier. A telecommunications provider that has authority to provide local exchange telecommunications service on or after February 8, 1996, unless such provider has been declared an Incumbent Local Exchange Carrier under the Federal Telecommunications Act of 1996.
CLEC Operating Procedures Impacting #110, #137, #179	[Team to define][AT&T Comment: we should discuss the status of this relative to the product/process tiers we recently discussed.]
Software Defects	A problem with a system software that is not working according to the Technical Specifications or that and is causing detrimental impacts to the users.
Design, Development, Notification, Testing, Implementation and Disposition #106	<p>Design: To plan out in a systematic way. Design at Qwest includes the Business Requirements Document and the Systems Requirements Documents. These two documents are created to define the requirements of a Change Request (CR) in greater detail such that programmers can write system code software to implement the CR.</p> <p>Development: The process of writing code to create changes to a computer system—or sub systems software that have been documented in the Business Requirements and Systems Requirements.</p> <p>Notification: The act or an instance of providing information. Various specific notifications are documented throughout the CMP. [AT&T Comment: we assume this refers to the overall CMP and not a subset, like Design or Development] Notifications apply to both Systems and Product & Process changes</p> <p>Testing: The process of confirming verifying that the capabilities of a new software Release were developed in accordance with the Technical Specifications and will performs as expected. Testing would apply to both Qwest internal testing and joint Qwest/CLEC testing.</p>

Term	Definition
	<p>Implementation: The execution of the steps and processes necessary in order to make a new Version release of a computer system available in a particular environment. These environments are usually testing environments or production environments.</p> <p>Disposition: A final settlement as to the treatment of a particular Change Request. CR final disposition can be [rejected, implemented or canceled. [AT&T Comment: we still have an issue around the criteria for rejection.]</p>
Good Faith	"Good faith" means honesty in fact and the observance of reasonable commercial standards of fair dealing.
Level of Effort	Qwest determines the work effort to implement a Change Request by people hours. This information allows Qwest and CLECs to rank change requests during prioritization against the capacity for a specific Major Release.
Non-Coding Changes	Non-coding changes do not require a CLEC to make OSS Interface coding changes but may affect CLEC operations or processes.
OSS Interface	Existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users.
<p>OSS Application to Application Interface Testing</p> <p><input type="checkbox"/> Controlled Production Testing #182</p> <p><input type="checkbox"/> Initial Implementation Testing #182</p>	<p>Controlled Production process is designed to validate CLEC ability to transmit transactions EDI [AT&T Comment: limited to EDI?] data that meets X12-industry standards and complies with Qwest business rules. Controlled Production consists of submitting requests to the Qwest production environment for provisioning as production orders with limited volumes. Qwest and CLEC use Controlled Production results to determine operational readiness for full production turn-up.</p> <p>This type of application-to-application testing allows a CLEC to validate its technical development of an OSS Interface before turn-up in production of new transactions or significantly changed capabilities. [AT&T Comments: Is this the first time a CLEC codes to an interface or does this apply for each Release the CLEC</p>

Term	Definition
codes to? If to each Release, how is this different from Interoperability testing?	
<input type="checkbox"/> Interoperability Testing Environment #182	A production copy of IMA. (except during production transition to a new release)[AT&T Comment: What does this mean?? In addition, how is the Interoperability Test Environment different from Interoperability Testing?] It interfaces directly with Qwest's production systems for pre-order and order submission processing. As a result, all interoperability pre-order queries and order transactions are subjected to the same edits as production orders. A CLEC uses account data valid in Qwest production systems for creating scenarios on Qwest-provided templates, obtains approval on these scenario templates, and then submits a minimum set of test scenarios for all transactions it wishes to perform in production. Interoperability testing provides CLECs with the opportunity to validate technical development efforts and to quantify processing results. [AT&T Comment: clarify that this uses the production OSS and the Business processing layer. Does it include back-end systems, i.e., PREMIS or the SOP?]
<input type="checkbox"/> Level of Effort	Estimated range of hours required to implement a Change Request
<input type="checkbox"/> Migration Testing #182	Process to test in the Customer Testing Environment a subsequent application-to-application Release from a previous Release. This type of testing allows a CLEC to move from one Version-release to a subsequent releaseVersion of a specific OSS Interface.
<input type="checkbox"/> Regression Testing #182	Process to test, in the Customer Test Environment, OSS Interfaces, business process or other related interactions. Regression Testing is primarily for use with 'no intent' toward meeting any Qwest entry or exit criteria within an implementation process. Regression Testing includes testing transactions previously tested, or certified.
Qwest #162	An Incumbent Local Exchange Carrier required to offer and provide to any requesting CLEC network interconnection, access to Unbundled Network Elements, ancillary services, and Telecommunications Services for resale pursuant to the Telecommunications Act of 1996.
Release • Major Release	A Release is an implementation of changes resulting from a CR or production support issue using for a particular OSS Interface that may include enhancements. There are two three types of releases

Term	Definition
<ul style="list-style-type: none"> • Point Release • Patch Release 	<p>may include enhancements. There are two-three types of releases for IMA. [AT&T Comment: this definition is limited to IMA. Shouldn't it be broader?]:</p> <ul style="list-style-type: none"> • Major Release may be CLEC impacting (to systems code and CLEC operating procedures) via EDI changes, GUI changes, technical changes, or all. Major Releases are the primary vehicle for implementing systems Change Requests of all types (Regulatory, Industry Guideline, CLEC-originated and Qwest-originated). • Point Release may not be CLEC code impacting, but may affect CLEC operating procedures. The point release is used to fix bugs introduced in previous releases, technical changes, make changes to the GUI, and/or deliver enhancements to IMA disclosed in a major release that could not be delivered in the timeframe of the major release. • Patch Release is a specially scheduled system change for the purpose of installing the software required to resolve an issue associated with a trouble ticket.
Release Production Date	<p>??The Release Production Date is the date that a software Release is first available to the CLECs for issuance of production transactions.</p>
Sub-systems #162	<p>A collection of tightly coupled software modules that is responsible for performing a one or more specific functions [AT&T comment: should this be "one or more specific functions"?] in an OSS interface.</p>
Stand-alone Testing Environment (SATE) #182	<p>A Stand-alone Alone Testing Environment is a test environment that can be used by CLECs for Initial Implementation Testing, Migration Testing and Regression Testing [AT&T Comment: any others?]. SATE takes CLEC pre-order and order transaction requests, passes the requests to the stand-alone database, and returns responses to the CLEC user. SATE uses pre-defined test account data and requests that are subject to the same BPL IMA/EDI edits as those used in production. The SATE is intended to mirror the production environment (including simulation of all legacy systems). SATE is part of the Customer Test Environment.</p>
Technical Specifications #141	<p>Detailed documentation that contains all of the information that a CLEC will need in order to build a particular version-release of an OSS application-to-application interface. Technical Specifications include:</p> <ul style="list-style-type: none"> • A chapter for each transaction or product which includes a

Term	Definition
	<p>business (OBF forms to use) description, a business model (electronic transactions needed to complete a business function), trading partner access information, mapping examples, data dictionary</p> <p>Technical Specification Appendices for IMA may include:</p> <ul style="list-style-type: none"> • Developer Worksheets • IMA Additional Edits (edits from backend OSS systems) • Developer Worksheets Change Summary (field by field, release by release changes) • EDI Mapping and Code Conversion Changes (release by release changes) • Facility Based Directory Listings • Generic Order Flow Business Model <p>The above list may vary for non-IMA application to application interfaces</p>
Version	A version is the same as an OSS Interface Release (Major or Point Release)

<i>Term</i>	<i>Definition</i>
CUSTOMER CLEC	Party originating a request (LSR)
INTERFACE	A mechanism to communicate between customerCLEC/provider or trading partners (e.g., paper, GUI, gateway) A new interface is the providerQwest's introduction of paper, GUI, gateway, etc., to all customerCLECs for the first time. A change to an interface may include: <ul style="list-style-type: none"> Paper to GUI Changes of EDI to CORBA
ISSUE	The specific OBF LSOG Issue (e.g., Local Services Ordering Guidelines (LSOG) document, Issue 5, August 2000)
PROVIDER	Party receiving request (LSR)
RELEASE	Implementation of version (Type 3 change) using a particular interface. A release may include enhancements or customization (Type 1,2,4 or 5 change) to an LSOG version by a provider as well as customerCLEC/provider business requirements.
VERSION	The supported OBF LSOG Issue (e.g., Local Services Ordering Guidelines (LSOG) document, Issue 5, August 2000) (Type 3 change)

GLOSSARY OF TERMS

ANSI	American National Standards Institute
ATIS	Alliance for Telecommunications Industry Solutions
CMP	Change Management Process
ECIC	Electronic Communications Implementation Committee
EDI	Electronic Data Interchange
FCC	Federal Communications Commission
GUI	Graphical User Interface
ITU	International Telecommunications Union
LOI	Letter of Intent
LSR	Local Service Request
NRIC	Network Reliability and Interoperability Council
OBF	Ordering and Billing Forum
OIS	Outstanding Issue Solution
OSS	Operational Support Systems
POC	Point Of Contact
RN	Release Notification
TCIF	Telecommunications Industry Forum

Field	Checklist	Description	Instructions	Action Required
1	Optional	Optional field for the initiator to use for internal tracking. The request may be generated prior to submission into the ProviderQwest's change control process.	No action	
2	Mandatory	Date Change Request sent to Provider.	Return to Sender	Date entry required
3	Mandatory	Indicate type of Change Request: CustomerCLEC or Provider initiated Industry Standard or Regulatory.	Return to Sender	Company designation required
4	Mandatory	Enter company name for the Change Request.	Return to Sender	Company name required
5	Mandatory	Enter originating company's Change Control Initiator's name.	Return to Sender	Initiator's name required
6	Mandatory	Enter originating company's Change Control Initiator's phone number.	Return to Sender	Initiator's phone number required
7	Mandatory	Enter originating company's Change Control Initiator's Email address.	Return to Sender	Initiator's Email address required
8	Mandatory	Enter originating company's Change Control Initiator's fax number.	Return to Sender	Initiator's fax number required
9	Mandatory	Enter originating company's alternate contact name.	Return to Sender	Alternate contact name required

Field	Checklist	Description	Instructions	Action Required
10	Mandatory	Enter originating company's alternate contact phone number.	Return to Sender	Alternate contact number required
11	Mandatory	For the purpose of referencing the Change Request, assign a short, but descriptive name.	Return to Sender	Title required—maximum length 40 characters.
12	Mandatory	Identify request category for the Change Request.	Return to Sender	Category required
13	Mandatory	Identify originating company assessment of impact	Return to Sender	Entry required
14	Mandatory	Describe the proposed Change Request, indicating the purpose and benefit of request. If additional space is needed, use additional sheet.	Return to Sender	Description of Change Request required
15	Mandatory	Indicate any known dependencies relative to the Change Request. If none are known, enter "None known".	Return to Sender	Entry required
16	Mandatory	Indicate whether additional information accompanies/supports the proposed Change Request. If yes, list all documents attached or reference where they can be found, including internet address and standards reference, if applicable.	Return to Sender	Supporting documentation must accompany request
17	Mandatory Provider	A Change Request Log Number generated by the "Change Request Logging system" upon receipt of the Change Request. The number should be sent back to the initiator on the acknowledgment receipt. This # will be used to track the Change Request.	Return to Sender	Log number—system generated
18	Conditional Provider	Indicates whether clarification is needed on the Change Request.	Return to Sender	
19	Conditional Provider	Date clarification request sent to Initiator.		
20	Conditional Provider	Date clarification due back from Initiator.	Return to Sender	
21	Mandatory Provider	Indicate status of proposed Change Request (i.e., clarification, validation, pending, etc)		
22	Mandatory Provider	Assign date when Change Request will appear on agenda.	Return to Sender	
23	Mandatory Provider	A soft date for implementation. Updated based on Candidate Release Package info.		

Field	Checklist	Description	Instructions	Action Required
24	Mandatory Provider	Field that communicates who last updated the request.		
25	Mandatory Provider	Field that communicates when the last update occurred.		
26	Mandatory Provider	Change Request results captured from the Change Review meeting.		
27	Conditional Provider	Cancelled Change Request reasoning.	Return to Sender	
28	Conditional Provider	Concurrence with Change Request originating company. Show date of concurrence.	Return to Sender	
29	Conditional Provider	Change Request Escalation indication.		
30	Conditional Provider	Detailed description of the escalation considerations.		
31	Mandatory Provider	Indicate agreed release date from Project Release Plan.		
32	Mandatory Provider	Results of Internal Defect Validation		

APPENDIX B: CHANGE REQUEST PRIORITIZATION FORM

Item #	Change Request #	Description of Change Request	Customer CLEC Rankings	Comments

DEFINITION OF TERMS		82

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

CHANGE MANAGEMENT PROCESS (CMP)

The highlighted portions of this document describe Qwest's current processes. These provisions may be modified through the redesign process.

1.0 INTRODUCTION AND SCOPE

This document defines the processes for change management of OSS interfaces, products and processes (including manual) as described below. CMP provides a means to address changes that support or affect pre-ordering, ordering/provisioning, maintenance/repair and billing capabilities and associated documentation and production support issues for local services provided by CLECs to their end users.

The CMP is managed by CLEC and Qwest representatives each having distinct roles and responsibilities. The CLECs and Qwest will hold regular meetings to exchange information about the status of existing changes, the need for new changes, what changes Qwest is proposing, how the process is working, etc. The process also allows for escalation to resolve disputes, if necessary.

Qwest will track changes to OSS interfaces, products and processes. The CMP includes the identification of changes and encompasses, as applicable, Qwest will process any such changes in accordance with the CMP described in this document.

In cases of conflict between the changes implemented through the CMP and any CLEC interconnection agreement (whether based on the Qwest SGAT or not), the rates, terms and conditions of such interconnection agreement shall prevail as between Qwest and the CLEC party to such interconnection agreement. In addition, if changes implemented through the CMP do not necessarily present a direct conflict with a CLEC interconnection agreement, but would abridge or expand the rights of a party to such agreement, the rates, terms and conditions of such interconnection agreement shall prevail as between Qwest and the CLEC party to such agreement.

The CMP is dynamic in nature and, as such, is managed through the regularly scheduled meetings. The parties agree to act in Good Faith in exercising their rights and performing their obligations pursuant to this CMP. This document may be revised, through the procedures described in Section 2.0.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

2.0 MANAGING THE CHANGE MANAGEMENT PROCESS

2.1 Managing the Change Management Process Document

The Change Management Process is dynamic in nature. Proposed modifications to the CMP framework shall be originated by means of discussion at any of the regularly scheduled Monthly Product/Process CMP meetings (standing agenda item at the Monthly Product/Process CMP meetings).

The initiator of the change would send an email with the redlined language and the reasons for the request attached at least 14 days in advance of the Product & Process CMP meeting. The request initiator would present the proposal to the CMP participants. The parties would develop a process for input into the proposed change. To incorporate a change into the CMP requires unanimous agreement. Each proposal will be assigned a unique tracking number. Date, version and history log for the CMP. Include the proposal in the distribution package and on the agenda. The requested change will be reviewed at one CMP meeting and voted on no earlier than the following CMP meeting.

2.2 Change Management Point-of-Contact (POC)

Qwest and each CLEC will designate primary and secondary change management POC(s) who will serve as the official designees for matters regarding this CMP. The primary POC is the official voting member, and a secondary (alternate) POC can vote in the absence of the primary POC for each CLEC. CLECs and Qwest will exchange POC information including items such as:

- Name
- Title
- Company
- Telephone number
- E-mail address
- Fax number
- Cell phone/Pager number

2.3 Change Management POC List

Primary and secondary CLEC POCs should be included in the Qwest maintained POC list. It is the CLEC responsibility to notify Qwest of any POC changes. The list will be made available to all participating CLECs with the permission of the POCs.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

2.4 Qwest CMP Responsibilities

2.4.1 CMP Managers

The Qwest CMP Product/Process Manager is the Qwest Product/Process POC and is responsible for properly processing submitted CRs, conducting the Monthly CMP Product/Process Meeting, assembling and distributing the meeting distribution package, and ensuring minutes are written and distributed in accordance with the agreed-upon timeline.

The Qwest CMP Systems Manager is the Qwest Systems POC and is responsible for properly processing submitted CRs, conducting the Monthly CMP Systems Meeting, assembling and distributing the meeting distribution package, and ensuring minutes are written and distributed in accordance with the agreed-upon timeline. The CMP Systems Manager also distributes the list of CRs eligible for prioritization to Qwest and the CLECs for ranking, tabulates the rankings, and forwards the resulting prioritization of the CRs to Qwest and the CLECs. In addition, the CMP Systems Manager is responsible for coordinating the publication of any Qwest OSS Interface release notification schedules.

2.4.2 Change Request Project Manager (CRPM)

The Qwest CRPM manages CRs throughout the CMP CR lifecycle. The CRPM is responsible for obtaining a clear understanding of exactly what deliverables the CR originator requires to close the CR, arranging the CR clarification meetings and coordinating necessary Subject Matter Experts (SMEs) from within Qwest to respond to the CR and coordinate the participation of the necessary SMEs in the discussions with the CLECs.

2.4.3 Escalation/Dispute Resolution Manager

The Escalation/Dispute Resolution Manager is responsible for managing escalations and disputes in accordance with the CMP Escalation Process and Dispute Resolution Process.

2.5 Method of Communication

The method of communication is e-mail with supporting information posted to the web site when applicable (see Section 3.3 Qwest Wholesale CMP Web Site). Communications sent by e-mail resulting from CMP will include in the subject line "CMP". Email communications regarding document changes will include direct web site links to the related documentation.

Redlined PCATs and Technical Publications associated with product, process, and systems changes will be posted to the Qwest CMP Document Review Web site, <http://www.qwest.com/wholesale/cmp/review.html>. For the duration of the agreed upon comment period CLECs may submit comments on the proposed documentation change. At the

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users.

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

Qwest CMP Document Review Web site CLECs may submit their comments on a specific document by selecting the "Submit Comments" link associated with the document. The "Submit Comments." link will take CLECs to an HTML comment template. If for any reason the "Submit" button on the site does not function properly, CLEC may submit comments to cmpcomm@qwest.com. After the conclusion of the applicable CLEC comment period Qwest will aggregate all CLEC comments with Qwest responses and distribute to all CLECs via Notification email within the applicable period.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

3.0 MEETINGS

Change Management meetings will be conducted on a regularly scheduled basis, at least two consecutive days on a monthly basis. Meeting participants can choose to attend meetings in person or participate by conference call.

Meetings are held to review, prioritize, manage the implementation of process and system changes and address change management requests. Qwest will review the status of all applicable change requests. The meeting may also include discussions of Qwest's development view.

CLEC's request for additional agenda items and associated materials should be submitted to Qwest at least five (5) business days by noon (MT) in advance of the meeting. Qwest is responsible for distributing the agenda and associated meeting materials at least three (3) business days by noon (MT) in advance of the meeting. Qwest will be responsible for preparing, maintaining, and distributing meeting minutes. Attendees with any walk-on items should bring materials of the walk-on items to the meeting.

All attendees, whether in person or by phone, must identify themselves and the company they represent.

Additional meetings may be held at the request of Qwest or any CLEC. Meeting notification must contain an agenda plus any supporting meeting materials. These meetings should be announced at least five (5) business days prior to their occurrence. Exceptions may be made for emergency situations.

3.1 Meeting Materials [Distribution Package] for Change Management Meeting

Meeting materials should include the following information:

- Meeting Logistics
- Minutes from previous meeting
- Agenda
- Change Requests and responses
 - New/Active
 - Updated
 - Log
- Issues, Action Items Log and associated statuses
- Release Summary
- 12 Month Development View
- Monthly System Outage Report

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

- Any other material to be discussed

Qwest will provide Meeting Materials (Distribution Package) electronically by noon 3 business days prior to the Monthly CMP Meeting. In addition, Qwest will provide hard copies of the Distribution Package at the Monthly CMP Meeting.

3.2 Meeting Minutes for Change Management Meeting

Qwest will take minutes. Qwest will summarize discussions in meeting minutes and include any revised documents such as Issues, Action items and statuses.

Minutes should be distributed to meeting participants for comments or revisions no later than five (5) business days by noon (MT) after the meeting. CLEC comments should be provided within two (2) business days by noon (MT). Revised minutes, if CLEC comments are received, should be distributed within nine (9) business days by noon (MT) after the meeting.

3.3 Qwest Wholesale CMP Web Site

To facilitate access to CMP documentation, Qwest will maintain CMP information on its web site. The web site should be easy to use and updated in a timely manner. The Web site should be a well organized central repository for CLEC notifications and CMP documentation. Active documentation including meeting materials (Distribution Package), should be maintained on the website. Change Requests and release notifications should be identified in accordance with the agreed upon naming convention, to facilitate ease of identification. Qwest will maintain closed and old versions of documents on the web site's Archive page for 18 months before storing off line. Information that has been removed from the web site can be obtained by contacting the appropriate Qwest CMP Manager. At a minimum, the CMP web site will include:

- Current version of Qwest CMP document describing the CMP's purpose and scope of setting forth the CMP objectives, procedures, and timelines, including release life cycles.
- Calendar of release dates
- OSS hours of availability
- Links to related web sites, such as IMA EDI, IMA GUI, CEMR, and Notices
- Current CMP escalation process
- CMP prioritization process description and guidelines
- Change Request form and instructions to complete form
- Submitted and open Change Requests and the status of each
- Responses to Change Requests and written responses to CLEC inquiries
- Meeting (formal and informal) information for CMP monthly meetings and interim meetings or conference calls, including descriptions of meetings and participants, agendas, minutes, sign-up forms, and schedules
- A log of each type of change requests and associated status histories

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,

04-08-02, 04-16-02, 04-23-02, 05-02-02

- Meeting materials (distribution package)
- Meeting minutes
- Release announcements and other CLEC notifications and associated requirements
- Directory to CLEC notifications for the month
- Business rules, SATE test case scenarios technical specifications, and user guides will be provided via links on the CMP web site.
- Contact information for the CMP POC list, including CLEC, Qwest and other participants (with participant consent to publish contact information on web page).
- Redlined PCAT and Technical Publications - see Section 2.5
- Instructions for receiving CMP communications – see Section 2.5

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

4.0 TYPES OF CHANGE

A Change Request should fall into one of the following classifications:

4.1 Regulatory Change

A Regulatory Change is mandated by regulatory or legal entities, such as the Federal Communications Commission (FCC), a state commission/authority, or state and federal courts, or as agreed to by Qwest and CLECs. Regulatory changes are not voluntary but are requisite to comply with newly passed legislation, regulatory requirements, or court rulings. Either the CLEC or Qwest may initiate the change request.

4.2 Industry Guideline Change

An Industry Guideline Change implements Industry Guidelines using a national implementation timeline, if any. Either Qwest or the CLEC may initiate the change request. These guidelines are industry defined by:

- Alliance for Telecommunications Industry Solutions (ATIS) Sponsored
- Ordering and Billing Forum (OBF)
- Local Service Ordering and Provisioning Committee (LSOP)
- Telecommunications Industry Forum (TCIF)
- Electronic Commerce Inter-exchange Committee (ECIC)
- Electronic Data Interface Committee (EDI)
- American National Standards Institute (ANSI)

4.3 Qwest Originated Change

A Qwest Originated change is originated by Qwest does not fall within the changes listed above and is within the scope of CMP.

4.4 CLEC Originated Change

A CLEC Originated change is originated by the CLEC does not fall within the changes listed above and is within the scope of CMP.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

5.0 CHANGE REQUEST PROCESS

5.1 CLEC-Qwest OSS Interface Change Request Process

A CLEC or Qwest seeking to change an existing OSS interface, to establish a new OSS interface, or to retire an existing OSS interface must submit a Change Request (CR). A Change Request originator will complete and email a completed Change Request (CR) Form to the Qwest Systems CMP Manager in accordance with the instructions set forth in the Qwest Wholesale CMP Web site located at the following URL: <http://www.qwest.com/wholesale/cmp/index.html>. The CR Process supports Regulatory, Industry Guideline, CLEC-initiated and Qwest-initiated changes. The process for Regulatory or Industry Guideline changes will be managed as described in Section 5.1.1. and Section 5.1.2 below.

5.1.1 Regulatory or Industry Guideline Change Request

The party submitting a Regulatory or Industry Guideline CR must also include sufficient information to justify the CR being treated as a Regulatory or Industry Guideline CR in the CR description section of the CR form. Such information must include specific references to regulatory or court orders, legislation, or industry guidelines as well as dates, docket or case number, page or paragraph numbers and the mandatory or recommended implementation date, if any.

Qwest or any CLEC may submit Regulatory and Industry Guideline CRs. Qwest will send CLECs a notice when it posts Regulatory or Industry Guideline CRs to the web site and identify when comments are due, as described below. Regulatory and Industry Guideline CRs will also be identified in the CMP Systems Monthly Meeting Distribution Package. The upcoming meeting agenda will identify that consensus is required if a CR constitutes a Regulatory or Industry Guideline change. Not later than 8 business days prior to the CMP Systems Monthly meeting, any party objecting to the classification of such CR as Regulatory or Industry Guideline must submit a statement documenting reasons why the objecting party does not agree that the CR should be classified as Regulatory or Industry Guideline change. Regulatory and Industry Guideline CRs may not be presented as walk-on items.

If Qwest or any CLEC has objected to the classification of a CR as Regulatory or Industry Guideline, that CR will be discussed at the next monthly Change Management Systems Meeting. At that meeting, Qwest and the CLECs will attempt to agree that the CR is Regulatory or Industry Guideline. If Qwest or any CLEC does not agree that the CR is Regulatory or Industry Guideline, the CR will be treated as a non-Regulatory, non-Industry Guideline CR and prioritized with the CLEC-originated and Qwest-originated CRs, unless and until the CR is declared to be Regulatory or Industry Guideline through dispute resolution. Final determination

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

of CR type will be made by the CLEC and Qwest POC at that monthly meeting, and documented in the meeting minutes.

5.1.2 Implementation of Regulatory CRs

As a general rule, a Regulatory Change will be implemented by mechanization unless all parties agree otherwise, as described below. Accordingly, all Regulatory CRs initially must be submitted as Systems CRs, including when the regulatory CR clearly is for a Product or Process change, and will be introduced at the monthly CMP Systems meeting. If the Regulatory CR originator seeks to establish that the CR should be implemented by a manual process, the originator must so indicate on the CR form and include as much information supporting the application of the exception as practicable.

For each Regulatory CR, Qwest will provide a cost analysis for both a manual and a mechanized solution. The cost analyses will include a description of the work to be performed and any underlying estimates that Qwest has performed associated with those costs. Qwest will also provide an estimated level of effort expressed in terms of person hours required for the mechanized solution. The cost analysis will be based on factors considered by Qwest, which may include volume, number of CLECs, technical feasibility, parity with retail, or effectiveness/feasibility of a manual process.

The Regulatory CR will be implemented by a manual solution if there is a majority vote in favor of one of the following exceptions by Qwest and CLECs present at the monthly CMP Systems meeting.

A. The mechanized solution is not technically feasible.

or

B. There is a significant difference in the costs for the manual and mechanized solutions. Cost estimates will allow for direct comparisons between solutions using comparable methodologies and time periods.

Any party that desires to present information to establish an exception may do so at the monthly Systems CMP meeting when the implementation plan is presented

After the implementation plan has been discussed at the CMP Systems meeting at which the CR is presented, Qwest will request that a POC of each CLEC and Qwest indicate the respective preferences regarding the exception, e.g., by a show of raised hands. The majority vote decision will apply unless the outcome of a dispute resolution alters such decision. The results will be reflected in the meeting minutes.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

In addition to Exceptions A or B, the parties that are present at the CMP Systems meeting at which the CR is presented can, upon unanimous agreement, decide to vary from the general rule regarding Regulatory CR implementation in any respect. For example, the parties at the CMP Systems meeting at which the CR is presented can agree that a Regulatory CR will be implemented by a manual solution for any reason other than those described in Exceptions A and B. If the Regulatory CR originator seeks to establish that a variance should apply, the originator must so indicate on the CR form and include in the CR as much information supporting the application of the exception as practicable.

If any party present objects to voting on the exception or variance at the monthly CMP Systems meeting at which the CR is presented, then Qwest will request that a POC of each CLEC and Qwest indicate whether they prefer to postpone the vote until the next monthly CMP Systems meeting, e.g., by a show of raised hands. The majority vote decision will apply. The results of the vote will be reflected in the meeting minutes. If appropriate, additional discussion regarding the CR will be held at the next monthly CMP Systems meeting prior to the vote.

Once a Regulatory CR has been agreed upon to be implemented by a manual solution, the CR will be, from that point forward, tracked as a Product/Process CR through the monthly CMP Product/Process meetings.

If Qwest is unable to fully implement a mechanized solution in the first release that occurs after the CMP participants agree that a change has been mandated, Qwest's implementation plan for the mechanized solution may include the short-term implementation of a manual work-around until the mechanized solution can be implemented. In that situation, a single systems Regulatory CR will be used for the implementation of both the manual and mechanized changes. Qwest will continue to work that Regulatory CR until the mechanized solution is implemented.

If a regulatory CR is implemented by a manual process and later it is determined that a change in circumstance warrants a mechanized solution, Qwest or any CLEC may submit a new systems CR which must include evidence of the change in circumstance, such as an estimated volume increase or changes in technical feasibility, and the number of the CR that was implemented using a manual process. The CR originator may request that the CR be treated as a Regulatory CR. If Qwest or any CLEC does not agree to treat the CR as a Regulatory Change, it will be treated as a Qwest or CLEC initiated change.

Any party that disagrees with the majority decision regarding Exceptions A and B may initiate dispute resolution pursuant to the CMP Dispute Resolution provisions.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

5.1.3 CR Initiation Process

Within two (2) business days after receipt of a valid CR Qwest's CMP Systems Manager will assign a CR Number for tracking purposes, assign a Change Request Project Manager (CRPM), acknowledge receipt of the CR by e-mail to the CR Originator and issue the CR internally for management through the process. The CR will be assigned the status of Submitted and become an active CR reported in Qwest's CLEC Change Request Systems Interactive Report located on the Qwest Wholesale CMP web site.

Within four (4) business days after receipt of a valid CR, Qwest will post the valid CR to the CMP web site via Qwest's Interactive Report. The report will contain the CR details, originator identity, assigned CRPM, assigned CR Number and, when practicable, the designated Qwest SME and associated Director.

Within eight (8) business days of receipt of a complete CR, the CRPM coordinates and holds a Clarification Meeting with the CR Originator and Qwest's SME(s). If the originator is not available within the above specified time frame, then the clarification meeting will be held at a mutually agreed upon time. Qwest may not provide a response to a CR until a clarification meeting has been held.

At the clarification meeting, Qwest and the Originator will review the submitted CR, validate the intent of the Originator's CR, clarify all aspects, identify all questions to be answered, and determine deliverables to be produced. After the clarification meeting has been held, the CRPM will document and issue meeting minutes within five (5) business days.

CRs submitted 21 calendar days (3 weeks) prior to the next scheduled CMP Meeting will be presented at that CMP meeting for clarification from all CLECs participating in the CMP Meeting. Prior to the CMP Systems Meeting the CRPM will post responses to Systems CRs to the CMP database. The response will be made available via the Interactive Reports and via the Distribution Package for the CMP Systems Meeting. The Originator will present its CR and provide any business reasons for the CR. Items or issues identified during the previously held clarification meeting will be relayed. CLECs participating in the CMP Meeting will be given the opportunity to comment on the CR and provide additional clarifications. If appropriate, Qwest's SME(s) will identify options and potential solutions to the CR. Clarifications and/or modifications related to the CR will be incorporated into the evaluation of the CR. Consensus will be obtained from the participating CLECs as to the appropriate direction/solution for Qwest's SME to take in responding to the CR if applicable.

CRs that are not submitted 21 calendar days prior to the CMP Meeting may be introduced at that CMP Meeting as a walk-on item. The Originating CLEC will present its CR and participating CLECs will be allowed to provide comments to the CR. Qwest will provide a status of the CR.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

All Qwest Draft Responses issued will be presented at the next scheduled CMP Meeting. Qwest will conduct a walk through of the response and participating CLECs will be provided the opportunity to discuss, clarify and comment on Qwest's Response. Qwest's Responses will be either:

- "Accepted" (Qwest will implement the CLEC request) with position stated, or
- "Denied" (Qwest will not implement the CLEC request) with basis for the denial, including reference to substantiating material. CLEC-initiated OSS Interfaces change request may be denied for one or more of the following reasons.
 - Technologically not feasible—a technical solution is not available
 - Regulatory ruling/Legal implications—regulatory or legal reasons prohibit the change as requested, or if the request benefits some CLECs and negatively impact others (parity among CLECs) (Contrary to ICA provisions)
 - Outside the Scope of the Change Management Process—the request is not within the scope of the Change Management Process (as defined in this CMP), seeks adherence to existing procedures, or requests for information
 - Economically not feasible—low demand, cost prohibitive to implement the request, or both.
 - The requested change does not result in a reasonably demonstrable business benefit (to Qwest or the requesting CLEC) or customer service improvement.

Qwest will not deny a CR solely on the basis that the CR involves a change to back-end systems. Qwest will apply these same concepts to CRs that Qwest initiates. The SCRP may be invoked if a CR was denied due to economically not feasible—refer to Section 10.3 SCRP.

Based on the comments received from the CMP Meeting, Qwest may revise its response and issue a revised draft response at the next CMP Meeting.

If CLECs do not accept Qwest's response, they may elect to escalate or dispute the CR in accordance with the agreed upon CMP escalation or Dispute Resolution procedures. If the originating CLEC does not agree with the determination to escalate or pursue the dispute resolution, it may withdraw its participation from the CR and any other CLEC may become responsible for pursuing the CR Escalation upon providing written notice to the Qwest CMP Manager. The CR will be assigned the status of Escalated and remain an active CR. Qwest will note in the status history of the interactive reports that the CR has been escalated. However, the CR status will reflect the stage of the CR as it progresses through the CR lifecycle.

If the CLECs do not accept Qwest's response and do not intend to escalate or dispute at the present time, they may request Qwest to status the CR as 'Deferred.' The CR will remain as Deferred and CLECs may activate or close the CR at a later date.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

At the last Systems CMP meeting before Prioritization, Qwest will facilitate the presentation of all CRs eligible for Prioritization. At this meeting Qwest will provide a high level estimate of the Level of Effort of each CR and the estimated total capacity of the release. This estimate will be an estimate of the number of person hours required to incorporate the CR into the release. Ranking will proceed, as described in Section x: Prioritization. The results of the ranking will produce a release candidate list.

5.2 CLEC-Qwest OSS Interface Change Request Lifecycle

Based on the release candidate list, Qwest will begin its development cycle that includes the following milestones:

5.2.1 Business and Systems Requirements

Qwest engineers define the business and functional specifications during this phase. The specifications are completed on a per candidate basis in priority order. During business and system requirements, any candidates which have affinities and may be more efficiently implemented together will be discussed. Candidates with affinities are defined as candidates with similarities in functions or software components. Qwest will also present any complexities, changes in candidate size, or other concerns that may arise during business or system requirements, which would impact the implementation of the candidate. During the business and systems requirement efforts, CRs may be modified or new CRs may be generated (by CLECs or Qwest), with a request that the new or modified CRs be considered for addition to the release candidate list (late added CRs). If the CMP body grants the request to consider the late added CRs for addition to the release candidate list, Qwest will size the CR's requirements work effort. If the requirements work effort for the late added CRs can be completed by the end of system requirements, the release candidate list and the new CRs will be prioritized by CLECs in accordance with the agreed upon Prioritization Process (see Section xx). If the requirements work effort for the late added CRs cannot be completed by the end of system requirements, the CR will not be eligible for the release and will be returned to the pool of CRs that are available for prioritization in the next OSS interface release.

5.2.2 Packaging

At the conclusion of system requirements, Qwest will present packaging option(s) for implementing the release candidates. Packaging options are defined as different combinations of candidates proposed for continuing through the next stage of development. Packaging options may not exist for the release; i.e., there may only be one straightforward set of

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

candidates to continue working through the next stage of development. Options may be identified due to:

- affinities in candidates
- resource constraints which prevent some candidates from being implemented but allow others to be completed.

Qwest will provide an updated level estimate of the Level of Effort of each CR and the estimated total capacity of the release. If more than one option is presented, a vote will be held within 2 days after the meeting on the options. The option with the largest number of votes will continue through the design phase of the development cycle.

5.2.3 Design

Qwest engineers define the architectural and code changes required to complete the work associated with each candidate. The design work is completed on the candidates, which have been packaged.

5.2.4 Commitment

After design, Qwest will present a final list of candidates which can be implemented. Qwest will provide an updated level estimate of the Level of Effort of each CR and the estimated total capacity of the release. These candidates become the committed candidates for the release.

5.2.5 Code & Test

Qwest engineers will perform the coding and testing by Qwest required to complete the work associated with the committed candidates. The code is developed and baselined before being delivered to system test. A system test plan (system test cases, costs, schedule, test environment, test data, etc.) is completed. The system is tested for meeting business and system requirements, certification is completed on the system readiness for production, and pre-final documentation is reviewed and baselined. If in the course of the code and test effort, Qwest determines that it cannot complete the work required to include a candidate in the planned release, Qwest will discuss options with the CLECs in the next CMP meeting. Options can include either the removal of that candidate from the list or a postponement in the release date to incorporate that candidate. If the candidate is removed from the list, Qwest will also advise the CLECs whether or not the candidate could become a candidate for the next point release, with appropriate disclosure as part of the current major release of the OSS interface. Alternatively, the candidate will be returned to the pool of CRs that are available for prioritization in the next OSS interface release.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

5.2.6 Deployment

During this phase Qwest representatives from the business and operations review and agree the system is ready for full deployment. The release is deployed and production support initiated and conducted.

During any phase of the lifecycle, a candidate may be requested to be removed by the requesting CLEC. If that occurs, the candidate will be discussed at the next CMP meeting or in a special emergency meeting, if required. The candidate will only be removed from further phases of development if there is unanimous agreement by the CLECs and Qwest at that meeting.

When Qwest has completed development of the OSS interface change, Qwest will release the OSS interface functionality into production for use by the CLECs.

Upon implementation of the OSS interface release, the CRs will be presented for closure at the next CMP monthly meeting.

5.3 CLEC Product/Process Change Request Initiation Process

If a CLEC wants Qwest to change a Product/Process the CLEC e-mails a completed Change Request (CR) Form to the Qwest Product/Process CMP Manager. Within 2 business days Qwest's Product/Process CMP Manager reviews CR for completeness, and requests additional information from the CR originator, if necessary, within two (2) business days after Qwest receives a complete CR:

- The Qwest CMP manager assigns a CR Number and logs the CR into the CMP Database.
- The Qwest CMP Manager forwards the CR to the CMP Group Manager,
- The Qwest CMP manager sends acknowledgment of receipt to the CR submitter and updates the CMP Database.

Within two (2) business days after acknowledgement:

- The Qwest CMP Manager posts the complete CR to the CMP Web site
- The CMP Group Manager assigns a Change Request Project Manager (CRPM) and identifies the appropriate Director responsible for the CR.
- The CRPM obtains from the Director the names of the assigned Subject Matter Expert(s) (SME).
- the CRPM will provide a copy of the detailed CR report to the CR originator which includes the following information:
 - Description of CR
 - originating CLEC
 - assigned CRPM contact information

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

- assigned CR number
- designated Qwest SMEs and associated director(s)
- Within eight (8) business days after receipt of a complete CR, the CRPM Coordinates and holds a Clarification Meeting with the Originating CLEC and Qwest's SMEs. If the originating CLEC is not available within the above specified time frame, then the clarification meeting will be held at a mutually agreed upon time. Qwest will not provide a response to a CR until a clarification meeting has been held.
- At the Clarification Meeting, Qwest and the Originating CLEC review the submitted CR, validate the intent of the Originating CLEC's CR, clarify all aspects, identify all questions to be answered, and determine deliverables to be produced. After the clarification meeting has been held, The CRPM will document and issue meeting minutes within five (5) business days. Qwest's SME will internally identify options and potential solutions to the CR
- CRs received twenty one calendar days prior to the next scheduled CMP meeting will be presented at that CMP Meeting. CRs that are not submitted by the above specified cut-off date may be presented at that CMP meeting as a walk-on item with current status. The Originating CLEC will present its CR and provide any business reasons for the CR. Items or issues identified during the previously held Clarification Meeting will be relayed. Then, participating CLECs will be given the opportunity to comment on the CR and subsequent clarifications. Clarifications and/or modifications related to the CR will be incorporated. Qwest's SME will present options and potential solutions to the CR. consensus will be obtained from the participating CLECs as to the appropriate direction/solution for Qwest's SME to take in responding to the CR.
- Subsequently, Qwest will develop a draft response based on the discussion from the Monthly CMP Meeting. Qwest's Responses will be:
 - "Accepted" (Qwest will implement the CLEC request) with position stated, or
 - "Denied" (Qwest will not implement the CLEC request) with basis for the denial, including reference to substantiating material. CLEC-initiated OSS Interfaces change request may be denied for one or more of the following reasons.
 - Technologically not feasible—a technical solution is not available
 - Regulatory ruling/Legal implications—regulatory or legal reasons prohibit the change as requested, or if the request benefits some CLECs and negatively impact others (parity among CLECs) (Contrary to ICA provisions)
 - Outside the Scope of the Change Management Process—the request is not within the scope of the Change Management Process (as defined in this CMP), seeks adherence to existing procedures, or requests for information
 - Economically not feasible—low demand, cost prohibitive to implement the request, or both.
 - The requested change does not result in a reasonably demonstrable business benefit (to Qwest or the requesting CLEC) or customer service improvement.
 - Qwest will not deny a CR solely on the basis that the CR involves a change to the back-end systems.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

- Qwest will apply these same concepts to CRs that they initiate.
- SCRPM may be invoked if a CR was denied due to Economically not feasible.
- At least one (1) week prior to the next scheduled CMP meeting, The CRPM will have the response posted to the Web, added to CMP Database, and will notify all CLECs via email

All Qwest Responses will be presented at the next scheduled CMP meeting by Qwest, who will conduct a walk through of the response. Participating CLECs will be provided the opportunity to discuss, clarify and comment on Qwest's Response

Based on the comments received from the Monthly Meeting, Qwest' may revise its response and issue a modified response at the next monthly CMP meeting. Within ten (10) business days after the CMP meeting, Qwest will notify the CLECs of Qwest's intent to modify its response.

If the CLECs do not accept Qwest's response, any CLEC can elect to escalate the CR in accordance with the agreed upon CMP Escalation or dispute resolution Procedures. If the originating CLEC does not agree with the determination to escalate or pursue the dispute resolution, it may withdraw its participation from the CR and any other CLEC may become responsible for pursuing the CR upon providing written notice to the Qwest CMP manager. Qwest will note in the status history of the interactive reports that the CR has been escalated. However, the CR status will reflect the stage of the CR as it progresses through the CR lifecycle.

If the CLECs do not accept Qwest's response and do not intend to escalate or dispute at the present time, they may request Qwest to status the CR as deferred. The CR will be statused Deferred and CLECs may activate or close the CR at a later date.

The CLECs' acceptance of Qwest's response may result in:

- The response answered the CR and no further action is required;
- The response provided an implementation plan for a product or process to be developed;
- Qwest Denied the CLEC CR and no further action is required by CLEC.

If the CLECs have accepted Qwest's response, Qwest will provide notice of planned implementation in accordance with time frames defined in the CMP. If necessary, Qwest may request that CLECs provide input during the development stage. Qwest will then deploy the Qwest recommended implementation plan.

After Qwest's revised/new product or process is placed into production, CLECs will have no longer than 60 calendar days to evaluate the effectiveness of Qwest's revised/new product, or process, provide feedback, and indicate whether further action is required. Continual process improvement will be maintained.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Finally, the CR will be closed when CLECs determine that no further action is required for that CR.

5.4 Qwest Initiated Product/Process Changes

The following defines five levels of Qwest-initiated product/process changes and the process by which Qwest will initiate and implement these changes. None of the following shall be construed to supersede timelines or provisions mandated by federal or state regulatory authorities, certain CLEC facing websites (e.g., ICONN and Network Disclosures) or individual interconnection agreements. Each notice will state that it does not supercede individual interconnection agreements. The lists provided below are exhaustive/ finite but may be modified by agreement of the parties. Qwest will utilize these lists when determining the disposition (e.g., Level 0–4) to which new changes should be categorized. The changes that go through these processes are not changes to OSS Interfaces. Level 1-4 changes under this process will be tracked and differentiated by level in the History Log.

5.4.1 Level 0 changes

Level 0 changes are defined as changes that do not change the meaning of documentation and do not alter CLEC operating procedures. Level 0 changes are effective immediately without notice.

Level 0 Change Categories are:

- Font and typeface changes (e.g., bold to un-bold or bold to italics)
- Capitalization
- Spelling corrections and typographical errors other than numbers that appear as part of an interval or timeframe.
- Hyphenation
- Acronym vs. non-acronym (e.g., inserting words to spell out an acronym)
- Symbols (e.g., changing bullets from circles to squares for consistency in document)
- Word changes from singular to plural (or vice versa) to correct grammar
- Punctuation
- Changing of a number to words (or vice versa)
- Changing a word to a synonym
- Contact personnel title changes where contact information does not change
- Alphabetize information
- Indenting (left/right/center justifying for consistency)
- Grammatical corrections (making a complete sentence out of a phrase)
- Corrections to apply consistency to product names (i.e., "PBX - Resale" changed to "Resale - PBX")
- Moving paragraphs/sentences within the same section of a document to improve readability

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

- Hyperlink corrections within documentation
- Remove unnecessary repetitive words in the same paragraph or short section.

For any change that Qwest considers a Level 0 change that does not specifically fit into one of the categories listed above, Qwest shall issue a Level 3 notification.

5.4.1.1 Level 0 Process/Deliverables

For Level 0 changes, Qwest will not provide a notification, web change form, or history log to CLECs. Changes to the documentation will be updated and posted immediately.

5.4.2 Level 1 changes

Level 1 changes are defined as changes that do not alter CLEC operating procedures or changes that are time critical corrections to a Qwest product or process. Time critical corrections may alter CLEC operating procedures, but only if such Qwest product or process has first been implemented through the appropriate level under CMP. Level 1 changes are effective immediately upon notice.

Level 1 Change Categories are:

- Time Critical Corrections to information that adversely impacts CLECs ability to conduct business with Qwest
- Corrections/clarifications/additional information that does not change the product or process
- Correction to synch up related PCAT documentation with the primary PCAT documentation that was modified through a higher level change (notice needs to include reference to primary PCAT documentation)
- Document corrections to synch up with existing OSS Interfaces documentation (notice needs to include reference to OSS Interfaces documentation)
- Process options with no mandatory deadline, that do not supercede the existing processes and that do not impose charges, regardless of whether the CLEC exercises the option
- Modifications to Frequently Asked Questions that do not change the existing product or process
- Re-notifications issued within 6 months after initial notification (notice will include reference to date of initial notification or, if not available, reference to existing PCAT)
- Regulatory Orders that mandate a Product/Process change to be effective in less than 21 days
- Training information (note: if a class is cancelled, notification is provided 2 weeks in advance)
- URL changes with redirect link

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

For any change that Qwest considers a Level 1 change that does not specifically fit into one of the categories listed above, Qwest shall issue a Level 3 notification.

5.4.2.1 Level 1 Process/Deliverables

For Level 1 changes, Qwest will provide a notification to CLECs. Level 1 notifications will state the disposition (e.g. Level 1), description of change, changes are effective immediately, that there is no comment cycle and will advise CLECs to contact the CMP Manager, by email at cmpr@qwest.com, immediately if the change alters the CLECs' operating procedures and requires Qwest's assistance to resolve. Qwest will promptly respond to the CLEC and work to resolve the issue. In addition, Qwest will provide the following for PCAT and NonFCC Technical Publication ("Tech Pub") changes:

- A web notification form that includes an exact cut and paste of the changes highlighted in green (PCAT) or redlined (Technical Publications). If necessary, additional text above and below the changes will be provided for context.
- A history log that tracks the changes

5.4.3 Level 2 changes

Level 2 changes are defined as changes that have minimal effect on CLEC operating procedures. Qwest will provide notice of Level 2 changes at least 21 calendar days prior to implementation.

Level 2 Change Categories are:

- Contact Information updates excluding time critical corrections (includes email, fax, TN, personnel changes)
- Changes to a form that do not introduce changes to the underlying process
- Changes to eliminate/replace existing Web functionality will be available for 21 days until comments are addressed. (either a demo or screen shot presentation will be available at the time of the notification for evaluation during the 21 day cycle.)
- Removal of data stored under an archive URL
- Elimination of a URL re-direct
- Addition of new Web functionality (e.g., CNLA)
- Re-notifications issued 6 months or more after the initial notification (notice will include reference to date of initial notification or, if not available, reference to existing PCAT)
- Documentation concerning existing processes/products not previously documented
- Changes to manually generated notifications normally transmitted to CLECs through their OSS interfaces that are made to standardize or clarify, but do not change the reasons for, such notifications.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

- LSOG/PCAT documentation changes associated with new OSS Interface release documentation resulting from an OSS interface CR
- Reduction to an interval in Qwest's SIG

For any change that Qwest considers a Level 2 change that does not specifically fit into one of the categories listed above, Qwest shall issue a Level 3 notification.

5.4.3.1 Level 2 Process/Deliverables

For Level 2 changes, Qwest will provide a notice to CLECs. Level 2 notifications will state the disposition (e.g. level 2), description of change, proposed implementation date, and CLEC/Qwest comment cycle timeframes. In addition to the notice, any documentation changes required to PCATs and Non-FCC Tech Pubs (red-line for Tech Pubs and green highlights for PCATs) will be available for review in the Document Review section of the CMP Website (<http://www.qwest.com/wholesale/cmp/review.html>), commonly known as the document review site. In the document review site, a comment button will be available next to the document to allow CLECs to provide comments. For Level 2 changes that do not impact PCATs or NonFCC Tech Pubs, a comments link will be provided within the notification for comments.

Qwest must provide initial notice of Level 2 changes at least 21 calendar days prior to implementation and adhere to the following comment cycle:

- CLECs have 7 calendar days following initial notification of the change to provide written comments on the notice
- Qwest will reply to CLEC comments no later than 7 calendar days following the CLEC cut-off for comments. The Qwest reply will also include confirmation of the implementation date.
- Qwest will implement no sooner than 21 calendar days from the initial notification.

CLECs may provide General comments regarding the change (e.g., clarification, request for modification, request to change the disposition level). Comments must be provided during the comments cycle as outlined for level 2 changes.

If a CLEC requests to change the disposition level, CLECs and Qwest will discuss such requests at the next monthly Product/Process CMP meeting. In the event that timing doesn't allow for discussion at the upcoming CMP meeting Qwest will call a special ad hoc meeting to address the request. If the parties are not able to reach consensus on any such request, CLECs and Qwest will take a vote of the parties in attendance at the meeting. The result will be determined by the majority. If the disposition Level of a change is modified, from the date of the modification forward such change will proceed under the modified Level with notifications and timelines agreed to by the participants.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

For general comments, Qwest will respond to comments and provide a final notice of the change. Additionally, Qwest will provide documentation of proposed changes to Qwest PCATs and NonFCC Tech Pubs available to CLECs and implement the change(s) according to the timeframes put forth above. If there are no CLEC comments, a final notice will not be provided and the changes will be effective according to the date provided in the original notification.

If the CLECs do not accept Qwest's response, any CLEC may elect to escalate or pursue dispute resolution in accordance with the agreed upon CMP Escalation or Dispute Resolution procedures.

5.4.4 Level 3 changes

Level 3 changes are defined as changes that have moderate effect on CLEC operating procedures and require more lead-time before implementation than Level 2 changes. Qwest will provide initial notice of Level 3 changes at least 31 calendar days prior to implementation.

Level 3 Change Categories are:

- NC/NCI code changes
- Adding of new features to existing products (excluding resale)
- Customer-facing Center hours and holiday schedule changes
- Modify/change existing manual process
- Expanding the availability and applicability or functionality of an existing product or existing feature (excluding resale)
- Regulatory Orders that mandate a Product/Process change to be effective in 21 days or more

For any change that Qwest considers a Level 3 change that does not specifically fit into one of the categories listed above, Qwest shall issue a Level 3 notification.

5.4.4.1 Level 3 Process/Deliverables

For Level 3 changes, Qwest will provide a notice to CLECs. Level 3 notifications will state the disposition (e.g. level 3), description of change, proposed implementation date, and CLEC/Qwest comment cycle timeframes. Level 3 notifications will only include Level 3 Changes, excluding notification of changes to Tech Pubs. For Level 3 notifications that Qwest believes represent a new change category under Level 0, Level 1, Level 2, Level 3, or Level 4, Qwest should propose such new change category in the notice and CLECs and Qwest will discuss the proposal in the next monthly Product & Process CMP meeting. In addition to the notice, any documentation changes required to PCATs and Non-FCC Tech Pubs (red-line for Tech Pubs and green highlights for PCATs) will be available for review in the Document Review section of the CMP Website (<http://www.qwest.com/wholesale/cmp/review.html>), commonly

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

known as the document review site. In the document review site, a comment button will be available next to the document to allow CLECs to provide written comments. For Level 3 changes that do not impact PCATs or Non-FCC Tech pubs, a link will be provided within the notification for comments.

Qwest will provide initial notice of Level 3 changes at least 31 calendar days prior to implementation and adhere to the following comment cycle:

- CLECs have 15 calendar days following initial notification of the change to provide written comments on the notice
- Qwest will reply to CLEC comments no later than 15 calendar days following the CLEC cut-off for comments. The Qwest reply will also include confirmation of the implementation date. In the event there are extenuating circumstances, (e.g. requested change requires significant research, information is required from national standards body or industry (e.g. Telcordia)), Qwest's response will indicate the course of action Qwest is taking and Qwest will provide additional information when available. Once the information is available Qwest will provide a notification and any available updated documentation (e.g. Tech Pubs, PCATs) at least 15 calendar days prior to implementation.
- Qwest will implement no sooner than 15 calendar days after providing the response to CLEC comments. For example, if there are no CLEC comments, Qwest may send out a final notification on the first day following the CLEC cut-off for comments (day 16 after the initial notification). Thus, implementation would be 31 days from the initial notification. However, if Qwest does not respond to the CLEC comments until the 15th day after the CLEC cut-off for comments, the earliest possible implementation date would be 45 calendar days from the initial notification.

CLEC comments must be provided during the comment cycle as outlined for Level 3 changes. Comments may be one of the following:

- General comments regarding the change (e.g., clarification, request for modification)
- Request to change disposition of Level. If the request is for a change to Level 4, the request must include substantive information to warrant a change in disposition (e.g. business need, financial impact).
- Request to change disposition to a Level 0, Level 1 or Level 2 doesn't have to include substantive information to warrant a change.
- Request for postponement of implementation date, or effective date

For general comments, Qwest will respond to comments and provide a final notice of the change. Additionally, Qwest will provide documentation of proposed changes to Qwest PCATs and Non FCC Tech Pubs available to CLECs and implement the change(s) according to the timeframes put forth above.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

CLECs and Qwest will discuss requests to change the disposition Level of noticed changes, or to establish new change categories under Levels 0 – 4, at the next monthly Product & Process CMP meeting. In the event that the parties are not able to reach consensus on any such request, CLECs and Qwest will take a vote of the parties in attendance at the meeting. The result will be determined by the majority. If the disposition Level of a change is modified, from the date of the modification forward such change will proceed under the modified Level with notifications and timelines agreed to by the participants. Except that, within five (5) business days after the disposition level is changed to a Level 1, Qwest will provide a Level 1 notification. When a change to the disposition Level of a particular notice also suggests that a new category of change be established under one of the Levels, a separate vote shall be taken for each.

For a request for postponement, Qwest will follow the procedures as outlined in Section XX of this document.

If the CLECs do not accept Qwest's response, any CLEC may elect to escalate or pursue dispute resolution in accordance with the agreed upon CMP Escalation or Dispute Resolution procedures.

5.4.5 Level 4 Changes

Level 4 changes are defined as changes that have a major effect on existing CLEC operating procedures or that require the development of new procedures. Level 4 changes will be initiated using the CMP CR process and provide CLEC an opportunity to have input into the development of the change prior to implementation.

Level 4 Change Categories are:

- New products, features, services (excluding resale)
- Increase to an interval in Qwest's SIG
- Changes to CMP
- New PCAT/Tech Pub for new processes
- New manual process
- Limiting the availability and applicability or functionality of an existing product or existing feature
- Addition of a required field on a form excluding mechanized forms that are changed through an OSS interface CR

For any change that Qwest considers a Level 4 change that does not specifically fit into one of the categories listed above, Qwest shall issue a Level 3 notification.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

5.4.5.1 Level 4 Process/Deliverables

Qwest will submit a completed Change Request no later than 14 calendar days prior to the CMP Product and Process Monthly Meeting. At a minimum, each Change Request will include the following information:

- A description of the proposed change
- A proposed implementation date (if known)
- Indication of the reason for change (e.g., regulatory mandate)
- Basis for disposition of level 4

Within two (2) business days from receipt of the CR:

- The Qwest CMP manager assigns a CR Number and logs the CR into the CMP Database.
- The Qwest CMP Manager forwards the CR to the CMP Group Manager.
- The Qwest CMP manager sends acknowledgment of receipt to the CR submitter and updates the CMP Database.

Within two (2) business days after acknowledgement,

- The Qwest CMP Manager posts the complete CR to the CMP Web site
- The CMP Group Manager assigns a Change Request Project Manager (CRPM) and identifies the appropriate Director responsible for the CR
- The CRPM identifies the CR subject matter expert (SME) and the SME's Director.
- The CRPM will provide a copy of the detailed CR report to the CR originator which includes the following information:
 - Description of CR
 - Assigned CRPM
 - Assigned CR number
 - Designated Qwest SME(s) and associated director(s)

Qwest will present the Change Request at the monthly Product and Process CMP meeting. The purpose of the presentation will be to:

- Clarify the proposal with the CLECs
- Confirm the disposition (e.g., level 4) of the Change (see below). If during the CMP meeting CLECs agree to change the disposition, then the type of change being made will be added to the list for the disposition to which it is changed.
- Propose suggested input approach (e.g., a 2 hour meeting, 4 meetings over a two week period, etc.), and obtain consensus for input approach.
- Confirm deadline, if change is mandated
- Provide proposed implementation date, if applicable

At the monthly CMP meeting, the parties will discuss whether to treat the Change Request as a Level 4 change. If the parties agree, the Change Request will be reclassified as a Level 0, 1, 2

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

or 3 change, and the change will follow the process set forth above for Level 0, 1, 2, or 3 changes, as applicable. If the parties do not agree to reclassify the Change Request as a Level 0, 1, 2 or 3 change, the following process will apply:

- The parties will develop a process for Qwest to obtain CLEC input into the proposed change. Examples of processes for input include, but are not limited to, one-day conferences, multi-day conferences, or written comment cycles.
- After completion of the input cycle, as defined during the CMP meeting, Qwest will modify the CR, if necessary, and design the solution considering all CLEC input.
- For Level 4 changes, when the solution is designed and all documentation is available for review, a notice of the planned change is provided to the CLECs. Level 4 notifications will only include Level 4 Changes, excluding notification of changes to Tech Pubs. This notice will be provided at least 31 calendar days prior to implementation. The notice will contain reference to the original CR, proposed implementation date, and the CLEC/Qwest comment cycle. In addition, any documentation changes required to PCATs and Non-FCC Tech Pubs will be available for review in the document review site (red-line for Tech Pubs and green highlighting for PCAT) with a Comment button available to provide written comments. For Level 4 changes that do not impact PCATs or NonFCC Tech Pubs, a comments link will be provided within the notification.
- CLECs have 15 calendar days following notification of the planned change to provide written comments on the notice
- Qwest will reply to CLEC comments no later than 15 calendar days following the CLEC cut-off for comments. The Qwest reply will also include confirmation of the implementation date. In the event there are extenuating circumstances, (e.g. requested change requires significant research, information is required from national standards body or industry (e.g. Telcordia)), Qwest's response will indicate the course of action Qwest is taking and Qwest will provide additional information when available. Once the information is available Qwest will provide a notification and any available updated documentation (e.g. Tech Pubs, PCATs) at least 15 calendar days prior to implementation.
- Qwest will implement no sooner than 15 calendar days after providing the response to CLEC comments. For example, if there are no CLEC comments, Qwest may send out a final notification on the first day following the CLEC cut-off for comments (day 16 after the initial notification). Thus, implementation would be 31 days from the initial notification. However, if Qwest does not respond to the CLEC comments until the 15th day after the CLEC cut-off for comments, the earliest possible implementation date would be 45 calendar days from the initial notification.

CLEC comments must be provided during the comment cycle as outlined for Level 4. CLEC comments may be one of the following:

- General comments regarding the change (e.g., clarification, request for modification)

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

- Request for postponement of implementation, or effective date for which comments are being provided.

For general comments, Qwest will respond to comments and provide a final notice of the change. Additionally, Qwest will provide documentation of proposed changes to Qwest PCATs and NonFCC Tech Pubs available to CLECs and implement the change(s) according to the timeframes put forth above.

For a request to postponement, Qwest will follow the procedures as outlined in Section XX of this document.

If the CLECs do not accept Qwest's response, any CLEC may elect to escalate the CR or pursue dispute resolution in accordance with the agreed upon CMP Escalation or Dispute Resolution procedures.

5.5 Crossover Change Requests

During the operation of the CMP, there may be situations when Systems CRs have requirements for Product/Process discussion or solution, or when Product/Process CRs require System solutions. These crossover CR situations exist in three basic categories.

Category A. If a CR submitted to the Product/Process CMP is discovered to require a mechanized solution the following will occur:

- Qwest will open a Systems CR with a reference to the Product/Process CR number;
- Qwest will close the Product/Process CR with a reference to the new Systems CR number.
- This CR will comply with the CMP Systems CR process.

Category B. If a CR submitted to the Systems CMP is discovered to require a manual solution the following will occur:

- Qwest will open a Product/Process CR with a reference to the Systems CR number;
- Qwest will close the Systems CR with a reference to the new Product/Process CR number.
- This CR will comply with the CMP Product/Process CR process.

Category C. If a CR submitted to the Systems CMP is discovered to require an interim manual solution, the CR will be tracked as a Systems CR for the length of the CR lifecycle including the development and implementation of both the interim manual and final mechanized solutions.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

The determination to close and open CRs as described above will be made by the CMP body at a monthly CMP meeting.

If a CR becomes a crossover CR, Qwest may request an ad hoc Clarification Meeting with the CR submitter or request that a portion of the appropriate CMP Monthly Meeting be devoted to discussing the CR. If a CR is closed in one CMP arena and opened in the other, the new CR will retain the status, where feasible, and the date submitted of the old, "closed" CR. Under no circumstances will the CR be restarted.

All crossover CRs will be distinctly labeled in the CMP Monthly Meeting distribution packages and addressed as a separate item on the CMP Monthly Meeting agenda.

All Regulatory and Industry Guideline CRs will be submitted as Systems CRs and maintained in the Systems database until closure, or until they are deemed to require a manual process solution, at which point they will become Product/Process CRs.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

6.0 OSS INTERFACE RELEASE CALENDAR

Qwest will provide a rolling 12 month OSS Interface release calendar in the distribution package of the first scheduled CMP Systems Meeting of each quarter. The calendar will show release schedules, for all OSS Interfaces within the scope of CMP starting in that quarter and for a total of 12 months in the future. The schedule entries will be made when applicable for application to application interfaces:

- Name of OSS Interface
- Date for CMP CR Submission Cutoff
- Date for issuing Draft Release Notes
- Date when Initial Notice for New Interfaces and Interface Retirements will be issued; date when comparable functionality will be available.
- Date for issuing Initial or Draft Technical Specifications
- Comment cycle timeline
- Prioritization, packaging and commitment timeline
- Date for issuing Final Technical Specifications
- Testing period
- Date for issuing Final Release Notes
- Planned Implementation Date
- Release sunset dates

The release calendar will be posted on the CMP web site as a stand-alone document.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

7.0 INTRODUCTION OF A NEW OSS INTERFACE

The process for introducing a new interface will be part of the CMP. Introduction of a new OSS interface may include an application-to-application or a Graphical User Interface (GUI).

It is recognized that the planning cycle for a new interface, of any type, may be greater than the time originally allotted and that discussions between CLECs and Qwest may be held prior to the announcement of the new interface.

With a new interface, CLECs and Qwest may define the scope of functionality introduced as part of the OSS Interface.

7.1 Introduction of a New Application-to-Application Interface

At least nine (9) months in advance of the target implementation date of a new application-to-application interface, Qwest will issue a Release Announcement, post the Preliminary Interface Implementation Plan on Qwest's web site, and may host a design and development meeting.

7.1.1 Release Announcement

- Where practicable, the Release Announcement and Preliminary Interface Implementation Plan will include: Proposed functionality of the interface including whether the interface will replace an existing interface
- Proposed implementation time line (e.g., milestone dates, CLEC/Qwest comment cycle)
- Proposed meeting date to review the Preliminary Interface Implementation Plan
- Exceptions to industry guidelines/standards, if applicable
- Planned Implementation Date

7.1.2 CLEC Comments/Qwest Response Cycle and Preliminary Implementation Plan Review Meeting

CLECs have fourteen (14) calendar days from the initial release announcement to provide written comments/questions on the documentation. Qwest will respond with written answers to all CLEC issues within twenty-one (21) calendar days of the Initial Release Announcement. Qwest will review these issues and its implementation schedule at the Preliminary Implementation Plan Review Meeting approximately twenty-eight (28) calendar days after the Initial Release Announcement.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

7.1.3 Initial Interface Technical Specification

Qwest will provide draft technical specifications at least one hundred twenty (120) calendar days prior to implementing the release. In addition, Qwest will confirm the schedule for the walk-through of technical specifications, CLEC comments, and Qwest response cycle.

7.1.4 Initial Notification Content

This notification will contain:

- Purpose
- Logistical information (including a conference line) for walk-through
- Reference to draft technical specifications, or web site
- Additional pertinent material
- CLEC Comment/Qwest Response cycle
- Draft Connectivity and Firewall Rules
- Draft Test Plan

7.1.5 Walk Through of Draft Interface Technical Specifications

Qwest will sponsor a walk through, including the appropriate internal subject matter experts (SMEs), beginning one-hundred and ten (110) calendar days prior to implementation and ending one-hundred and six (106) calendar days prior to implementation. A walk through will afford CLEC SMEs the opportunity to ask questions and discuss specific requirements with Qwest's technical team. CLECs are encouraged to invite their technical experts, systems architects, and designers, to attend the walk through.

7.1.6 Conduct Walk-through

Qwest will lead the review of technical specifications. Qwest technical experts will answer the CLEC SMEs' questions. Qwest will capture action items such as requests for further clarification. Qwest will follow-up on all action items.

7.1.7 CLEC Comments on Draft Interface Technical Specifications

If the CLEC identifies issues or requires clarification, the CLEC must send written comments/concerns to the Systems CMP Manager no later than one-hundred and four (104) calendar days prior to implementation.

7.1.8 Qwest Response to Comments

Qwest will review and respond with written answers to all CLEC issues, comments/concerns and action items captured at the walk through, no later than one hundred (100) calendar days

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

prior to implementation. The answers will be shared with all CLECs, unless the CLECs question(s) are marked proprietary. Any changes that may occur as a result of the responses will be distributed to all CLECs in the final notification letter. The notification will include the description of any change(s) made as a result of CLEC comments. The change(s) will be reflected in the final technical specifications.

7.1.9 Final Interface Technical Specifications

Generally, no less than one hundred (100) calendar days prior to the implementation of the new interface, Qwest will issue the Final Release Requirements to CLECs via web site posting and a CLEC notification.

Final Release Requirements will include:

- Final Notification Letter, including:
 - Summary of changes from Qwest response to CLEC comments on Draft Technical Specifications
 - If applicable, Indication of type of change (e.g., documentation change, business rule change, clarification change)
 - Purpose
 - Reference to final technical specifications, or web site
 - Additional pertinent material
 - Final Connectivity and Firewall Rules
 - Final Test Plan (including Joint Testing Period)
 - Release date

Qwest's planned implementation date will not be sooner than one hundred (100) calendar days from the date of the final release requirements. The implementation time line for the release will not begin until final specifications are provided. Production Support type changes within the thirty (30) calendar day test window can occur without advance notification but will be posted within 24 hours of the change.

7.2 Introduction of a New GUI

Qwest will issue a Release Notification forty-five (45) calendar days in advance of the Release Production Date. This will include:

- Proposed functionality of the interface including whether the new interface will replace an existing interface.
- Implementation time line (e.g., milestone dates, CLEC/Qwest comment cycle, Interface overview date)
- Implementation date
- Logistics for GUI Interface Overview

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

At least twenty-eight (28) calendar days in advance of the target implementation date of a new GUI interface, Qwest will issue a Release Announcement. At a minimum, the Release Announcement will include:

- Draft User Guide
- How and When Training will be administered

7.2.1 Interface Overview

The Interface Overview meeting should be held no later than twenty-seven (27) calendar days prior to the Release Production Date. At the meeting, Qwest will present an overview of the new interface.

7.2.2 CLEC Comments and Qwest Response

At least twenty-five (25) calendar days prior to the Release Production Date, CLECs must forward their written comments and concerns to Qwest. Qwest will consider CLEC comments and may address them with the release of the Final Notification.

7.2.3 Final Notification

Qwest will issue a final notice no less than twenty-one (21) calendar days prior to the Release Production date. The final notice will include:

- A summary of changes from the initial notice, including type of changes (e.g., documentation change, clarification, business rule change).
- Final User Guide
- Final Training information
- Final Implementation date.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Qwest-CLEC Change Management Process Introduction of A New Application-to-Application OSS Interface

The events listed above are intended to occur on business days. If the date on which any event is scheduled to occur falls on a weekend or holiday, then Qwest and the CLECs may negotiate a revised timeline.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users
² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Qwest-CLEC Change Management Process Introduction of A New Graphical User Interface (GUI) Timeline

The events listed above are intended to occur on business days. If the date on which any event is scheduled to occur falls on a weekend or holiday, then Qwest and the CLECs may negotiate a revised timeline.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users
² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

8.0 CHANGE TO EXISTING OSS INTERFACES

At the first CMP systems monthly meeting of each quarter, Qwest will also provide a rolling twelve (12) month view of its OSS interface development schedule.

Qwest standard operating practice is to implement 3 major releases and 3 point releases (for IMA only) within a calendar year. Unless mandated as a Regulatory Change, Qwest will implement no more than four (4) releases per IMA OSS Interface requiring coding changes to the CLEC interfaces within a calendar year. The Major release changes should occur no less than three (3) months apart.

Application-to-Application OSS Interface

Qwest will support the previous major Interconnect Mediated Access (IMA) EDI release for six (6) months after the subsequent major IMA EDI release has been implemented. Past Releases of IMA EDI will only be modified as a result of production support changes. When such production support changes are made, Qwest will also modify the related documentation.. All other changes become candidates for future IMA EDI releases.

Qwest makes one Release of the Electronic Bonding-Trouble Administration (EBTA) and billing interfaces available at any given time, and will not support any previous Releases.

Graphical User Interface (GUI)

Qwest makes one Release of a GUI available at any given time and will not support any previous Releases.

IMA GUI changes for a pre-order or ordering will be implemented at the same time as an IMA EDI release.

8.1 Application-to-Application Interface

This section describes the timelines that Qwest, and any CLEC choosing to implement on the Qwest Release Production Date, will adhere to in changing existing interfaces. ¹For any CLEC not choosing to implement on the Qwest Release Production Date, Qwest and the CLEC will negotiate a mutually agreed to CLEC implementation time line, including testing.

¹ For a CLEC converting from a prior release, the CLEC implementation date can be no earlier than the weekend after the Qwest Release Production Date, if production LSR conversion is required.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

8.1.1 Draft Interface Technical Specifications

Prior to Qwest implementing a change to an existing interface, Qwest will notify CLECs of the draft Technical Specifications. Qwest will provide draft technical specifications at least seventy-three (73) calendar days prior to implementing the release unless an exception has been granted (see Section 8.0) Technical specifications are documents that provide information the CLECs need to code the interface. CLECs have eighteen (18) calendar days from the initial publication of draft technical specifications to provide written comments/questions on the documentation.

8.1.2 Content of Draft Interface Technical Specifications

The Notification letter will contain:

- Written summary of change(s)
- Target time frame for implementation

Draft Technical Specifications documentation, or instructions on how to access the draft Technical Specifications documentation on the Web site.

8.1.3 Walk Through of Draft Interface Technical Specifications

Qwest will sponsor a walk through, including the appropriate internal subject matter experts (SMEs), beginning sixty-eight (68) calendar days prior to implementation and ending no less than fifty-eight (58) calendar days prior to implementation. A walk through will afford CLEC SMEs the opportunity to ask questions and discuss specific requirements with Qwest's technical team. CLECs are encouraged to invite their technical experts, systems architects, and designers, to attend the walk through.

8.1.3.1 Walk through Notification Content

This notification will contain:

- Purpose
- Logistical information (including a conference line)
- Reference to draft technical specifications, or reference to a web site with draft specifications
- Additional pertinent material

8.1.3.2 Conduct the Walk-through

Qwest will lead the review of technical specifications. Qwest technical experts will answer the CLEC SMEs' questions. Qwest will capture action items such as requests for further

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

clarification. Qwest will follow-up on all action items and notify CLECs of responses 45 calendar days prior to implementation.

8.1.4 CLEC's Comments on Draft Interface Technical Specifications

If the CLEC identifies issues or requires clarification, the CLEC must send written comments to the Systems CMP Manager no less than fifty-five (55) calendar days prior to implementation.

8.1.5 Qwest Response to Comments

Qwest will review and respond with written answers to all CLEC issues, comments/concerns no less than forty-five (45) calendar days prior to implementation. The answers will be shared with all CLECs, unless the CLECs question(s) are marked proprietary. Any changes that may occur as a result of the responses will be distributed to all CLECs in the same notification letter. The notification will include the description of any change(s) made as a result of CLEC comments. The change(s) will be reflected in the final technical specifications.

8.1.6 Final Interface Technical Specifications

The notification letter resulting from the CLEC's comments from the Initial Release Notification will constitute the Final Technical Specifications. After the Final Technical Specifications are published, there may be other changes made to documentation or the coding that is documented in the form of addenda. The following is a high level overview of the current disclosure, release and addendum process:

- Draft Developer Worksheets -- 45 days prior to a release the draft Developer Worksheets are made available to the CLEC's.
- Final Disclosure -- 5 weeks prior to a release the Final Disclosure documents, including charts and developer worksheets are made available to the CLECs.
- Release Day -- On release day only those CLECs using the IMA GUI are required to cut over to the new release.
- 1st Addendum -- 2 weeks after the release the 1st addendum is sent to the CLECs.
- Subsequent Addendum's -- Subsequent addendum's are sent to the CLECs after the release as needed. There is no current process and timeline.
- EDI CLECs -- 6 months after the release those CLECs using EDI are required to cut over to the new release. CLECs are not required to support all new releases.

8.1.7 Content of Final Notification Letter

The Final Release will include the following:

- Reference to Final Technical Specifications, or web site
- Qwest response to CLEC comments

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

- Summary of changes from the prior release, including any changes made as a result of CLEC comments on Draft Technical Specifications
- Indication of type of change (e.g., documentation change, business rule change, clarification change)
- Final Joint Test Plan including transactions which have changed
- Joint Testing Period
- Release date

Qwest's planned implementation date will be at least forty-five (45) calendar days from the date of the final release requirements, unless the exception process has been invoked. The implementation time line for the release will not begin until final specifications are provided. Production Support type of changes that occur within the thirty (30) calendar day test window can occur without advance notification but will be posted within 24 hours of the change.

8.1.8 Joint Testing Period

Qwest will provide a thirty (30) day test window for any CLEC who desires to jointly test with Qwest prior to the Release Production Date.

8.2 Graphical User Interface (GUI)

8.2.1 Draft GUI Release Notice

Prior to implementation of a change to an existing interface, Qwest will notify CLECs of the draft release notes and the planned implementation date.

Notification will occur at least twenty-eight (28) calendar days prior to implementing the release unless an exception has been granted. This notification will include draft user guide information if necessary.

CLECs must provide comments/questions on the documentation no less than twenty-five (25) calendar days prior to implementation.

Final notice for the release will be published at least twenty-one (21) calendar days prior to production release date.

8.2.2 Content of Draft Interface Release Notice

The notification will contain:

- Written summary of change(s)
- Target time frame for implementation

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

- Any cross-reference to draft documentation such as the user guide or revised user guide pages.

8.2.3 CLEC Comments on Draft Interface Release Notice

Any CLEC comments must be submitted in writing to the Systems CMP Manager.

8.2.4 Qwest Response to Comments

Qwest will consider CLEC comments and may address them in the final GUI release notice within four (4) calendar days after receipt of CLEC comments.

8.2.5 Content of Final Interface release Notice

CLEC comments to the draft notice may be incorporated into the final notice, which shall include:

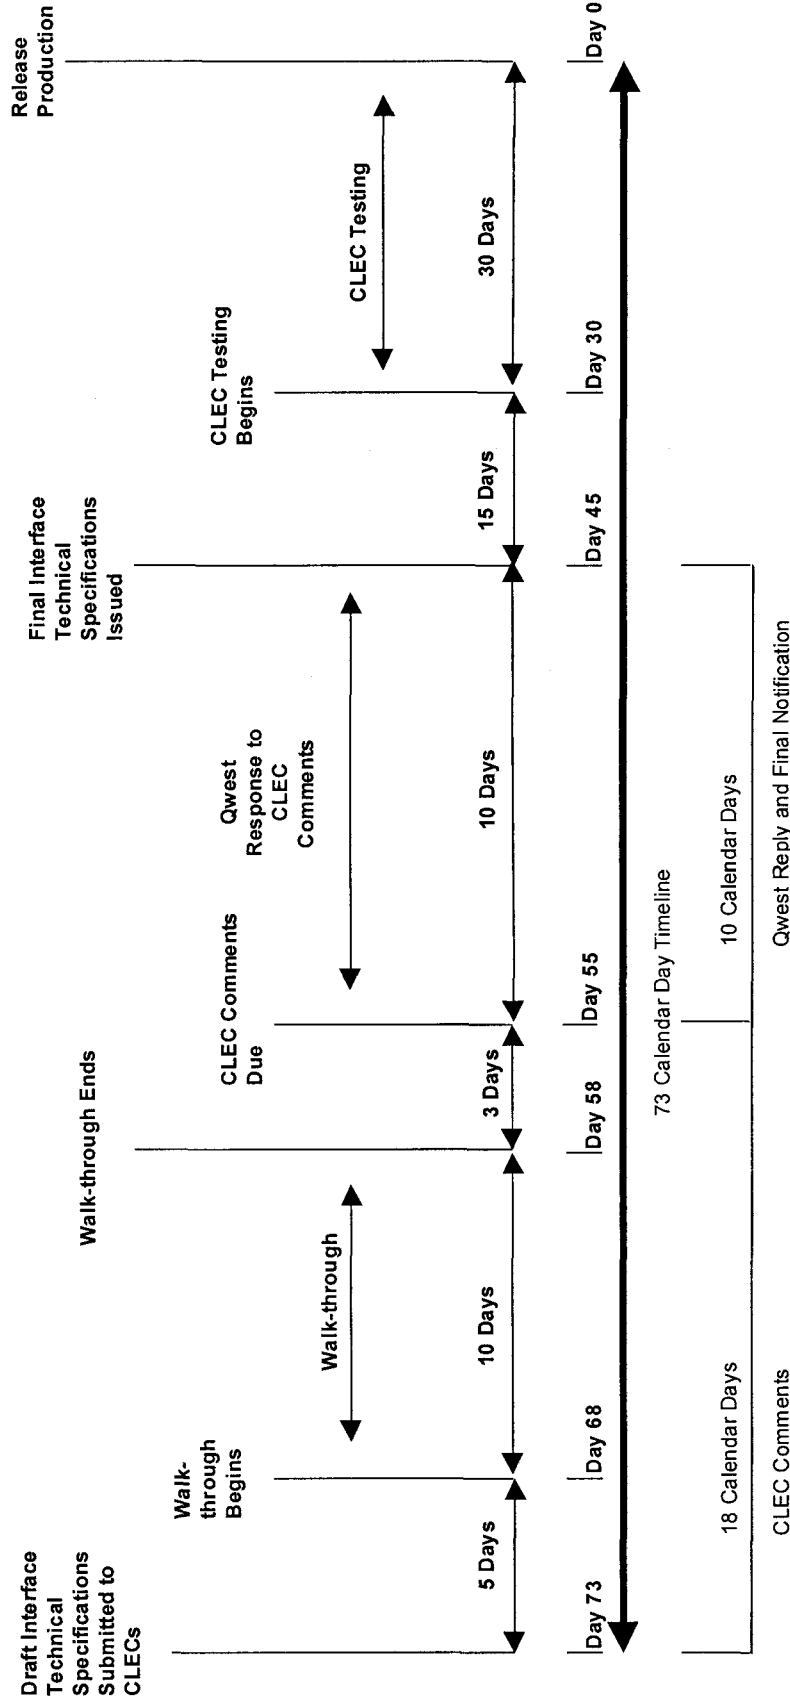

- Final notification letter
- Summary of changes from draft interface release notice
- Final user guide (or revised pages)
- Release date

Qwest's planned implementation date will be no later than twenty-one (21) calendar days from the date of the final release notice. Qwest will post this information on the CMP web site. Production support type changes that occur without advance notification will be posted within 24 hours of the change. The implementation time line for the release will not begin until all related documentation is provided.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Qwest-CLEC Change Management Process Changes to An Existing Application-to-Application OSS Interface Timeline

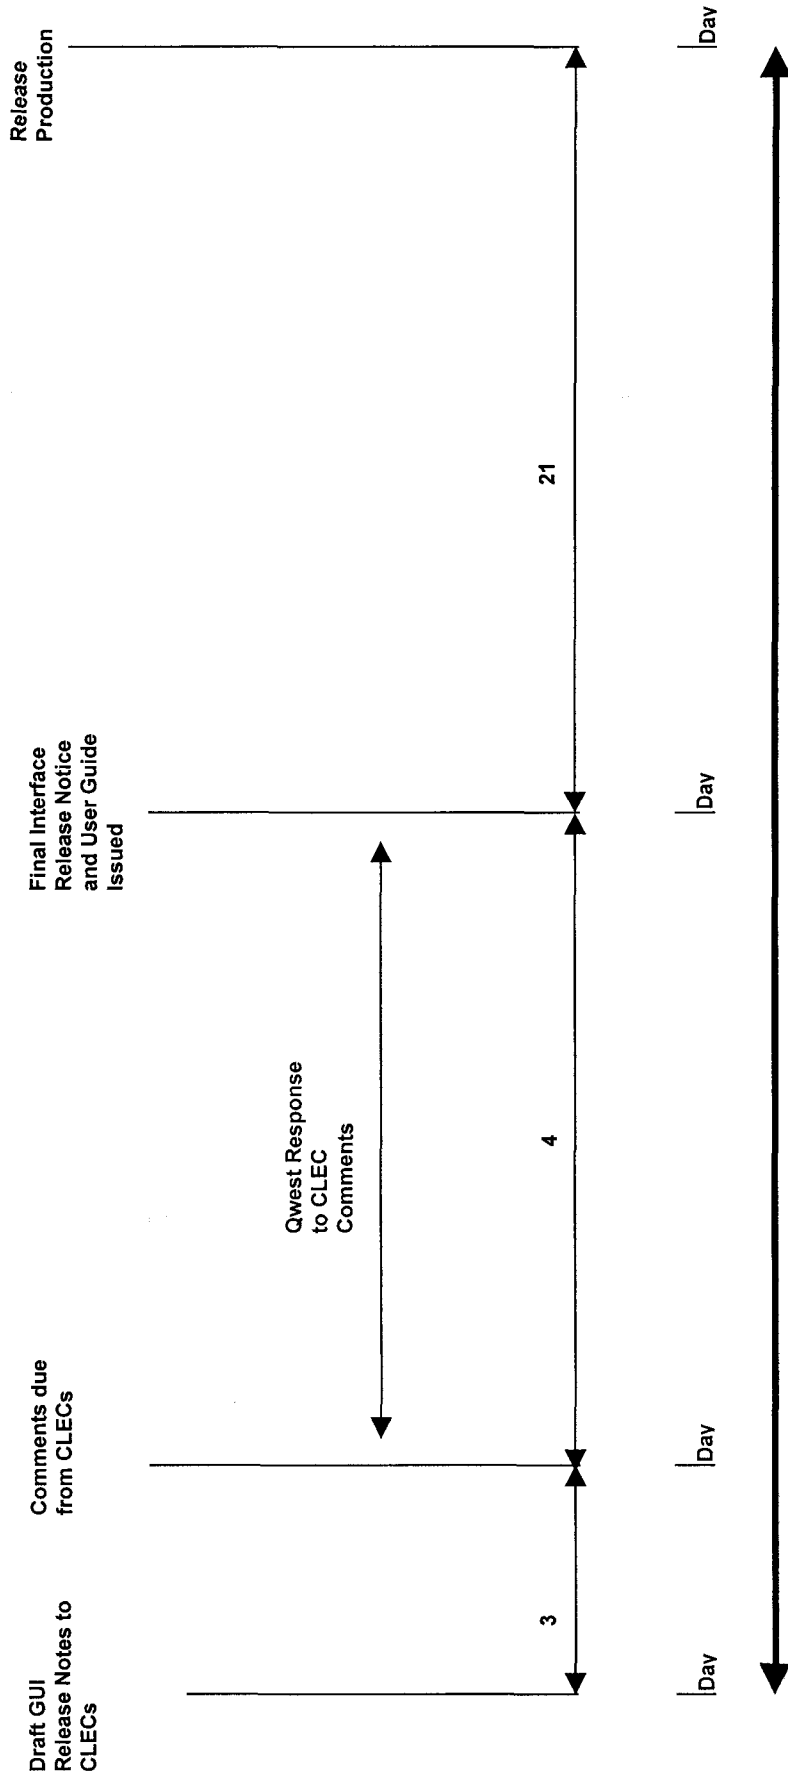

The events listed above are intended to occur on business days. If the date on which any event is scheduled to occur falls on a weekend or holiday, then Qwest and the CLECs may negotiate a revised timeline.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Qwest-CLEC Change Management Process Changes to An Existing Graphic User Interface (GUI) Timeline

The events listed above are intended to occur on business days. If the date on which any event is scheduled to occur falls on a weekend or holiday, then Qwest and the CLECs may negotiate a revised timeline.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

9.0 RETIREMENT OF EXISTING OSS INTERFACES

The retirement of an existing OSS Interface occurs when Qwest ceases to accept transactions using a specific OSS Interface. This may include the removal of a Graphical User Interface (GUI) or a protocol transmission of information (Application-to-Application) interface.

9.1 Application-to-Application OSS Interface

9.1.1 Initial Retirement Plans

At least nine (9) months before the retirement date of Application-to-Application interfaces, Qwest will share the retirement plans via web site posting and CLEC notification. The scheduled new interface is to be in a CLEC certified production release prior to the retirement of the older interface.

Alternatively, Qwest may choose to retire an interface if there is no CLEC usage of that interface for the most recent three (3) consecutive months. Qwest will provide thirty (30) calendar day notification of the retirement via web posting and CLEC notification.

9.1.2 Initial Retirement Notice to CLECs:

Initial Retirement Notices will include:

- The rationale for retiring the OSS Interface
- Available alternative interface options for existing functionality
- The proposed detailed retirement time line (e.g., milestone dates, CLEC-Qwest comment and response cycle)
- Targeted retirement date

9.1.3 CLEC Comments to Initial Retirement Notice

CLEC comments to the Initial Retirement Notice are due to Qwest no later than fifteen (15) calendar days following the Initial Retirement Notice.

9.1.4 Comparable Functionality

Unless otherwise agreed to by Qwest and a CLEC user, when Qwest announces the retirement of an interface for which a comparable interface does or will exist, a CLEC user will not be permitted to commence building to the retiring interface. CLEC users of the retiring interface will be grandfathered until the retirement of the interface. Qwest will ensure that an interface with comparable functionality is available no less than six months prior to retirement of an Application-to-Application interface.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

9.1.5 Final Retirement Notice

The Final Retirement Notice will be provided to CLECs no later than two-hundred and twenty-eight (228) calendar days prior to the retirement of the application-to-application interface. The Final Retirement Notice will contain:

- The rationale for retiring the OSS Interface (e.g., no usage or replacement)
- If applicable, where the replacement functionality will reside in a new interface and when the new interface has been certified by a CLEC
- Qwest's responses to CLECs' comments/concerns
- Actual retirement date

9.2 Graphical User Interface (GUI)

9.2.1 Initial Retirement Plans

At least two (2) months in advance of the target retirement date of a GUI, Qwest will share the retirement plans via web site posting and CLEC notification. The scheduled new interface is to be in a CLEC certified production release prior to the retirement of the older interface.

Alternatively, Qwest may choose to retire an interface if there is no CLEC usage of that interface for the most recent three (3) consecutive months. Qwest will provide thirty (30) calendar day notification of the retirement via web posting and CLEC notification.

9.2.2 Initial Retirement Notice to CLECs:

Initial Retirement Notices will include:

- The rationale for retiring the OSS Interface
- Available alternative interface options for existing functionality
- The proposed detailed retirement time line (e.g., milestone dates, CLEC-Qwest comment and response cycle)
- Targeted retirement date

9.2.3 CLEC Comments to Initial Retirement Notice

CLEC comments to the Initial Retirement Notice are due to Qwest no later than fifteen (15) calendar days following the Initial Retirement Notice.

9.2.4 Comparable Functionality

Qwest will ensure comparable functionality no less than thirty-one (31) days before retirement of a GUI.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

9.2.5 Final Retirement Notice

The Final Retirement Notice, for GUI retirements, will be provided to CLECs no later than twenty-one (21) calendar days before the retirement date. The Final Retirement Notice will contain:

- The rationale for retiring the OSS Interface (e.g., no usage or replacement)
- If applicable, where the replacement functionality will reside in a new interface and when the new interface has been certified by a CLEC
- Qwest's responses to CLECs' comments/concerns
- Actual retirement date

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Qwest-CLEC Change Management Process

Retirement of An Existing Application-to-Application OSS Interface Timeline

The events listed above are intended to occur on business days. If the date on which any event is scheduled to occur falls on a weekend or holiday, then Qwest and the CLECs may negotiate a revised timeline.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Qwest-CLEC Change Management Process Retirement of An Existing Graphic User Interface Timeline

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

10.0 PRIORITIZATION

Each OSS Interface and Test Environment release is prioritized separately. If the Systems CMP Change Requests for any interface or test environment do not exceed release capacity, no prioritization for that release is required. The prioritization process provides an opportunity for CLECs to prioritize CLEC and Qwest originated OSS Interface change requests (CRs). CLEC or Qwest originated CRs for introduction of a new interface or retirement of an existing interface are not subject to prioritization and will follow the introduction or retirement processes outlined in Sections 7.0 and 9.0, respectively.

10.1 Regulatory and Industry Guideline Change Requests

Regulatory and Industry Guideline changes, are defined in Section 4.0. , Separate procedures are required for prioritization of CRs requesting Regulatory and Industry Guideline changes to ensure that Qwest can comply with the recommended or required implementation date, if any. The process for determining whether a CR is Regulatory Change or Industry guideline is set forth in Section 5.1.

Qwest will send CLECs a notice when it posts Regulatory or Industry Guideline CRs to the Web and identify when comments are due, as described in Section 5.1. Regulatory and Industry Guideline CRs will also be identified in the CMP Systems Monthly Meeting Distribution Package.

10.1.1 Regulatory Changes

For Regulatory Changes, Qwest will implement changes no later than the time specified in the legislation, regulatory requirement, court ruling, . If no time is specified, Qwest will implement the change as soon as practicable.

Regulatory CRs will be ranked with all other CRs. If the implementation date for a Regulatory CR requires all or a part of the change to be included in the upcoming Major Release, the CR will not be subject to ranking and will be automatically included in that Major Release.

10.1.2 Industry Guideline Changes

For Industry Guideline changes, Qwest will use the national implementation timeline, if any. If no national implementation timeline is specified, Qwest will implement any related changes as soon as practicable, taking into account the benefit of the guideline change and CLEC input regarding the implementation timeline.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Industry Guideline CRs will be ranked with all other CRs. If the recommended implementation date for a Industry Guideline CR requires all or a part of the change to be included in the upcoming Major Release, the CR will not be subject to ranking and will be automatically included in that Major Release, unless Qwest and CLECs unanimously agree otherwise.

10.1.3 Regulatory and Industry Guideline Change Implementation

When more than one Major Release is scheduled before the mandated or recommended implementation date for a Regulatory or Industry Guideline CR, Qwest will present information to CLECs regarding any technical, practical, or development cycle considerations, as part of the CR review and up to the packaging options, that may affect Qwest's ability to implement the CR in any particular Major Release. At the monthly CMP meeting where the Regulatory or Industry Guideline CR is presented, Qwest will advise CLECs of the possible scheduled releases in which Qwest could implement the CR and the CLECs and Qwest will determine how to allocate those CRs among the available Major Releases, taking into account the information provided by Qwest regarding technical, practical, and/or development considerations. If the Regulatory or Industry Guideline CR is not included in a prior release, it will be implemented in the latest release specified by Qwest.

10.2 Prioritization Process

10.2.1 Prioritization Review

At the last Monthly Systems CMP Meeting before Prioritization, Qwest will facilitate a Prioritization Review including a discussion of all CRs eligible² for prioritization in a major release. Qwest will distribute all materials five (5) calendar days prior to the prioritization review. The materials will include:

- Agenda
- Summary document of all CRs eligible for prioritization. (see Appendix A - Sample – IMA 11.0 Rank Eligible CRs)

Both CLECs and Qwest should have appropriate subject matter experts in attendance at the Prioritization Review. The review and discussion meetings are open to all CLECs.

The Prioritization Review objectives are to:

- Introduce newly initiated CLEC and Qwest OSS Interface and test environment change requests.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

- Allow CLECs and Qwest to prioritize eligible OSS Interface or test environment change requests by providing specific input as to the relative importance that CLECs, as a group, and Qwest assign to each such change request.

10.2.2 Ranking

Within three (3) business days following the CMP Meeting that includes the Prioritization Review, Qwest will distribute the Prioritization Form for ranking. Ranking should be conducted according to the following guidelines:

- Each CLEC and Qwest may submit one numbered ranking of the Release Candidate List. The ranking must be submitted by the primary Point of Contact (POC, the secondary POC, or CMP Team Representative). The ranking will be submitted to the Qwest Systems CMP Manager in accordance with the guidelines described in Section 10.2.3 below. Refer to Appendix B: Sample – IMA 11.0 Initial Prioritization Form
- Qwest and each CLEC ranks each change request on the Release Candidate List by providing a point value from 1 through n, where n is the total quantity of CRs. The highest point value should be assigned to the CR that Qwest and CLECs wish to be implemented first. The total points will be calculated by the Qwest Systems CMP Manager and the results will be distributed to the CLECs in accordance with the Prioritization Process described in Section 10.2.3 below. Refer to Appendix C – Sample – IMA 11.0 Prioritization List.

10.2.3 Ranking Tabulation

CLECs and Qwest who choose to vote must submit their completed Prioritization Form via e-mail within three (3) business days following Qwest's distribution of the Prioritization Form. Within two (2) business days following the submission of ranking, Qwest will tabulate all rankings and e-mail the resulting Initial Prioritization List to the CLECs. The results will be announced at the next scheduled CMP Monthly Meeting. Prioritization is based on the results of the votes received by the deadline. Based on the outcome of the final ranking of the CR candidates, an Initial Prioritization List is produced. Qwest will place in order the candidates based on the ranking responses received by the deadline.

10.2.4 Ranking of Late Added CRs

For those late added CRs that are eligible for inclusion, as a candidate, in the most recently prioritized release (Section 10.2.4), the prioritization process will be as follows:

- Within three (3) business days following the CMP Meeting that resulted in the decision to include the late added CR as a candidate in the recently prioritized release, Qwest will distribute the late added CR for ranking, along with the initial prioritization.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

- Each CLEC and Qwest may submit a suggested rank for the late added CR. The suggested rank will be the number, from 1-n, corresponding to the position on the Initial Prioritization List that the CLEC or Qwest believes the late added CR should be inserted.
- CLECs and Qwest who choose to vote must return their suggested rank for the late added CR via e-mail within three (3) business days following Qwest's distribution of the late added CR for ranking.

Within two business days following the return of the suggested rank, Qwest will tabulate the results by averaging the returned suggested ranks for the late added CR. Qwest will insert the late added CR into the Initial Prioritization List at the resulting point on the list and will renumber the remaining candidates on the list based on this insertion. Qwest will e-mail the newly resulting Initial Prioritization List to the CLECs. The results will be announced at the next scheduled CMP Monthly Meeting.

10.2.5 Withdrawal of Prioritized CRs

A CLEC or Qwest may elect to withdraw a CR that has been prioritized for an OSS release. This process may be invoked at any time between the prioritization process and the commitment for the release. Qwest will determine its ability to work additional candidates for the release based upon the timing of the withdrawal request. After commitment, a CLEC or Qwest could request the CR be withdrawn, however, the withdrawal of the candidate may not be feasible based upon the development status at the time of the withdrawal request. The process will be as follows:

The originating CLEC or Qwest will submit a written request to the Qwest Systems CMP Manager indicating that they wish to withdraw the CR. This notification must be sent no later than 21 calendar days prior to the monthly Systems CMP meeting at which the request will be discussed. The written request must contain:

- the CR number
- the CR title
- an explanation of why the originator wishes to withdraw the CR

Within 2 business days of receipt of the request to withdraw the CR the Systems CMP Manager will notify, in writing, all of the CLECs that submitted a prioritization ranking. The subject line will note "INTENT TO WITHDRAW PRIORITIZED CR [number]." The notice will include

- the CR number
- the CR title,
- the ranking that it received from the prioritization,
- the explanation of why the originator wishes to withdraw the CR

If a CLEC or Qwest disagrees with the withdrawal of the CR from the release, they have the option to assume sponsorship of that CR. They may do so by notifying the Systems CMP

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

Manager in writing of their intent to assume sponsorship of the CR within 5 business days after the Systems CMP Manager has sent the intent to withdraw e-mail. If the Systems CMP Manager receives no response within 5 business days, then the CR will be withdrawn. The new status will be reviewed in the next monthly Systems CMP meeting.

10.3 Special Change Request Process (SCRP)

In the event that a Systems CR is not ranked high enough in prioritization for inclusion in the next Release, or as otherwise provided in the CMP, the CR originator may elect to invoke the CMP Special Change Request Process (SCRP) as described in this section.

The SCRCP may be requested up to five (5) calendar days after prioritization results are posted. However, the SCRCP does not supercede the process defined in Section 5.0 (Change Request Initiation Process).

The foregoing process applies to Qwest and CLEC originated CRs. In the event a CR is submitted through this process, Qwest agrees that it will not divert IT resources available to work on the CMP systems CRs, to support the SCRCP request. Qwest will have to apply additional resources to, and track, the additional work required for the CR it seeks to implement through the SCRCP.

All time intervals within which a response is required from one Party to another under this Section are maximum time intervals. Each Party agrees that it will provide all responses in writing to the other Party as soon as the Party has the information and analysis required to respond, even if the time interval stated herein for a response is not over.

10.3.1 SCRCP Request From

To invoke the SCRCP, the CR originator must send an e-mail to the Qwest CMP SCRCP mailbox (URL TBD). The subject line of the e-mail message must include:

- "SCRCP FORM"
- CR originator's company name
- CR number and title

The text of the e-mail message must include:

- Description of the CR
- A completed SCRCP Form (See Appendix XX)
- A single point of contact for the SCRCP request including:
 - Primary requestor's name and company

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

- Phone number
- E-mail address
- Circumstances which have necessitated the invocation of the SCRP
- Desired implementation date
- If more than one company is making the SCRP request, the names and point of contact information for the other requesting companies.

10.3.2 Qwest Acknowledges Receipt with a Confirmation E-mail

Within two (2) business days following receipt of the SCRP e-mail, Qwest will acknowledge receipt of the complete SCRP e-mail with a confirmation e-mail and advise the SCRP Requestor of any missing information needed for Qwest to process and analyze the request. When the SCRP e-mail is complete, the confirmation e-mail will include:

- Date and time of receipt of complete SCRP e-mail
- Date and time of confirmation e-mail
- SCRP title and number
- The name, telephone number and e-mail address of the Qwest contact assigned to process the SCRP
- Amount of the non-refundable Processing Fee as specified in Section 9.3.8 below.

10.3.3 Process Fee Invoice

Within one (1) business day of sending the confirmation email Qwest will bill the SCRP Requestor a non-refundable Processing Fee as specified in Section 9.3.8 below.

10.3.4 SCRP Review Meeting

Within ten (10) business days after the confirmation e-mail, Qwest will schedule and hold a review meeting with the SCRP Requestor to review Qwest's analysis of the request.

10.3.5 Preliminary SCRP Quote and Review

During business and systems requirements analysis, Qwest will review the SCRP request to determine if it has any affinities with CRs packaged for the targeted OSS Interface release. As soon as feasible, but in any case within thirty (30) business days, after receipt of a completed SCRP form, Qwest will schedule and hold a meeting with the SCRP Requestor to provide and review:

- An estimated Preliminary SCRP quote. The SCRP quote will, at a minimum, include the following information:
 - A description of the work to be performed
 - Estimated Development costs with a cap on cost
 - Targeted release

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

- An estimate of the terms and conditions surrounding the firm SCRP quote. (If the estimate increases before Qwest issues the Firm SCRP Quote, Qwest will communicate the cost increases to the SCRP Requestor. The SCRP Requestor must comply with payment terms as outlined in Section 9.3.7 before Qwest proceeds with the request.)
- An invoice covering the business and systems requirements analysis
 - Payment for this invoice is due no later than 30 calendar days following Qwest written issuance of the Preliminary Quote. Qwest will not proceed with further development in support of the SCRP Request until the business and systems analysis and processing invoices are paid.

The SCRP Requestor has ten (10) business days, upon receipt of the SCRP quote, to either agree to purchase under the quoted price or cancel the SCRP request.

10.3.5.1 SCRP Requestor Accepts the Preliminary Quote and Decision for Qwest to Proceed

If the SCRP Requestor accepts the SCRP Preliminary Quote, the SCRP Requestor must send an e-mail to Qwest with the following information:

The subject line of the e-mail message must include:

- “SCRP PRELIMINARY QUOTE ACCEPTED”
- CR originator’s company name
- CR number and title

The text of the e-mail message must include:

- Statement of accepting SCRP Preliminary Quote, targeted OSS Interface Release date, and terms and conditions
- CR originator’s name, phone number, and e-mail address

10.3.5.2 SCRP Requestor Asks to Change the SCRP Request

If the SCRP Requestor decides to modify the SCRP request after Qwest provides the preliminary SCRP Quote, the requestor must submit a written request for change to the assigned Qwest manager. If changes are acceptable to Qwest, Qwest will notify the SCRP Requestor by e-mail within five (5) business days after receipt of such request for a change with a revised preliminary SCRP Quote, if applicable. The SCRP Requestor must inform Qwest, in writing, within five (5) business days, if the modified SCRP quote is acceptable, further changes are required, or the SCRP request is cancelled.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

10.3.5.3 SCRP Requestor Cancels the SCRP Request

The last point at which a SCRP Request may be cancelled is at the CMP Meeting at which Qwest presents the CRs that Qwest has committed in the release. Otherwise, the request will be implemented with the release and the SCRP Requestor is obligated to pay the full amount of the firm quote consistent with the payment schedule described below in Section 10.3.7.

10.3.6 Firm SCRP Quote and Review

Qwest will provide the SCRP Requestor a final and Firm SCRP Quote after the completion of business requirements, systems requirements and packaging of the OSS Interface Release, and when Qwest commits CRs to the specific OSS Interface Release.

Qwest will send an e-mail to the SCRP Requestor with the following information:

The subject line of the e-mail message must include:

- “FIRM SCRP QUOTE”
- CR originator’s company name
- CR number and title

The text of the e-mail message must include:

- Final SCRP quote and terms and conditions
- Committed implementation date, or OSS Interface Release
- Qwest contact name, phone number, and e-mail address

No less than ten (10) days following issuance of the Firm SCRP Quote Qwest will schedule and hold a meeting to review the quote. At this meeting Qwest will review the elements of the Firm Quote and the firm Release Date of the Targeted Release.

10.3.7 Payment Schedule

The SCRP Requestor must pay 50% of the Firm SCRP Quote no more than ten (10) calendar days following the scheduled release date and the remaining 50% of the Firm SCRP Quote within 30 calendar days of the scheduled release date.

10.3.8 Applicable SCRP Charges

This section describes the different costs for a SCRP request.

- Processing Fee – a one-time flat fee that must be paid within 30 calendar days after the Qwest-SCRP Requestor meeting to prepare the SCRP form. This fee is non-refundable and

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

is treated separately from those charges for development and implementation as described under "Charges for the SCRP Request" below.

- Charges for Business and Systems Requirements - These charges include the costs of developing business and systems requirements.
- Charges for the Development of the SCRP Request – These charges, included in the Preliminary and Firm SCRP Quotes, including labor charges, time and capital costs incurred as a result of developing code and performing testing.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

11.0 APPLICATION-TO-APPLICATION INTERFACE TESTING

If CLEC is using an application-to-application interface, CLEC must work with Qwest to certify the business scenarios that CLEC will be using in order to ensure successful transaction processing in production. If multiple CLECs are using a service bureau provider, the service bureau provider need only be certified for the first participating CLEC; subsequent CLECs using the service bureau provider need not be certified. Qwest and CLEC shall mutually agree to the business scenarios for which CLEC requires certification. Certification will be granted for the specified release of the application-to-application interface. If CLEC is certifying multiple products or services, CLEC has the option of certifying those products or services serially or in parallel if technically feasible.

New releases of the application-to-application interface may require re-certification of some or all business scenarios. A determination as to the need for re-certification will be made by the Qwest coordinator in conjunction with the release manager of each release. Notice of the need for re-certification will be provided to CLEC as the new release is implemented. The suite of re-certification test scenarios will be provided to CLEC with the initial and final Technical Specifications. If CLEC is certifying multiple products or services, CLEC has the option of certifying those products or services serially or in parallel, if technically feasible. If multiple CLECs are using a service bureau provider, the service bureau provider need only be re-certified for the first participating CLEC; subsequent CLECs using the service bureau provider need not be re-certified.

Qwest provides a separate Customer Test Environment (CTE) for the testing of transaction based application-to-application interfaces for pre-order, order, and maintenance/repair. The CTE will be developed for each major release and updated for each point release that has changes that were disclosed but not implemented as part of the major release. Qwest will provide test files for batch/file interfaces (e.g. billing). The CTE for Pre-order and Order currently includes:

- Stand Alone Test Environment (SATE)
- Interoperability Testing
- Controlled Production Testing

The CTE for Maintenance and Repair currently includes:

- CMIP Interface Test Environment (MEDIACC)

Qwest provides initial implementation testing [intended for those CLECs that are not currently in production or that want to test new ordering or pre-ordering transactions for which they have not been through testing – move to Terms], and migration testing (from one release to the next) for all types of OSS Interface change requests. Controlled Production Testing is also provided for Pre-Order and Order. Such testing provides the opportunity to test the code associated with

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

those OSS Interface exchange requests. The CTE will also provide the opportunity for regression testing of OSS Interface functionality.

11.1 Testing Process

Qwest will send an industry notification, including testing schedules (see Section 8.0 – Changes to Existing OSS Interfaces), to CLECs so they may determine their intent to participate in the test. CLECs wishing to test with Qwest must participate in at least one joint planning session and determine:

- Connectivity (required)
- Firewall and Protocol Testing (required)
- Controlled Production (required)
- Production Turn-up (required)
- Test Schedule (required)

A joint CLEC-Qwest test plan may also include some or all of the following based on type of testing requested:

- Requirements Review
- Test Data Development
- Progression Testing Phase

Qwest will communicate any agreed upon changes to the test schedule. CLECs are responsible for establishing and maintaining connectivity to the CTE.

Provided a CLEC uses the same software components and similar connectivity configuration as it uses in production, the CLEC should, in general, experience response times similar to production. However, this environment is not intended for volume testing. The CTE contains the appropriate applications for pre-ordering and Local Service Request (LSR) ordering up to but not including the service order processor. Qwest intends to include the service order processor as part of the SATE component of the CTE by the end of 2002. Production code problems identified in the test environment will be resolved by using the Production Support process as outlined in Section 12.0.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

12.0 Production Support

12.1 Notification of Planned Outages

Planned Outages are reserved times for scheduled maintenance to Operations Support Systems (OSS). Qwest sends associated Notifications to all CLECs. Planned Outage Notifications must include:

- Identification of the subject OSS.
- Description of the scheduled OSS maintenance activity.
- Impact to the CLECs (e.g. geographic area, products affected, system implications, and business implications).
- Scheduled date and scheduled start and stop times.
- Work around, if applicable.
- Qwest contact for more information on the scheduled OSS maintenance activity.

Planned Outage Notifications will be sent to CLECs and appropriate Qwest personnel within 2 days of the scheduling of the OSS maintenance activity.

12.2 Newly Deployed OSS Interface Release

Following the release production date of an OSS Interface change, Qwest will use production procedures for maintenance of software as outlined below. Problems encountered by the CLEC should be reported to the IT Wholesale Systems Help Desk (IT Help Desk). Qwest will monitor, track, and address troubles reported by CLECs or identified by Qwest, as set forth in Section 12.X. Problems reported will be known as IT Trouble Tickets. A week after the deployment of an IMA Release into production, Qwest will host a conference call with the CLECs to review any identified problems and answer any questions pertaining to the newly deployed software. Qwest will follow CMP process for documenting the meeting (includes issues/action items and status/solution). Issues will be addressed with specific CLECs and results/status will be reviewed at the next Monthly OSS CMP Meeting.

12.3 Request for a Production Support Change

The IT Help Desk supports Competitive Local Exchange Carriers who have questions regarding connectivity, outputs, and system outages. The IT Help Desk serves as the first point of contact for reporting trouble. If the IT Help Desk is unable to assist the CLEC, it will refer information to the proper subject matter expert, also known as Tier 2 or Tier 3 support, who may call the CLEC directly. Often, however, an IT Help Desk representative will contact the CLEC to provide information or to confirm resolution of the trouble ticket.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

Qwest will assign each CLEC-generated and Qwest-generated IT Trouble ticket a Severity Level 1 to 4, as defined in Section 12.X. Severity 1 and Severity 2 IT trouble tickets will be implemented immediately by means of an emergency release of process, software or documentation (known as a patch). If Qwest and CLEC deem implementation is not timely, and a work around exists or can be developed, Qwest will implement the work around in the interim. Severity 3 and Severity 4 IT trouble tickets may be implemented when appropriate taking into consideration upcoming patches, major releases and point releases and any synergies that exist with work being done in the upcoming patches, major releases and point releases.

The first time a trouble is reported by Qwest or CLEC, the Qwest IT Help Desk will assign a IT Trouble Ticket tracking number, which will be communicated to the CLEC at the time the CLEC reports the trouble. The affected CLEC(s) and Qwest will attempt to reach consensus on resolution of the problem and closing the IT Trouble Ticket. If no consensus is reached, any party may use the Technical Escalation Process. When the IT Trouble Ticket has been closed, Qwest will notify CLECs with one of the following disposition codes:

- No Trouble Found – to be used when Qwest investigation indicates that no trouble exists in Qwest systems.
- Trouble to be Resolved in Patch – to be used when the IT Trouble Ticket will be resolved in a patch. Qwest will provide a date for implementation of the patch. This is typically applied to Severity 1 and Severity 2 troubles, although Severity 3 and Severity 4 troubles may be resolved in a patch where synergies exist.
- CLEC Should Submit CMP CR – to be used when Qwest's investigation indicates that the System is working pursuant to the Technical Specifications (unless the Technical Specifications are incorrect), and that the IT Trouble Ticket is requesting a systems change that should be submitted as a CMP CR.
- Date TBD – to be used when the IT Trouble Ticket is not scheduled to be resolved in a patch or change, but Qwest may resolve in a patch, release, or otherwise, if possible where synergies exist. This disposition is applied to Severity 3 and Severity 4 troubles.

Qwest will track "Date TBD" trouble tickets and report status and resolution of these trouble tickets and associated systems work on its CMP website. The status of these trouble tickets will be regularly discussed in CMP meetings.

For "Date TBD" trouble tickets, either Qwest or a CLEC may initiate the Change Request to correct the problem. (See Section 5.0 for CR Initiation.) If the initiating party knows that the CR relates to a trouble ticket, it will identify the trouble ticket number on the CR.

Instances where Qwest or CLECs misinterpret Technical Specifications and/or business rules must be addressed on a case-by-case basis. All parties will take all reasonable steps to ensure that any disagreements regarding the interpretation of a new or modified OSS Interface are identified and resolved during the change management review of the change request.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

12.4 Reporting Trouble to IT

Qwest will open a trouble ticket at the time the trouble is first reported by CLEC or detected by Qwest. The IT Help Desk representative will communicate the ticket number to the CLEC at the time the CLEC reports the trouble.

If a ticket has been opened, and subsequent to the ticket creation, CLECs call in on the same problem, and the IT Help Desk recognizes that it is the same problem, a new ticket is not created. The IT Help Desk documents each subsequent call in the primary ticket.

If one or more CLECs call in on the same problem, but it is not recognized as the same problem, one or more tickets may be created. When the problem is recognized as the same, one of the tickets becomes the primary ticket, and the other tickets are linked to the primary ticket. When the problem is closed, the primary and all related tickets will be closed.

12.5 Severity Levels

Severity level is a means of assessing and documenting the impact of the loss of functionality to CLEC(s) and impact to the CLEC's business. The severity level gives restoration or repair priority to problems causing the greatest impact to CLEC(s) or its business.

Guidelines for determining severity levels are listed below. Severity level may be determined by one or more of the listed bullet items under each Severity Level (the list is not exhaustive). Examples of some trouble ticket situations follow. Please keep in mind these are guidelines, and each situation is unique. The IT Help Desk representative, based on discussion with the CLEC, will make the determination of the severity level and will communicate the severity level to the CLEC at the time the CLEC reports the trouble. If the CLEC disagrees with the severity level assigned by the IT Help Desk personnel, the CLEC may escalate using the Technical Escalation Process.

Severity 1: Critical Impact

- Critical.
- High visibility.
- A large number of orders or CLECs are affected.
- A single CLEC cannot submit its business transactions.
- Affects online commitment.
- Production or cycle stopped – priority batch commitment missed.
- Major impact on revenue.
- Major component not available for use.
- Many and/or major files lost.
- Major loss of functionality.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

- Problem can not be bypassed.
- No viable or productive work around available.

Examples:

- Major network backbone outage without redundancy.
- Environmental problems causing multiple system failures.
- Large number of service or other work order commitments missed.
- A Software Defect in an edit which prevents any orders from being submitted.

Severity 2: Serious Impact

- Serious.
- Moderate visibility.
- Moderate to large number of CLECs, or orders affected.
- Potentially affects online commitment.
- Serious slow response times.
- Serious loss of functionality.
- Potentially affects production – potential miss of priority batch commitment.
- Moderate impact on revenue.
- Limited use of product or component.
- Component continues to fail. Intermittently down for short periods, but repetitive.
- Few or small files lost.
- Problems may have a possible bypass; the bypass must be acceptable to CLECs.
- Major access down, but a partial backup exists.

Examples:

- A single company, large number of orders impacted
- Frequent intermittent logoffs.
- Service and/or other work order commitments delayed or missed.

Severity 3: Moderate Impact

- Low to medium visibility.
- Low CLEC, or low order impact.
- Low impact on revenue.
- Limited use of product or component.
- Single CLEC device affected.
- Minimal loss of functionality.
- Problem may be bypassed; redundancy in place. Bypass must be acceptable to CLECs.
- Automated workaround in place and known. Workaround must be acceptable to CLECs.

Example:

- Hardware errors, no impact yet.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

Severity 4: Minimal Impact

- Low or no visibility.
- No direct impact on CLEC.
- Few functions impaired.
- Problem can be bypassed. Bypass must be acceptable to CLECs.
- System resource low; no impact yet.
- Preventative maintenance request.

Examples:

- Misleading, unclear system messages causing confusion for users.
- Device or software regularly has to be reset, but continues to work.

12.6 Status Notification for IT Trouble Tickets

There are two types of status notifications for IT Trouble Tickets:

- Ticket Notifications: for tickets that relate to only one reporting CLEC
- Event Notifications: for tickets that relate to more than one CLEC
- Event Notifications are sent by Qwest to all CLECs who subscribe to the IT Help Desk as described in Process X. Event Notifications will include ticket status (e.g. open, no change, resolved) and as much of the following information as is known to Qwest at the time the notice is sent:
 - Description of the problem
 - Impact to the CLECs (e.g. geographic area, products affected, business implications)
 - Estimated resolution date and time if known
 - Resolution if known
 - Severity level
 - Trouble ticket number(s), date and time
 - Work around if defined
 - Qwest contact for more information on the problem
 - System affected
 - Escalation information as available

Both types of notifications will be sent to the CLECs and appropriate Qwest personnel within the time frame set forth in the table below and will include all related system trouble ticket number(s).

12.7 Notification Intervals

Notification Intervals are based on the severity level of the ticket. "Notification Interval for any Change in Status" means that a notification will be sent out within the time specified from the time a change in status occurs. "Notification Interval for No Change in Status" means that a

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01,12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

notification will be sent out on a recurring basis within the time specified from the last notification when no change in status has occurred, until resolution. "Notification Interval upon Resolution" means that a notification will be sent out within the time specified from the resolution of the problem.

Notification will be provided during the IT Help Desk normal hours of operation. Qwest will continue to work severity 1 problems outside of Help Desk hours of operation which are Monday-Friday 6:00 a.m. - 8:00 p.m. (MT) and Saturday 7:00 a.m. - 3:00 p.m. (MT), and will communicate with the CLEC(s) as needed. A severity 2 problem may be worked outside the IT Help Desk normal hours of operation on a case-by-case basis.

The chart below indicates the response intervals a CLEC can expect to receive after reporting a trouble ticket to the IT Help Desk.

Severity Level of Ticket	Notification interval for initial ticket	Notification Interval for any Change in Status	Notification Interval for No Change in Status	Notification Interval upon Resolution
Severity Level 1	Immediate acceptance	Within 1 hour	1 hour	Within 1 hour
Severity Level 2	Immediate acceptance	Within 1 hour	1 hour	Within 1 hour
Severity Level 3	Immediate acceptance	Within 4 hours	48 hours	Within 4 hours
Severity Level 4	Immediate acceptance	Within 8 hours	48 hours	Within 8 hours

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

13.0 TRAINING

Qwest will incorporate all substantive changes to existing Graphical User Interfaces (GUI), including the introduction of new GUI, into CLEC training programs. Qwest will execute CLEC training for pre-order, ordering, billing, and maintenance and repair GUI.

13.1 Introduction of a New GUI

Qwest will include a CLEC training schedule with the Introduction of a New GUI Release Notification issued no less than forty-five (45) calendar days prior to the Release Production date. Qwest will make available CLEC training beginning no less than twenty-one (21) calendar days prior to the Release Production Date. Web based training will remain available for the life of the release.

13.2 Changes to an Existing GUI

Qwest will include a CLEC training schedule with the Draft Release Notes issued no less than twenty-eight (28) calendar days prior to the Release Production date. Qwest will make available CLEC training beginning no less than twenty-one (21) calendar days prior to the Release Production date. Web based training will remain available for the life of the release.

CEMR training will not be available before the release but will be conducted for 90 days in the live environment after the Release Production date.

13.3 Product and Process Introductions and Changes Qwest may offer CLEC training for product and process introductions and changes based on the complexity of the introduction or change. This training is offered in many forms, but is most commonly offered in the following delivery methods: web-based, instructor-led, job aids, or conference calls.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms “include(s)” and “including” mean “including, but not limited to.”

14.0 ESCALATION PROCESS

14.1 Guidelines

- The escalation process will include items that are defined as within the CMP scope.
- The decision to escalate is left to the discretion of the CLEC, based on the severity of the missed or unaccepted response/resolution.
- Escalations may also involve issues related to CMP itself, including the administration of the CMP.
- The expectation is that escalation should occur only after change management procedures have occurred per the CMP.

14.2 Cycle

Item must be formally escalated as an e-mail sent to the Qwest CMP escalation e-mail address, http://www.qwest.com/wholesale/cmp/escalations_dispute.html.

- Subject line of the escalation e-mail must include:
 - CLEC Company name
 - "ESCALATION"
 - Change Request (CR) number and status, if applicable
- Content of e-mail must enclose appropriate supporting documentation, if applicable, and to the extent that the supporting documentation does not include the following information, the following must be provided:
 - Description of item being escalated
 - History of item
 - Reason for Escalation
 - Business need and impact
 - Desired CLEC resolution
 - CLEC contact information including Name, Title, Phone Number, and e-mail address
 - CLEC may request that impacted activities be stopped, continued or an interim solution be established.
- Qwest will acknowledge receipt of the complete escalation e-mail with an acknowledgement of the e-mail no later than the close of business of the following business day. If the escalation email does not contain the following specified information Qwest will notify the CLEC by the close of business on the following business day, identifying and requesting information that was not originally included. When the escalation email is complete, the acknowledgement email will include:
 - Date and time of escalation receipt
 - Date and time of acknowledgement email
 - Name, phone number and email address of the Qwest Director, or above, assigned to the escalation.
- Qwest will post escalated issue and any associated responses on the CMP web site within 1 business day of receipt of the complete escalation or response.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

MASTER RED-LINED CLEC-QWEST CMP RE-DESIGN FRAMEWORK
INTERIM DRAFT – Revised 10-16-01, 10-3-01, 9-20-01, 11-1-01, 11-8-01, 11-16-01,
11-29-01, 12-10-01, 12-19-01, 01-03-02, 02-07-02, 02-20-02, 03-07-02, 04-04-02,
04-08-02, 04-16-02, 04-23-02, 05-02-02

- Qwest will give notification that an escalation has been requested via the Industry Mail Out process
- Any other CLEC wishing to participate in the escalation must submit an e-mail notification to the escalation URL within one (1) business day of the mail out. The subject line of the e-mail must include the title of the escalated issue followed by "ESCALATION PARTICIPATION"
- Qwest will respond with a binding position e-mail including supporting rationale as soon as practicable, but no later than:
 - For escalated CRs, seven (7) calendar days of sending the acknowledgment e-mail.
 - For all other escalations, fourteen (14) calendar days of sending the acknowledgment e-mail.
- The escalating CLEC will respond to Qwest within seven (7) calendar days with a binding position e-mail.
- When the escalation is closed, the resolution will be subject to the CMP.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

15.0 DISPUTE RESOLUTION PROCESS

CLECs and Qwest will work together in good faith to resolve any issue brought before the CMP. In the event that an impasse issue develops, a party may pursue the dispute resolution processes set forth below: Item must be formally noticed as an e-mail sent to the Qwest CMP Dispute Resolution e-mail address, http://www.qwest.com/wholesale/cmp/escalations_dispute.html. Subject line of the e-mail must include:

- CLEC Company name
- "Dispute Resolution"
- Change Request (CR) number and status, if applicable
- Content of e-mail must enclose appropriate supporting documentation, if applicable, and to the extent that the supporting documentation does not include the following information, the following must be provided:
 - Description of item
 - History of item
 - Reason for Escalation
 - Business need and impact
 - Desired CLEC resolution
 - CLEC contact information including Name, Title, Phone Number, and e-mail address
 - Qwest will acknowledge receipt of the complete Dispute Resolution e-mail within one (1) business day
- Qwest or any CLEC may suggest that the issue be resolved through an Alternative Dispute Resolution (ADR) process, such as arbitration or mediation using the American Arbitration Association (AAA) or other rules. If the parties agree to use an ADR process and agree upon the process and rules to be used, including whether the results of the ADR process are binding, the dispute will be resolved through the agreed-upon ADR process.
- Without the necessity for a prior ADR Process, Qwest or any CLEC may submit the issue, following the commission's established procedures, with the appropriate regulatory agency requesting resolution of the dispute. This provision is not intended to change the scope of any regulatory agency's authority with regard to Qwest or the CLECs.

This process does not limit any party's right to seek remedies in a regulatory or legal arena at any time.

¹ Throughout this document, OSS Interfaces are defined as existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users

² Throughout this document, the terms "include(s)" and "including" mean "including, but not limited to."

APPENDIX D

Change Request Form Instructions

The Change Request (CR) Form is the written documentation for submitting a CR for a Product, Process or OSS interface (Systems) change. The CR should be reviewed and submitted by the individual, which was selected to act as a single point of contact for the management of CRs to Qwest. Electronic version of the CR Form can be downloaded from the Qwest Wholesale WEB Page at <http://www.qwest.com/wholesale/cmp/changerequest.html>.

Product/Process and System CRs may be submitted to Qwest via e-mail at: cmpcr@qwest.com

To input data to the form, use the Tab Key to navigate between each field. The following fields on the CR Form must be completed as a minimum, unless noted otherwise:

Submitted By

- Enter the date the CR is being submitted to the Qwest CMP Manager.
- Enter Company's name and Submitter's name, title, and email/Phone#.
- Optional – identify potential available dates Submitter is available for a Clarification Meeting.
- Optional – enter a Company Internal Reference No. to be identified.

Proprietary Submission

- If the CR is proprietary (i.e., confidential) and is meant to be directed only to your account manager and not flow through the CMP, then select "Yes". If the CR is not proprietary and is meant to flow through the CMP, then select "No". If this field is left blank, the default will be "No".

Area of Change Request

- Select the type of CR that is being submitted (Product, Process, or Systems).

Title of Change

- Enter a title for this CR. This should concisely describe the CR in a single sentence.

Description of Change

- Describe the Functional needs of the change being requested. To the extent practical, please provide examples to support the functional need. Also include the business benefit of this request.

Expected Deliverables

- Enter the desired outcome required of Qwest (e.g. revised process, clarification, improved communication, etc.).

Products Impacted – Optional

- To the extent known, check the applicable products that are impacted by the CR.

APPENDIX D

Area Impacted – Optional

- To the extent known, check the applicable process areas that are impacted by the CR.

OSS Interfaces Impacted – Optional

- To the extent known, check the applicable systems that are impacted by the CR.

Qwest's CMP Manager will complete the remainder of the Form.

DEFINITION OF TERMS

Term	Definition
CLEC	A telecommunications provider that has authority to provide local exchange telecommunications service on or after February 8, 1996, unless such provider has been declared an Incumbent Local Exchange Carrier under the Federal Telecommunications Act of 1996.
Software Defects	A problem with system software that is not working according to the Technical Specifications and is causing detrimental impacts to the users.
Design, Development, Notification, Testing, Implementation and Disposition	<p>Design: To plan out in a systematic way. Design at Qwest includes the Business Requirements Document and the Systems Requirements Document. These two documents are created to define the requirements of a Change Request (CR) in greater detail such that programmers can write system software to implement the CR.</p> <p>Development: The process of writing code to create changes to a computer system or sub system software that have been documented in the Business Requirements and Systems Requirements.</p> <p>Notification: The act or an instance of providing information. Various specific notifications are documented throughout the CMP. Notifications apply to both Systems and Product & Process changes.</p> <p>Testing: The process of verifying that the capabilities of a new software Release were developed in accordance with the Technical Specifications and performs as expected. Testing would apply to both Qwest internal testing and joint Qwest/CLEC testing.</p> <p>Implementation: The execution of the steps and processes necessary in order to make a new release of a computer system available in a particular environment. These environments are usually testing environments or production environments.</p> <p>Disposition: A final settlement as to the treatment of a particular Change Request.</p>
Good Faith	"Good faith" means honesty in fact and the observance of reasonable commercial standards of fair dealing.

Term	Definition
OSS Interface	Existing or new gateways (including application-to-application interfaces and Graphical User Interfaces), connectivity and system functions that support or affect the pre-order, order, provisioning, maintenance and repair, and billing capabilities for local services provided by CLECs to their end users.
OSS Application to Application Interface Testing Controlled Production Testing	Controlled Production process is designed to validate CLEC ability to transmit transactions that meet industry standards and complies with Qwest business rules. Controlled Production consists of submitting requests to the Qwest production environment for provisioning as production orders with limited volumes. Qwest and CLEC use Controlled Production results to determine operational readiness for full production turn-up.
Initial Implementation Testing	This type of application-to-application testing allows a CLEC to validate its technical development of an OSS Interface before turn-up in production of new transactions or significantly changed capabilities.
Interoperability Testing Environment	A production copy of IMA. It interfaces directly with Qwest's production systems for pre-order and order processing. As a result, all interoperability pre-order queries and order transactions are subjected to the same edits as production orders. A CLEC uses account data valid in Qwest production systems for creating scenarios on Qwest-provided templates, obtains approval on these scenario templates, and then submits a minimum set of test scenarios for all transactions it wishes to perform in production. Interoperability testing provides CLECs with the opportunity to validate technical development efforts and to quantify processing results.
Level of Effort	Estimated range of hours required to implement a Change Request
Migration Testing	Process to test in the Customer Testing Environment a subsequent application-to-application Release from a previous Release. This type of testing allows a CLEC to move from one release to a subsequent release of a specific OSS Interface.

Term	Definition
Regression Testing	Process to test, in the Customer Test Environment, OSS Interfaces, business process or other related interactions. Regression Testing is primarily for use with 'no intent' toward meeting any Qwest entry or exit criteria within an implementation process. Regression Testing includes testing transactions previously tested, or certified.
<p>Release</p> <ul style="list-style-type: none"> • Major Release • Point Release • Patch Release 	<p>A Release is an implementation of changes resulting from a CR or production support issue for a particular OSS Interface. There are three types of releases for IMA.:</p> <ul style="list-style-type: none"> • Major Release may be CLEC impacting (to systems code and CLEC operating procedures) via EDI changes, GUI changes, technical changes, or all. Major Releases are the primary vehicle for implementing systems Change Requests of all types (Regulatory, Industry Guideline, CLEC-originated and Qwest-originated). • Point Release may not be CLEC code impacting, but may affect CLEC operating procedures. The point release is used to fix bugs introduced in previous releases, technical changes, make changes to the GUI, and/or deliver enhancements to IMA disclosed in a major release that could not be delivered in the timeframe of the major release. • Patch Release is a specially scheduled system change for the purpose of installing the software required to resolve an issue associated with a trouble ticket.
Release Production Date	The Release Production Date is the date that a software Release is first available to the CLECs for issuance of production transactions.
Sub-systems	A collection of tightly coupled software modules that is responsible for performing one or more specific functions in an OSS interface.
Stand-alone Testing Environment (SATE)	A Stand-Alone Testing Environment is a test environment that can be used by CLECs for Initial Implementation Testing, Migration Testing and Regression Testing. SATE takes CLEC pre-order and order transaction requests, passes the requests to the stand-alone database, and returns responses to the CLEC user. SATE uses pre-defined test account data and requests that are subject to the same BPL IMA/EDI edits as those used in production. The SATE is intended to mirror the production environment (including simulation of all legacy systems). SATE is part of the Customer

Term	Definition
	Test Environment.
Technical Specifications	<p>Detailed documentation that contains all of the information that a CLEC will need in order to build a particular release of an OSS application-to-application interface. Technical Specifications include:</p> <ul style="list-style-type: none"> • A chapter for each transaction or product which includes a business (OBF forms to use) description, a business model (electronic transactions needed to complete a business function), trading partner access information, mapping examples, data dictionary <p>Technical Specification Appendices for IMA include:</p> <ul style="list-style-type: none"> • Developer Worksheets • IMA Additional Edits (edits from backend OSS systems) • Developer Worksheets Change Summary (field by field, release by release changes) • EDI Mapping and Code Conversion Changes (release by release changes) • Facility Based Directory Listings • Generic Order Flow Business Model <p>The above list may vary for non-IMA application to application interfaces</p>
Version	A version is the same as an OSS Interface Release (Major or Point Release)

PHX/1299048.1/67817.150
